EDUCATION

University of South Florida

Bachelor of Science in Computer Science

Relevant Courses: Data Structures & Algorithms, Database Design, Software Engineering, AI & Prompt Engineering

Tampa, FL

Aug 2019 – Dec 2023

EXPERIENCE

Software Support Engineer

Novanta Inc.

Jul 2024 – Present

Syracuse, NY

- Developed a Python based test-automation tool for embedded displays that converted 200+ manual command checks into JSON-based, one-click tests, reducing per-build regression time by 90%.
- Engineered a point-of-care demo application in Qt Creator integrating embedded displays, RFID readers, and machine vision cameras; showcased at tradeshow as a flagship proof-of-concept to demonstrate Novanta's integrated solutions and build customer confidence in real-world workflows.
- Designed failure-case tests to reproduce BMPload (firmware/macro uploader) defects and partnered with cross-functional development and QA teams to deliver next-release fixes, reducing pre-release defects and improving release reliability.

Research Assistant

University of South Florida

Jan 2024 – Jul 2024

Tampa, FL

- Created Python scripts using tello.py library to enable brain-controlled flight of a DJI Tello drone via a Unicorn EEG headset, executing takeoff, forward flight, and landing.
- Designed and implemented a PyQt-based UI for drone control, translating Figma prototypes into a functional interface to improve usability for non-technical users.

Digital Technology and Innovation (DTI) Intern

Amgen Inc.

Jun 2023 – Sep 2023

Tampa, FL

- Refactored and deployed Azure OpenAI-powered compliance chatbot, improving response latency by 30% and scaling usage across compliance teams.
- Automated compliance reporting with Tableau and SQL, cutting manual effort by 3+ hours per report and accelerating IT decision-making speed by 80%.

Software Developer Intern

Ceridian HCM Inc.

May 2022 – Dec 2022

St. Petersburg, FL

- Developed secure .NET Core REST APIs for the Dayforce platform, enhancing HR features for 100K+ users.
- Boosted automated test coverage to 85% by implementing 75+ SpecFlow integration tests and xUnit unit tests, catching defects earlier in the Software Development Life Cycle (SDLC).
- Contributed to Azure DevOps pipelines for CI/CD and supported test execution across development and staging.

TECHNICAL SKILLS

Languages: Python, C#, Java, C/C++, JavaScript, SQL, HTML/CSS

Backend & Databases: .NET Core, ASP.NET Web API/MVC, Entity Framework Core (EF Core), Node.js/Express, REST APIs, JWT, Swagger/OpenAPI, Microsoft SQL Server, MongoDB (Mongoose)

Frontend: React, Redux Toolkit, React Router, React Bootstrap

Testing: xUnit, NUnit, SpecFlow, Postman (API testing)

Cloud & DevOps: Azure, Azure DevOps (CI/CD), AWS (basic), Docker (basic), GitHub Actions (basic), Serilog

Tools: Git (version control), VS Code, Visual Studio, JIRA, Tableau, PyQt, Qt Creator, Figma

Methodologies: Object-Oriented Programming (OOP), Agile/Scrum, TDD, BDD

PROJECTS

Full-Stack E-Commerce Platform | MERN, Redux Toolkit, JWT

Jun 2025 – Present

- Delivered a full-stack e-commerce web app with Redux Toolkit and JWT in HTTP-only cookies; implemented cart, checkout, PayPal/card payments, and the order lifecycle (create, pay, deliver).
- Developed an Express API backed by MongoDB with Mongoose models, controllers, and routes; added product search, server-side pagination, reviews and ratings, and seed scripts.
- Created a responsive React and React Bootstrap UI with a top-products carousel, product pages, user profiles with order history, and admin dashboards; deploying to Render (API) & Vercel (web).
