

Highly skilled and motivated Java developer with 5+ years of hands-on experience in designing, developing, and maintaining robust and scalable software solutions. Seeking a challenging role where I can leverage my expertise in Java programming, software architecture, and problem-solving to contribute to innovative projects and drive business success.

PROFILE SUMMARY

- Having around **5+** years of IT experience in application development and business intelligence analytics, with a focus on Object Oriented Programming, Analysis, Design, Documentation, Integration, Testing and Implementation of **Client-Server, Distributed Multi-tiered and large-Scale Enterprise** applications in **Waterfall** and **Agile** (Scrum) methodology.
- Expertise in developing model components using **ORM** technologies like MyBatis, hibernate (Caching, **Hibernate** Template, DAO) to write Database independent persistence logic and to maintain portable relationships between the databases.
- Good understanding of **Redux** concepts such as State Store, Action Creator, Reducer and Container.
- Strong experience in **Unix & Linux Shell scripting Bash, Perl scripting.**
- Expertise through all parts of web applications using **JAVA, J2EE, Web Services, SOA, SOAP, RESTful** etc.
- Experience in using **J2EE** Application Servers such as **Apache Tomcat, IBM Web sphere, WebLogic.**
- Hands on experiences with Core **Java** with **Multithreading, Concurrency, File Handling I/O, Generics, Data Structures and Collections, Garbage Collection.**
- Proven expertise creating **CI/CD pipelines** with Jenkins, Git, Docker, Bamboo, BitBucket, and Kubernetes. Capable of preserving coding standards and best practices while producing high-quality software.
- Experience in using the tools like **Ant** and **Maven** for build automation. Extensive experience in using version control tools like **SVN, Git.** Involved in writing **Java API** for **Amazon Lambda** to manage some of the **AWS** services.
- Experience in developing, deploying, and managing N-tier, server-centric enterprise applications using **Eclipse IDE 4.x, Java SE 8/11** (including JDBC 4.2, Lambda expressions, Streams, and Functional Interfaces), and **Java EE 7/8** web technologies such as **Servlets 3.1/4.0, JSP 2.3, JSTL 1.2, JSF 2.2/2.3, and JNDI.** Proficient in implementing enterprise-level components using **EJB 3.1/3.2 and JMS 2.0** for building scalable, distributed middleware solutions.
- Experienced in developing cloud-native **microservices** using **Spring Boot and Spring Batch**, with strong expertise across the Spring ecosystem including **Spring MVC, Spring REST, Spring Security, Spring Cloud** (Eureka, Ribbon, Netflix, Zuul), and core modules like IOC, AOP, JDBC, and JTA.
- Proficient in full-stack engineering, including familiarity with Java 1.8, Angular, JSP, and Hibernate frameworks. Skilled at creating **MVVM** design patterns for building scalable and maintainable applications, RESTful APIs, microservices, and cloud-ready applications using AWS services such as RDS, EKS, and IAM, including hands-on experience with MQTT for IoT based communication.
- Strong knowledge and hands-on experience of deploying applications using **Kubernetes**, cloud native application development, pivotal cloud foundry, **JavaScript**, Kendo UI, **Java/J2EE** technologies & **RDBMS**. Experienced with developing rich user interface applications using **HTML5, CSS3** and **JavaScript, jQuery, Angular, Node JS, React, Backbone JS, Twitter Bootstrap, jQuery Mobile, XML, JSON** that follows W3C Web Standards and are browser compatible.
- Experience in **RDBMS** such as **Oracle**, and **SQL Server** and writing stored procedures triggers, cursors, and optimizing queries using **SQL**. Extensive work experience in all phases of **Software Development Life Cycle** (SDLC) including Requirement Analysis, Design, Coding, Testing and Implementation, providing new solutions in **Agile** (Scrum), TDD Environment.
- Effectively managed state in Angular apps with **NgRx** to offer predictable and scalable solutions.
- Utilized **RxJS** to handle asynchronous data streams and create reactive, event-driven web applications.
- Developed and implemented **GraphQL APIs** to simplify data querying and increase application performance.

- Proficient in troubleshooting, debugging, developing test cases, and implementing unit testing with **Junit** and **Mockito** frameworks, **Log4J** for debugging assuring QA readiness for deliveries. Experienced in producing extensive design documentation and technical support materials.

PROFESSIONAL EXPERIENCE

W. R. Berkley Corporation, Connecticut, USA
Designation: Full Stack Developer

Apr 2024 to Present

Responsibilities:

- Developed scalable and high-performance web applications by leveraging **Java, Spring Boot, and modern front-end frameworks**, enhancing system efficiency and user experience.
- Involved in developing functions for **Amazon Lambda** to manage some of the **AWS** services.
- Design and develop database schemas and implement data access using **Hibernate** and **JPA**.
- Using Micro service architecture with **Spring Boot** services for interacting with **REST** and **Apache message broker**.
- Engineered **event-driven and serverless architectures** to improve application responsiveness and reduce infrastructure costs.
- Designing & development of entire validation service to perform data validations on the test cases built on the extracted, transformed, loaded data & working on **Linux** platform. Utilized **React** for its efficient data flow architecture to create a lightweight and render efficient web app that searched projects via the **GitHub API** through keywords.
- Good Command on **CQL** to run queries on the data present in **Cassandra Cluster**.
- Worked on Server-side **CSS** pre-processing platforms and **UI** kits, such as **LESS/SCSS, Node.js**, foundation and **Bootstrap**.
- Mainly involved in deployment activities **CI/CD** deployment and familiar with **OSE** (Open shift origin). Also made changes in **Jenkins** Files as per the requirement of the pipeline. Manage and fix bugs with **Jira** bug tracking application.
- Designed and extended Java web applications using **Service-Oriented Architecture** (SOA) principles, creating custom directives, decorators, and services to interface efficiently with both **RESTful** and SOA-based services for improved scalability and reusability.
- Developed **Spring Boot** applications using **Microservices** Architecture. Utilized the front-end technologies including **HTML, CSS, Bootstrap, Angular 6, JavaScript** to layout the front-end pages.
- Used **Angular6** to create a Single Page Application (SPA). Enhanced application performance by **Angular 6** Component based development in view of future **Angular framework** transitions.
- Implemented **Angular Router** to enable navigation from one view to the next as customer performs application tasks.
- Web application development using **Groovy Grails, jQuery, AJAX** and **angular**.
- Responsible for writing the Design Specifications for the generic and application specific web services in **Groovy Grails**.
- Converted a monolithic app to microservices architecture using **Spring Boot** using 12-factor app methodology. Deployed, Scaled, Configured, wrote manifest file for various Microservices in **PCF**.
- Implemented **REST Microservices** using spring boot. Generated Metrics with method level granularity and Persistence using **Spring AOP** and **Spring Actuator**. Implemented Zipkins for distributed **Micro Service** Monitoring. Integrated **Swagger** UI and wrote integration test along with **REST document**.
- Developed Automation Framework for Acceptance Testing using Cucumber **BDD** and **JUnit**.
- Developed **CSS** styles for web pages using **SCSS** structure and implemented routing for a **Single Page Application (SPA)** using **Angular 8.F**
- Worked on Lambda Expressions, Functional interfaces **Stream API's, Time API**, and Improvements on Collection, Concurrency, and IO improvements by using **Java 8**. Extensive experience in **Pivotal Cloud Foundry (PCF)**.
- Configured **JMS** server setup, DB connection setup & deployed Returned items in **Web Sphere Server**.
- Used **Docker** Container to address every application across the hybrid cloud and **Docker** for better collaboration and innovation. Developed/Maintained relational database hosted on **PostgreSQL**, accessed by **Java** programs.
- Built s3 buckets and managed policies for **s3 buckets** and used **s3 bucket** and sent data from oracle database to **s3 buckets** by integrating it in **Spring Batch**. Implemented **RESTful** web services which produces

both **XML** and **JSON** files to perform tasks, **RESTful** web service using **Jersey** for **JAX-RS** implementation, which leveraged both web & mobile applications.

Technologies Used: Angular, AWS, BDD, Bootstrap, Cassandra, CI/CD, CSS, Docker, Git, GitHub, Hibernate, Java, Java 8, Jenkins, Jira, JMS, JSON, JUnit, Lambda Expressions, Microservices, Node.js, PCF, PostgreSQL, React, RESTful, SOA, Spring, Spring Boot, SQL, Stream API, XML

Yale New Haven Health System, New Haven, Connecticut, USA

Mar 2023 to Mar 2024

Designation: Full Stack Developer

Responsibilities:

- Development web service using Windows Communication Foundation to receive and process **XML** files and deploy on Cloud Service on Microsoft **Azure**. Worked on Stash repository with Source tree similar to **Git**.
- Developed persistence Layer using **Hibernate** to persist the data and to manage the data. Strong development skills in designing and developing **Microservices** along with **Spring Boot** and Coherence cache implementation.
- Pleasant Experience in **React.js** for creating interactive UI's using **One-way data flow**, **Virtual DOM**, **JSX**, **React** Native concepts. Used Subversion for configuration Management and **Jira** for task management and bug tracking.
- Working on creating batch jobs using **Autosys** as the job scheduler and technologies like **SQL** invoker, UNIX shell scripting and core java. Used **Node.js** to run Grunt tasks and build properly the project (compile, minify, concat etc.) and Implement modules into to integrate with designs and requirements. Used **Grunts**, **BowerJS**, **Express** from **Node.js**.
- Setup the Continuous Integration (**CI**) & Continuous Development (**CD**) for the application using **Jenkins**.
- Implemented light weight **WADL** (Web application description Language) for better understanding of Rest based web services and its configuration. Developed the service layer, a layer that acts a bridge between the presentation layer and data access layer, with **Spring MVC** framework.
- Responsible and involved in complete software development lifecycle (**SDLC**) tasks like designing, coding, testing, and documentation using **Agile** Scrum Methodology for analysis and design of application.
- Experienced using **Java/J2EE Design Patterns** including **singleton**, **Factory**, **Model View Controller (MVC)**, **Data Access Object (DAO)**, and **Business Delegate** and well versed with Java 8 Lambda expressions along with Streams for creating internal iteration and performing chain operations such as Filter, Map and Core Java concepts like collections, multithreading, sterilization. Developed User Interface using the **HTML**, **Bootstrap**, **CSS**, **JavaScript**, and **AngularJS**.
- Managed business objects, resource management in the business logic tier using **Spring Framework**.
- Involved in performing Unit and Integration testing (**JUnit**). Strictly followed Test Driven Development (**TDD**). Approach environment using **Agile** methodologies. Involve in the discussions with customers, product owner, scrum master and scrum team members to finalize the implementation approach and story points needed.
- Implement **Java 8** Method References feature to point to methods by their names & implement functional Interfaces.
- Used **Java** Messaging Services (**JMS**) for reliable and asynchronous exchange of vital information such as payment status report. Developed **REST API's** using **Spring MVC** and **Spring Boot**, hosted all micro services on **PCF**.
- Excellent experience of using NPM code Packages and managing **HTML**, **CSS**, **JavaScript** projects.
- Triggered the automation jobs using **Jenkins** to get the cucumber **JSON** reports.
- Page design and development are done using **Oracle BPM**. Build **RESTful API** web services using **Node JS** and **Express JS** and used a full complement of Express, **Angular**, **Node.js**, and **MongoDB** to store and present assessments.

Technologies Used: Agile, Angular, AngularJS, Autosys, Azure, Bootstrap, core java, CSS, Git, Hibernate, HTML, Java, Java 8, JavaScript, Jenkins, Jira, JMS, JSON, JUnit, Microservices, Microsoft Azure, MongoDB, MVC, Node.js, Oracle, PCF, React, RESTful, Spring, Spring Boot, Spring MVC, SQL, XML

Responsibilities:

- Designed and created a trading application with smooth operation and user-friendly interfaces which enables employees and compliance officials to purchase and manage stocks.
- Through careful testing procedures, **95% code coverage** was attained, guaranteeing dependable and high-quality software delivery.
- Good knowledge on **Amazon Web Services (AWS)**, **Amazon Cloud Services** like **Elastic Compute Cloud (EC2)**, **Simple Storage Service(S3)**, **Amazon Simple DB**, **Amazon Cloud Watch**, **SNS**, **SQS**, and **LAMBDA**.
- Developed the persistence layer using **Hibernate**, implementing Data Access Objects (**DAO**) to manage database interactions efficiently.
- Experience working with **microservices-based** backends using **RESTful APIs**, **GraphQL**, and **gRPC**. Additionally, have hands-on experience with **relational databases** such as **Oracle 9i** and **MySQL**. Familiar with building lightweight backend services using **Express.js**.
- Established continuous integration (**CI**) practices and standards using **Jenkins**. Set up **Jenkins** server and build jobs to provide continuous automated builds based on polling the **Git** source control system during the day and periodic scheduled builds overnight to support development using **Jenkins**, **Git**, **JUnit**, **Selenium** and **Maven**.
- Implemented **Docker** containers to create images of the applications and dynamically provision slaves to **Jenkins CI/CD** pipelines. Modified existing Shell scripts in Unix to call daily sub routines. Used **React** as framework to create a Single Page Application (**SPA**) which can bind data to specific views and data with server.
- Used **NetBeans IDE** for development and debugging of **Spring Boot** and **Microservices** applications.
- Have experienced developing web applications using **Bootstrap**, Code Mirror, Brackets and **Ember.js**.
- Implemented **J2EE** components using **Spring MVC**, **Spring IOC**, **Spring Transactions**, and **Spring Security** modules.
- Managed efficiently multiple tracks such as business **JBoss** Rules Engine, UI, and Reporting and delivered quality product on schedule. Implemented Reacts Axioms Http Request to read data from web server and process **JSON** data to render in UI. Used **Docker** to containerize the Services and APIs to run on **AWS EC2** instances. Developed **REST API's** using **Spring MVC** and **Spring Boot**, hosted all micro services on **PCF**. Work on application using **Angular CLI** and Web-pack and took part in developing unit test cases using **Angular** test bed utilities and Jasmine.

Technologies Used: Angular, AWS, Bootstrap, CI/CD, Docker, EC2, Ember.js, Git, Hibernate, J2EE, Jenkins, JSON, JUnit, Microservices, MVC, MySQL, Oracle, Oracle 9i, PCF, React, RESTful, S3, Selenium, Spring, Spring Boot, Spring IOC, Spring MVC, Spring Security, SQL, Web Services

Responsibilities:

- Applied **Object-Oriented Programming** principles to develop scalable and maintainable Java applications.
- Helped to support the development and maintenance processes by contributing significantly to the documentation of all the applications' functional and technical features.
- Implemented and maintained **SOA (Service-Oriented Architecture)** solutions to improve system scalability, reuse, and interoperability in Java-based applications.
- Developed and placed into use automated email features utilizing protocols like **SMTP**, facilitating smooth notification and communication systems.
- Generated **Hibernate** Objects and used **Hibernate ORM** for **SOTI Publisher** application. Wrote many **shell scripts** in **Unix** to call routines. Used **Git** for Source Code Management.
- Worked on both **JBoss** application server to implement the web application. Integrated the application with **Spring** Framework for implementing dependency injection provide abstraction between presentation and persistence layer.

- Experienced in **React** and working with **React Flux** Architecture and experience in using **React** components, forms, events, keys, router, plus redux, Animations and flux concepts. Designed and coded application components in an **Agile** environment. Used SDK such as **Eclipse IDE**, **Toad**, and **SVN** etc. in this project.
- Used **JMS** (Java Mailing Service) **API** and **Kafka** to mail notifications upon the success or failure when the backend processes are completed and to send mail notifications regarding any system related problems.
- Optimized **SQL** queries for efficient data retrieval in **Jasper Reports**.
- Configured **Bamboo** to handle application deployment on Cloud (**PCF**) and to integrate with **GitHub** version control.
- Implemented a continuous delivery pipeline with **Docker** for custom application images in the cloud using **Jenkins**.
- Development of project using the **Spring** Framework with Thyme leaf Template Engine, Database being hosted on **MySQL**.
- Developed and maintained **Selenium-based automated testing** frameworks to ensure high-quality web applications through comprehensive functional and regression testing.
- Experience with **Java 8.0** features such as lambda expressions, Parallel operations on collections and for effective sorting mechanisms and new Date Time API. Involved in writing **JSP** using Bean, Logic, **HTML**, and Iterate Tags.
- Developed enterprise-level apps with a robust **backend architecture** that are scalable and secure by utilizing Apache frameworks and Spring Boot.
- Actively engaged in Scrum rituals to promote **Agile development methods**, such as **sprint planning**, daily stand-ups, and retrospectives.

Technologies Used: Agile, Bamboo, Docker, Eclipse, Git, GitHub, Hibernate, HTML, Java, Java 8, Jenkins, JMS, JSP, Kafka, MySQL, PCF, React, Spring, SQL, SVN

TECHNICAL SKILLS

Languages	Java, J2EE, Bash, C++, PL/SQL, Groovy, JavaScript, TypeScript
JAVA Technologies	Microservices 32w (Netflix stack), J2EE, Hibernate, Spring, Spring Boot, JSP, JSTL, Servlets, JDBC, JNDI, JMS, Maven
Web Technologies	HTML, XML, CSS, AJAX, JavaScript, jQuery, JSON, Angular, React, Bootstrap
Web Services	Web Services (SOAP and REST)
Database	Graph Database, Cassandra, Oracle (version -11g, 10g, 9i), My SQL, MongoDB, Cassandra, Redis
Frameworks & Libraries	Spring, Spring Boot, Hibernate, Spring MVC, Junit, Node.js, Vue.js
ORM	Hibernate, JPA
Version Control Tools	GIT, SVN, CVS
SQL Tools	TOAD, SQL Developer, MySQL Workbench
Other tools	Chef, Jenkins, Docker, Splunk, Nagios, SonarQube
IDEs	Eclipse, Visual Studio Code, IntelliJ, Spring Tool Suite
Cloud Technologies	AWS, Microsoft Azure, or Google Cloud Platform (GCP)
CI/CD pipelines	Jenkins, GitLab CI/CD
Devops & Tools	Jenkin, Maven
Software Development Concepts	Object-Oriented Design, Multi-threading, Distributed Architectures, Agile Workflows
Methodologies	Agile, Scum, SDLC, Waterfall, Kanban
Containerization / Orchestration	Docker, Kubernetes,
Soft Skills	Problem-Solving, Decision Making, Team Collaboration, Communication, Risk Management, Commitment, Curiosity, Leadership, Writing

EDUCATION

Master of Computer Science
University of New Haven, West Haven, CT, USA

Dec 2024
