## SUMMARY

Results-driven Business Analyst with 2+ years of IT industry experience in meeting needs, improving processes and exceeding requirements in team environments. **Certified Product Manager** with eagerness to establish a long-term career with my expertise on business and systems requirements, user acceptance testing and end-user training. Diligent worker with strong communication and task prioritization skills. I am confident that my commitment to delivering exceptional service, optimizing processes, future decision-making and achieving organizational goals will make me an asset to your team.

## EXPERIENCE

### Business Analyst

#### Cognizant Technologies Solutions, Chennai, India

Nov 2017 – Apr 2019

- Conducted interviews with key business users to collect information on business processes and user requirements.
- Analyzed key aspects of business to evaluate factors driving results and summarized into presentations.
- Improved business direction by prioritizing customers and implementing changes based on collected feedback.
- Analyzed open orders, backlog, and sales data to provide sales team with insights.
- Lead requirements gathering for large, complex and high-risk projects
- Supports Multiple client engagements simultaneously
- Analyze and understand our client's business needs, systems, third party vendors, and potential data sources
- Detailed technical documentation of the solution, business rules, and components of the solution
- Create clear/precise detailed requirements and solution data mapping requirements
- Work closely with internal development resources to ensure technical implementation requirements are interpreted and implemented correctly in a timely manner.

### Developer/ Business Analyst

#### Cognizant Technologies Solutions, Chennai, India

Apr 2017 – Oct 2017

- Designed, developed, and implemented software applications for website based on analyzed requirements and understanding of industry technical standards.
- Tested programs and databases to identify issues and make necessary modifications.
- Collaborated with project managers to select ambitious, but realistic coding milestones on pre-release software project development.
