

GOWRAVI RAMA

Data Analyst · SQL · Python · Power BI · Tableau · ETL & Analytics Engineering

+1 571-638-9956 | ramap2991@gmail.com | linkedin.com/in/rama-p-b454063b1 | Visa: OPT EAD

PROFESSIONAL SUMMARY

Detail-oriented Data Analyst with 3+ years of progressive experience designing end-to-end analytics solutions across SQL, Python, and leading BI platforms. Demonstrated ability to transform large-scale datasets (10M+ records) into actionable business intelligence that drives measurable outcomes—including 15% revenue growth, 40% reduction in manual reporting workload, and 25% decrease in data errors. Experienced across industries including fintech, technology consulting, and AI. Adept at building scalable ETL pipelines, interactive dashboards, forecasting models, and cross-functional stakeholder communication.

TECHNICAL SKILLS

BI & Visualization: Microsoft Power BI (DAX, Power Query, Data Modeling), Tableau, Advanced Excel (Power Pivot, VBA, Power Query)

Languages & Libraries: Python (Pandas, NumPy, scikit-learn, Matplotlib, Seaborn), SQL (MySQL, PostgreSQL, CTEs, Window Functions, Stored Procedures), HTML, R Studio, XML

Data Engineering: ETL Pipeline Design, Data Warehousing (AWS Redshift), Data Modeling, Data Validation & Quality Frameworks, Cloud Migration

Analytics: Exploratory Data Analysis (EDA), Statistical Modeling, A/B Testing, Forecasting (MAPE, Moving Averages, Regression), Cohort Analysis

ERP & Business Tools: SAP (O2C, P2P, Master Data), Microsoft 365 (SharePoint, Teams), CRM & Marketing Platform Integration

Soft Skills: Executive Presentations, Cross-Functional Collaboration, Agile/Sprint Planning, Process Documentation, Stakeholder Management

PROFESSIONAL EXPERIENCE

Data Analyst | DreamLine AI

Oct 2025 – Present

- Developed real-time Power BI dashboards to monitor KPIs across finance, marketing, and operations—replacing a 2-day manual report cycle with instant dashboard access.
- Authored optimized SQL queries to extract, transform, and analyze datasets exceeding 10M records, improving query execution time through indexing and query restructuring.
- Automated recurring business reports using Python (Pandas), reducing manual reporting workload by 40% and enabling the team to focus on higher-value analysis.
- Designed and executed A/B tests for marketing campaigns, implementing statistical significance testing that improved conversion rates by 12%.
- Built revenue and demand forecasting models supporting quarterly planning and budget allocation cycles.
- Developed ETL workflows to clean, validate, and load raw data into structured reporting tables, ensuring data integrity and consistency.
- Conducted cohort and customer segmentation analysis to enhance targeting strategies and identify churn risk.
- Supported migration of legacy reporting systems to cloud-based data warehouse infrastructure.
- Delivered executive-level analytical presentations translating complex findings into strategic business recommendations.

Data Analyst | Recognise Bank

Jul 2024 – Jan 2025

- Analyzed customer and sales datasets to identify revenue growth opportunities, directly contributing to a 15% increase in revenue through actionable insights delivered to the sales team.
- Built advanced Excel dashboards using Pivot Tables and Power Query, providing self-service reporting tools for non-technical business stakeholders.
- Designed and maintained SQL stored procedures and views to optimize recurring reporting workflows and reduce query execution overhead.

- Created automated weekly, monthly, and quarterly performance reports using Python and SQL, eliminating manual data compilation.
- Performed variance analysis to benchmark actual business performance against strategic targets, flagging deviations for leadership review.
- Supported database migration projects, ensuring data integrity and validation throughout the transition process.
- Collaborated with IT teams to diagnose and resolve data discrepancies, maintaining high standards of reporting accuracy.

Data Analyst | GlobalLogic (Hitachi Group)

Apr 2022 – Jun 2023

- Extracted and analyzed large-scale operational datasets using advanced SQL techniques including CTEs, window functions, and complex multi-table joins.
- Implemented data validation frameworks at the ETL layer, reducing downstream reporting errors by 25% and improving trust in analytics outputs.
- Built automated ETL workflows transforming raw operational data into structured, analytics-ready reporting tables.
- Developed interactive Power BI dashboards tracking departmental KPIs, improving visibility into operational performance across business units.
- Performed EDA to identify process inefficiencies and cost-saving opportunities, presenting findings to engineering and operations leadership.
- Automated recurring reports using Python scripts, saving 15+ hours per month in manual data processing.
- Collaborated with engineering teams to optimize database performance through indexing strategies and query refactoring.
- Assisted in migrating on-premises data infrastructure to AWS Redshift, improving scalability and query performance.

Business Data Analyst | Screatives, India

Jul 2021 – Mar 2022

- Analyzed customer behavior and sales performance data to generate strategic insights, supporting senior leadership decision-making on marketing and product investments.
- Built SQL-based data marts to support ad-hoc reporting and reduce dependency on centralized IT for routine analysis requests.
- Developed demand forecasting models using Python and Excel incorporating moving averages and regression techniques to support annual budgeting.
- Conducted A/B testing and statistical hypothesis testing to evaluate marketing campaign effectiveness and optimize spend allocation.
- Created Tableau dashboards tracking revenue, churn rate, and customer acquisition metrics for executive-level reporting.
- Integrated data from CRM, marketing platforms, and ERP systems into unified reporting datasets for comprehensive business analysis.
- Standardized data cleaning and transformation processes, improving data quality and reducing inconsistencies across reporting outputs.
- Participated in Agile sprint planning and data backlog prioritization to align analytics deliverables with business priorities.

EDUCATION

Master of Science, Data Analytics

May 2025

Catholic University of America, Washington D.C.
