Data Analyst

+1(315) 560-1650 | forum@itjobtech.com | Syracuse, NY (Open to relocate) | [LinkedIn](#)

SUMMARY

Data Analyst with **4 years of experience** in using statistical analysis, data mining, and data visualization, specializing in SQL, Azure Databricks, PySpark, SparkSQL, and Azure/ADLS. Migrated data writing operations by PySpark code for the data to directly be written to Databricks instead of SQL cutting down time of processing by 95%. Experience in revenue analytics, healthcare metrics (eQCMs, HEDIS), and big data extraction.

SKILLS

- Methodology:** SDLC, Agile, Waterfall

Language: SQL, Python, R

IDEs: Visual Studio Code, PyCharm

Packages: NumPy, Pandas, Matplotlib, Seaborn, Scipy, ggplot2

Cloud Technology: AWS, Azure, ADLS, Azure Databricks, Snowflake

Databases: Microsoft SQL, MySQL, Firebase, Oracle SQL, SparkSQL
- ETL & Other Tools:** Hadoop, SSIS, Talend, Apache NiFi, SAP, SAS, CRM, Salesforce, Google Analytics

Visualization Tools: Tableau, Power BI, MS Project, MS Access

Modeling Techniques: Classification Models, Moderating effects, Data Flow Diagrams (DFD), ER-Diagrams, Root Cause Analysis, Regression Analysis, Power Query, Correlation

EXPERIENCE

- Data Analyst, United Healthcare Group, USA** April 2024-Present

 - Orchestrated cross-functional collaboration through **agile** methodologies, fostering team interaction and sustained healthcare data pipelines and workflows using **PySpark** and **SparkSQL**, enhancing data reliability by 15%.
 - Performed comprehensive exploratory data analysis utilizing **SQL** uncovering substantial insights into the efficacy of **email marketing** on customer behavior, resulting in a 20% increase in email open rates.
 - Incorporated **MySQL** to manage and analyze **healthcare data**, ensuring data accuracy and integrity, which led to a 15% improvement in patient record retrieval efficiency.
 - Optimized **Power BI** performance by creating efficient data models and using **DAX** functions for complex calculations, resulting in a 25% reduction in report loading times.

- Revenue Analyst, Frontier Airlines, Denver, CO** July 2023 - March 2024

 - Directed the migration of data analysis processes to **Power BI** and **Zenz**, resulting in a 40% increase in data processing speed and delivering actionable insights to upper management for strategic decision-making.
 - Transitioned **45+** products and automated workflows, integrating **Azure Databricks** and **ADLS** to eliminate SQL server bottlenecks.
 - Merged raw data from **9** sources utilizing **advanced SQL**, streamlining the **ETL process** and improving processing time by 95%.
 - Leveraged Informatica for thorough **data validation** to eliminate duplicity, employed robust **data ingestion** practices, and reallocated seats, mitigating 20% revenue loss per flight and enhancing revenue by 8% per flight.
 - Designed advanced **SQL triggers** for **Booking Tracker**, capturing data at 15-minute intervals to generate insights on booking fluctuations and payment preferences, enhancing booking prediction accuracy by 22% and revenue optimization by 8%.
 - Adopted an Agile approach to collaborate **multi-departmental projects**, migrating and documenting **34+** deployed SQL processes to PySpark/Spark SQL in Databricks, and improved workflows with code snippet repositories, reducing redundancy.

- Data Analyst, Institute for Community Living (ICL), New York City, NY** July 2022 - May 2023

 - Accomplished Python libraries like **NumPy** and **Pandas** for **data cleansing**, pre-processing, and analysis, which improved the data quality and speed by 40% in healthcare data projects.
 - Managed **ETL operations** for big data extraction from 18 social service systems to advance mental health, EHR, and community program assessment and worked closely with the team optimizing data governance and saving **\$12,000** annually.
 - Created and maintained daily dashboards and reports to monitor program outcomes and key performance indicators (**KPIs**) using **Tableau**, resulting in program accountability and transparency sophistication by 40%.
 - Led **Scrum meetings** to communicate demographic and outcome data and produced **predictive models** to support program design and resource allocation, resulting in expanded funding possibilities and enhanced program results.
 - Instigated **SAS** analytics to automate routine database maintenance and ensure data consistency and integrity in population healthcare datasets across **4 SQL server systems** in enhancing decision-making by 30% in the organization.

- Business Data Analyst, BYJU's, Mumbai, India** August 2019 - July 2021

 - Implemented **SAP modules**, guaranteeing the interconnectivity of departments and fine-tuning the business processes by configuring the system according to organizational needs, increasing the effectiveness of operations by 25%.
 - Conducted market research to facilitate data analysis by utilizing **MySQL** and **Tableau** to present stakeholders with actionable information regarding 9% performance and growth potential for the learning app.
 - Applied **SDLC principles** to partner with cross-functional teams to deliver data-driven solutions that generated revenue and maximized company output by analyzing a data set of **1.3 million** entries.
 - Directed the integration and management of complex data feeds involving over 1.3 million data points, ensuring data validation, and scrubbing processes that increased data reliability for market trend analysis at BYJU's.
 - Executed ETL processes using tools such as **SSIS** and **Azure Databricks** to extract, transform, and load data into databases, providing technical solutions to business stakeholders and reducing time for data processing by 20%.

EDUCATION

- Masters in Information Systems, (Data Science & Analytics)** Syracuse University, Syracuse, New York August 2021-May 2023

Bachelor in Information Technology, Atharva College of Engineering, Mumbai University, Mumbai, India August 2017-May 2020

CERTIFICATION: Oracle Python for Machine Learning
