CAREER SUMMARY

A **Software Engineer** with strong experience in cloud infrastructure, automation, and infrastructure-as-code within large enterprise environments. Proven ability to design, deploy, test, and secure AWS-based systems using Terraform Enterprise, Lambda, CodeDeploy, and Splunk. Strong background in backend development, databases, and CI/CD testing, with deep experience in automation, observability, and cloud operations.

TECHNICAL SKILLS

Advanced in SQL (Oracle database, Android SQLite) | Web Development (HTML/CSS) | JavaScript/ DOM | Google Cloud | Python and Jython | Amazon Web Services (AWS) | Proficient in C# | Spring Framework | Software as a Service (SaaS) | Microsoft Excel/Office | Java | React | Splunk | Terraform | MongoDB

EXPERIENCE

JP Morgan Chase & Co.

Plano, TX

Software Engineer

Jul 2025 - present

Security Engineering Intern

Feb 2025 - Jul 2025

- Designed and provisioned AWS infrastructure using Terraform and Terraform Enterprise (TFE), supporting enterprise migration from Terraform OSS across multiple environments (dev, staging, prod).
- Built reusable, parameterized Terraform modules for Lambda, EC2, VPCs, IAM roles, security groups, and CodeDeploy applications, enforcing consistency and least-privilege access.
- Designed and implemented AWS CodeDeploy applications and deployment groups for Lambda and EC2-based services, including traffic shifting, rollback logic, and CloudWatch alarms.
- Integrated infrastructure and deployment workflows with internal CI/CD and Jules pipelines, enabling automated and manual release triggers.
- Developed AWS Lambda functions end to end using Python, including EC2 lifecycle automation, DNS handling, secrets management, and Splunk backup and rehydration workflows.
- Created custom SSM documents and tag-driven automation to orchestrate Splunk deployments, backups, and repave operations across components.
- Implemented comprehensive unit testing for Lambda functions using pytest, moto, and unittest.mock, achieving 90%+ test coverage and meeting SonarQube quality gates.
- Automated Splunk deployments using AWS CodeDeploy and modular Bash scripting, validating deployments through SSM Session Manager and Robot Framework tests.

ETC (Electronic Transactions Consultants)/Quarter Hill

Richardson, TX

IT Fulfillment Officers - Contract

Mar 2024 - Aug. 2024

- Prepared and organized outbound mailings, including sorting documents, stuffing envelopes, and applying postage for high-volume customer communications.
- Maintained accuracy and organization of mailed materials to ensure timely and correct delivery.
- Supported internal teams by handling repetitive operational tasks reliably and efficiently.

UBook

Aqaba, Jordan

Operational Informatics Manager

Oct 2021 -Feb. 2023

- Led a team of developers, overseeing database-driven application development, code reviews, and system implementations.
- Designed and optimized database architectures and operational workflows, improving productivity and increasing customer acquisition by 20%.
- Collaborated with medical providers, educators, and caregivers to build data management systems supporting personalized care for marginalized populations.

- Managed grant tracking databases, ensuring accurate financial reporting and resource allocation.
- Oversaw business operations including marketing, scheduling, customer onboarding, and payment systems.
- Produced analytical reports evaluating performance of email and social media campaigns.

ADDITIONAL EXPERIENCE

Self-employed

English Instructor and Business Owner

Remote

Jul 2019 – Aug 2024

- Founded and operated a successful English tutoring business serving international students and professionals.
- Designed personalized lesson plans and delivered engaging 1:1 and small group sessions focused on conversational fluency, grammar, and academic/business writing
- Built a loyal client base through strong word-of-mouth, professional branding, and social media outreach.
- Delivered over 1,000 hours of instruction to learners of diverse backgrounds, helping students achieve language certifications and academic goals.
- Leveraged online platforms (Zoom, Google Meet, and WhatsApp) to teach remotely across time zones with flexible curriculum delivery

EDUCATION

Al Hussein Bin Talal University

Ma'an, Jordan

Bachelor's Degree - Software Engineering

- Developed both Front-end and Back-end Software's using variety of programming languages. Analyzing Data. Software Design. Software Planning. Software Maintenance. Build Databases.

AWZ - Android Application

- Developed an Android application with a team following IEEE documentation standards.
- Led Information elicitation, requirements analysis, and database development.
- Managed the workflow, task organization, maintaining project platform to the successful execution of the application

Year Up United

Dallas, TX

Backend Programmer Trainee

Aug, 2024 – Jul 2025

- Developed multiple Java projects employing OOP principles, learning JDBC, building and connecting to MySQL database,
- Deployed 10+ application using Spring Boot including last capstone and tested the API endpoints using Postman.
- Wrote SQL queries and used CRUD to manipulate data in the DBMS

Npower

Dallas, TX

Front-end Programmer Trainee

Oct, 2024 – Apr 2025

- Built and deployed interactive JavaScript websites, designing and developing user-friendly interfaces using HTML, CSS, and JavaScript.
- Utilized React to create dynamic UI components and DOM to manipulate and update web page content dynamically.
