EDUCATION:

University of North Carolina at Charlotte
M.S in Computer Science (Graduated Magna Cum Laude)

May 2024 - August 2025

University of North Carolina at Charlotte
B.S in Computer Science (Graduated Cum Laude)

January 2023 - December 2024

Central Piedmont Community College
Associate of Arts

August 2018 - May 2022

PROJECTS:

CLT Events (*Node.js, Express, MongoDB, EJS*)

<https://github.com/emilex330/CLT-Events>

- Developed a **full-stack web application** for event creation, browsing, RSVP management, and user profile handling using **Node.js**, **Express.js**, and **MongoDB**.
- Implemented **secure user authentication** with hashed password verification, session tracking via **express-session**, and persistent login state stored in **connect-mongo**.
- Built comprehensive **CRUD features** for events, including image upload handling, date/time validation, category filtering, and RSVP restrictions to maintain event integrity.
- Designed a **personalized profile dashboard** displaying hosted events and RSVP history by aggregating and populating related MongoDB collections.
- Utilized **EJS templating** for dynamic server-side rendering, delivering a responsive, user-friendly interface with real-time feedback via **connect-flash** messages.
- Applied robust **error handling and access control**, preventing unauthorized event edits, invalid RSVPs, and duplicate account registration.

FastBreak Dashboard (*Next.js, TypeScript, React, Tailwind CSS, ESLint, PostCSS*)

<https://github.com/emilex330/fastbreak-dashboard>

- Developed a responsive web dashboard using **Next.js** (React framework) with **TypeScript** and **Tailwind CSS** for UI styling.
- Implemented modern frontend tooling and configuration (e.g., ESLint, PostCSS, Tailwind) to ensure code quality and maintainability.
- Structured the app for deployment on platforms like **Vercel**, enabling fast, scalable hosting for real-time interfaces.
- Built reusable UI components and layouts to support dynamic data visualization and user interaction within the dashboard.
- Leveraged **Next.js** features such as App Router, server-side rendering (SSR) possible routes, and React integration to optimize performance and user experience.

TECHNICAL SKILLS

Languages: Java, JavaScript, C++, C, HTML, CSS, SQL

Tools: MongoDB, Git, PostgreSQL

Skills: Full Stack Development, Object-Oriented Programming OOP, Data Structures and Algorithms, Database Design, Software Engineering

Frameworks: Node.js, Express, React
