

# DRASHTI AMIN

Long Island, NY | [drashtitech14@gmail.com](mailto:drashtitech14@gmail.com) | +1(657)-767-4381 | [LinkedIn](#) | [GitHub](#)

## EDUCATION

**California State University Fullerton, Fullerton, CA**  
Master of Science in Computer Science

August 2022 - May 2024  
GPA – 3.56

**Navrachana University, Vadodara, Gujarat**  
Bachelor of Technology in Computer Science and Engineering

August 2018 - May 2022  
GPA – 3.80

## TECHNICAL SKILLS

**Data Analysis:** Pandas, Numpy, Regular expressions, data preprocessing, data imputation, ML algorithms

**Data Visualization:** Matplotlib, Seaborn, Dash, Plotly, Tableau, PowerBI, SSRS

**Database Management:** MySQL, PostgreSQL

**Programming:** Python, JAVA, R, SAS

**Cloud Services:** AWS, Google Cloud Platform (GCP)

**Certification:** IBM and GCP certified Data Analyst, [SAS Certification](#)

**Additional Skills:** MSOffice, NLP, ETL Process, Feature Engineering, Predictive Modeling, JIRA, Agile

## EXPERIENCE

**Sol NY Corp. DBA Sol Trading, Plainview NY USA**

September 2024 – Present

Data Analyst

- Oversee data integrity and accuracy by managing large datasets of over 10,000 records, utilizing SQL, SAS, and Excel for effective database management and data analysis. Conduct detailed reporting and statistical analysis to extract insights that drive business strategies, producing 15 comprehensive reports that improved decision-making by 20%.
- Develop predictive models and create dynamic visualizations with Power BI to communicate complex data insights, facilitating informed discussions among stakeholders across 5 key departments.

**California State University Fullerton, Fullerton CA USA**

May 2023 – December 2023

Research Assistant

- Led data collection and entry for a project with over 10,000 student responses from 115 California Community Colleges. Used Python, SQL, and SAS for data integration, quality control, and management, ensuring 100% accuracy. Managed data with Excel and Microsoft Office for report preparation. Applied statistics and statistical analysis to interpret data trends.
- Prepared data for analysis, producing 15 reports with Python for processing, SQL for querying, and SAS for visualization and statistical analysis. Reports, compiled in Microsoft Office, featured detailed data analytics and visualizations with Power BI, enhancing research relevance and responsiveness by 20%. Used SAS for data analysis, modeling, and mining, improving data quality by 30%.

**Banco Products India LTD, Vadodara, Gujarat, India**

Jan 2021 - July 2022

Data Analyst Intern

- Conducted data analysis on performance metrics for over 50 product lines using SQL and Excel. Applied Python for analytics and SAS for data mining and modeling, leading to a 15% improvement in product quality. Leveraged business intelligence techniques to interpret data trends. Developed and presented over 10 interactive reports and dashboards with Power BI, integrating SQL data.
- Analyzed workflow data with SQL and SAS, identifying and resolving 10+ inefficiencies. Implemented process improvements and ETL procedures, reducing downtime by 25% and increasing productivity by 20%.

## ACADEMIC PROJECTS EXPERIENCES

**Credit Card Transaction and Customer Report using PowerBI and SQL**

August 2024

- Developed a comprehensive report on credit card transactions and customer behaviors using SQL and Power BI. Applied Python and SAS for data extraction, processing, and data modeling. Enhanced marketing strategies by 15% and reduced processing time by 30%.
- Created dynamic Power BI dashboards for visualizing transaction volumes and customer demographics. Improved actionable insights by 20% through data processing with Python and SAS, integration of data. Applied data analytics and statistical analysis to refine insights.

**Multiple Disease detection system using ML**

January 2024 – May 2024

- Engineered a machine learning model with Python and TensorFlow to detect multiple diseases, including diabetes, Parkinson's, and heart conditions, achieving 85% accuracy. Applied data modeling, data analysis, data mining, and statistical analysis with SAS.
- Developed interactive visualizations with Tableau and Power BI to display model predictions and disease probabilities. Created a web application with Streamlit for user interaction. Used Oracle for managing datasets and employed SQL for querying and data entry.

**Ecommerce Sentiment Analysis and Review Processing using Python and SQL**

August 2023

- Designed a sentiment analysis system with Python for programming and SQL for data management. Applied SAS for data analysis, data mining, and data modeling, using Power BI for data visualization. Enhanced review classification accuracy by 25% and enabled effective data-driven decision-making. Utilized NLP techniques for data preprocessing and feature extraction with Snowflake and Oracle.
