

Feroja Sultana Jany

Kissimmee, FL 34741 | 689-288-4363

ferojajany@gmail.com

Resourceful Software Quality Assurance Engineer with 5 years handling complete review process. Expertly assists IT design, testing and maintenance to preserve application effectiveness. Offers detailed patch assessment and script automation to handle service delivery in rigorous always-on environments. Actively resolves technical complications during application QA testing.

Skills

- JAVA, SQL
- Data-Driven, Keyword Driven, Hybrid, Page Object Model (POM), TestNG, OOPS Concept, Behavior Driven Development(BDD).
- Eclipse, IntelliJ, Visual Studio Code
- API testing using Postman and RestAssured
- Version control systems
- Defect tracking
- Windows, iOS
- Selenium WebDriver, TestNG, Selenium IDE
- GitHub, SVN
- Outlook, Word, Excel, PowerPoint
- Automated testing
- Load testing

Work History

Software Quality Assurance Engineer

Nexxvali Corp, Milwaukee, WI

April 2021 - Current

- Played a key role in Agile Development and SCRUM processes, ensuring smooth and reliable checkout processes across multiple retail outlets, improving overall system reliability by 25%
- Led API Testing and UI Testing, contributing to the seamless integration and performance of both front-end and back-end systems, resulting in a 20% reduction in customer-reported issues
- Designed and maintained highly efficient automated test suites, continuously optimizing them to improve testing speed and accuracy, which reduced test execution time by 40%
- Implemented robust test strategies and test plans, integrating them into CI/CD pipelines, enhancing the software delivery process and achieving a 95% on-time deployment rate
- Researched and introduced advanced testing tools and processes, which improved testing quality levels and reduced defect leakage into production by 30%
- Collaborated closely with developers and project managers to identify, reproduce, and document software bugs, resulting in quicker bug resolution times and improved software stability
- Successfully managed defect tracking and coordination using JIRA, ensuring effective communication between team members, developers, and project managers, and improving overall defect management efficiency by 35%.

- Resolved technical issues and forecasted troubleshooting complications during software trials.
- Developed and executed QA test cases, scripts and procedures for automated software maintenance.

Manual Test Engineer

Comcast, Boston, MA

June 2020 - March 2021

- Successfully developed and executed comprehensive test plans and test cases, ensuring full coverage of Functionality, Smoke, Regression, System, Integration, Black Box, User Acceptance, and End-to-End Testing, leading to a 30% reduction in post-release defects
- Created robust functional, smoke, and regression automation testing suites using Selenium, Java, BDD Cucumber, and SQL, improving testing efficiency by 40% and reducing manual effort by 60%
- Automated database validation using MySQL, JDBC, and BDD Cucumber, streamlining testing processes for complex CMS-backed government payment systems
- Tested and automated RESTful API services using Postman and Rest-Assured, ensuring secure and reliable integration with external systems, reducing API-related defects by 25%
- Led technical reviews of test automation deliverables, consistently meeting project timelines and ensuring high-quality outputs, contributing to an on-time release rate of 95%
- Utilized YouTrack and JIRA for effective defect logging, tracking, and requirement analysis, resulting in improved team collaboration and faster bug resolution cycles.

Education

High School Diploma April 2008

Noakhali Govt. Mohila College, Bangladesh

Workauthorization

Green Card Holder
