

PARTH TIKKIWAL

New York • (646) 329 4782 • Parthtikkiwal6@gmail.com • [LinkedIn](#)

Results-oriented **Business Analyst** with over 4 years of adeptness in the Software Development Life Cycle (SDLC). Proficient in system concept design, requirements elicitation, testing life cycle, implementation, and production support. Skilled in gathering requirements from stakeholders using interviews, questionnaires, brainstorming, and cost/benefit analysis. Adept at analyzing data to provide actionable insights and recommendations for process optimization. Experienced in UML notations, swim lane diagrams, and visual aids for product features. Conducts comprehensive analyses including GAP analysis, ROI analysis, SWOT analysis, and Cost-Benefit analysis. Proficient in SQL for data extraction and manipulation, enabling data-driven insights. Utilizes project management tools like Jira and Confluence for task assignment and documentation. Proficient in Python with Pandas, NumPy, Matplotlib, and Scikit-learn for data manipulation and analysis. Leads Joint Application Development (JAD) sessions to align solutions with business requirements. Creates detailed System Requirement Specifications (SRS), Functional Requirement Specifications (FRS), and Requirements Traceability Matrix (RTM). Excellent technical writing skills for Business Requirements Document (BRD), Functional Specifications Document (FSD), Nonfunctional Requirements Document, and Use Case Specifications. Expertise in UML methodologies with class diagrams, object diagrams, use case diagrams, state diagrams, sequence diagrams, activity diagrams, and collaboration diagrams. Skilled in developing interactive Tableau reports and Dashboards with diverse visualizations. Strong analytical and problem-solving skills, adept at handling multifaceted tasks and aiding enterprises in making critical decisions. Proficient in Power BI, Microsoft Project, MS Excel, and MS Visio. Excellent communication and interpersonal skills for conveying requirements to project teams and technical solutions to stakeholders. Demonstrated proficiency in system and User Acceptance Testing (UAT) using HP Quality Center.

PROFESSIONAL EXPERIENCE

Honeywell, NY | Business Analyst

SEP 2023 - PRESENT

- Conducted **User Acceptance Testing (UAT)** to ensure the successful implementation of business solutions and validate that requirements were met, utilizing **Python** and **SQL** for data validation.
- Applied **SDLC** methodologies meticulously to streamline intricate business processes, yielding a remarkable 25% improvement in operational efficiency.
- Collaborated closely with stakeholders to define user stories and acceptance criteria, driving **agile** development projects towards successful outcomes.
- Produced Business Requirements Documents (**BRD**) and Functional Requirements Documents (**FRD**), effectively communicating requirements to development teams.
- Created and maintained interactive dashboards and reports using **Tableau**, empowering stakeholders with real-time visibility into key performance indicators, facilitating data-driven decision-making.
- Conducted comprehensive **gap analyses** to identify and address areas where existing software solutions failed to meet business needs.
- Facilitated workshops and meetings to elicit requirements, conduct brainstorming sessions, and gather feedback from stakeholders, ensuring alignment and fostering collaboration.
- Engaged with development teams in **agile** environments, contributing to sprint planning, backlog grooming, and daily stand-up meetings, ensuring timely and successful project delivery.
- Applied **UML** methodology to create use cases, functional requirement case diagrams, activity diagrams, sequence diagrams, and state diagrams, visualizing complex processes through tools like **Figma** and **MS Visio**.
- Leveraged **SWOT analysis** to formulate strategic business plans, driving sustainable year-over-year growth of 15% by capitalizing on strengths and opportunities while mitigating weaknesses and threats.
- Generated reports in **Excel** by importing data from **SQL** databases using **T-SQL**, crafting queries tailored to business requirements.
- Developed meticulous documentation for datasets, including comprehensive data dictionaries, metadata, and data lineage, reducing data-related errors by 15% and ensuring unparalleled data transparency and accuracy.
- Orchestrated Joint Application Development (**JAD**) sessions and conducted end-user interviews to elicit and document business requirements as user stories and epics.
- Integrating **JIRA** with other tools and systems used in the project, such as **Confluence** for documentation and development tools for code management, to streamline the project workflow.

Onco Advisor, NY | Business Analyst Intern

JULY 2023 – AUG 2023

- Leveraged **SQL** to analyze global cancer drug research data, pinpointing 15 emerging pharmaceutical companies. This initiative uncovered a potential business opportunity valued at 600K.
- Developed and executed a **digital marketing campaign** strategy with a focus on creating awareness and engagement, resulting in a 26% increase in page visitors.
- Executed **A/B testing** on social media platforms to refine company messaging, resulting in a 15% uptick in click-through rates.
- Designed and implemented **Power BI** reports and **dashboards**, aligning with business objectives and enhancing data-driven decision-making processes.
- Meticulously crafted detailed documentation for datasets, including comprehensive data dictionaries, metadata, and data lineage, leading to a 15% reduction in data-related errors, ensuring unparalleled data transparency and accuracy.
- Conducted in-depth market research and **competitive analysis** within the oncology pharmaceutical market, delivering actionable insights to drive strategic decisions.
- Contributed to the development of business cases and **financial models**, assessing the potential **ROI** of new business opportunities and marketing initiatives.

Modi Company, India | Business Analyst

Jan 2020 – Jun 2022

- Conducted in-depth analysis of the commercial refrigeration industry, focusing on wholesale distribution, manufacturing, and turnkey projects. Identified market trends and opportunities through extensive market research and analysis.
- Collaborated with cross-functional teams to review processes, identify inefficiencies, and propose solutions, resulting in a 20% reduction in operational costs.
- Developed and executed **User Acceptance Testing (UAT)** plans to ensure software solutions met business requirements.
- Created and maintained interactive dashboards and reports using **Tableau**, providing stakeholders with real-time visibility into key performance indicators and facilitating data-driven decision-making.

- Managed **user stories, epics**, and requirements in **JIRA**, ensuring all stakeholder needs were captured and tracked throughout the project lifecycle.
- Collaborated with stakeholders to gather and analyze requirements, documenting them in Business Requirement Documents (**BRD**) and Functional Requirement Documents (**FRD**), ensuring alignment with organizational goals.
- Analyzed customer needs and preferences in collaboration with sales teams, utilizing **SQL** for data analysis to develop tailored product offerings and marketing strategies.
- Worked closely with procurement teams to source raw materials and negotiate supplier contracts, optimizing procurement processes for cost-effectiveness.
- Supported manufacturing operations by analyzing production processes and identifying areas for improvement, leveraging **SQL** technology for data-driven insights to enhance efficiency and reduce costs.
- Participated in pricing strategy development for manufactured products, considering market dynamics, competitor pricing, and cost structures to maximize profitability.
- Played a pivotal role in driving organizational change initiatives, conducting impact assessments, and implementing strategies to **mitigate risks** and capitalize on opportunities identified through **SWOT analysis**.

Ouranos Technologies Pvt. Ltd, India Business Analyst Intern	Jul 2019 – Dec 2019
• Performed user testing and usability studies to assess the effectiveness of digital products and interfaces, pinpointing areas for enhancement and optimization to elevate user experience. • Engineered customized reports and dashboards using advanced features of reporting tools like Power BI, enhancing data accessibility and boosting decision-making efficiency by 25%. • Contributed to the preparation and delivery of presentations and reports to senior management, encapsulating key findings, recommendations, and project updates for informed decision-making. • Engaged in agile sprint planning and review meetings, offering insights and feedback to prioritize tasks and mitigate project risks and dependencies. • Contributed to the development and documentation of business processes and workflows, enhancing operational efficiency and streamlining business operations. • Conducted competitive analysis and market research to pinpoint emerging trends, opportunities, and threats in the industry. Delivered strategic recommendations to capitalize on market dynamics and secure a competitive advantage.	

EDUCATION

Purdue University , Master of Science in Marketing Analytics (STEM) West Lafayette, Indiana	Jul 2022 – Dec 2023
Rajasthan Technical University , Bachelor of Technology in Computer Science Jaipur, India	Aug 2015 – Dec 2019

TECH STACK

Languages:	Advanced SQL, R, Python
Business Analytics:	Change Management, Impact Analysis, Risk Analysis, Gap Analysis, Cost-Benefit Analysis, ROI Analysis, SWOT analysis, Root Cause Analysis, BRD, FRD, Process Modelling, Requirements Gathering, User Stories
Technical Skills:	Data Analysis, Data Visualization, Project Management, MySQL and SQL Server, Visual Studio
Project Management:	HP ALM, Agile, JIRA, SharePoint, Waterfall, SCRUM, Advanced-Excel, Microsoft Office 365 Suite (Word, Excel, etc.), ServiceNow, Change Request Management tool
Reporting:	Preparing project status and sprint metrics reports (Product Backlog, Sprint Backlog, Burn-Down Chart, and Velocity Chart)
Data Management:	Data Cleansing, Data Manipulation and Data Integration
Reporting tools & others:	Digital Marketing, MS Office, Presentation and Communication, Market Research and Analysis, Tableau, Power BI, SAS, Tab Spec, Power Platform, SharePoint, Tableau and MS Office suite, JIRA, Confluence
Methodologies:	Agile, Scrum, Waterfall, SDLC

Projects

- **Market Segmentation:** Led market segmentation and simulation for a phone manufacturer, forecasting market share and comprehending consumer preferences in a competitive market. Utilized techniques such as regression analysis, correlation, and market share calculation to achieve project objectives.
- **Price Fluctuation Analysis:** Developed an automated Python script to scrape price fluctuations for electronics during Black Friday sales, streamlining data collection and analysis processes.
- **Comparative Likeability Study:** Crafted a Market Research Survey using Qualtrics to evaluate customer preferences between two local restaurants. Employed ANOVA and Regression Analysis techniques to derive actionable insights from the gathered data.
