SUMMARY

Data Analyst skilled in SQL, Excel, Python, Power BI, and Tableau. Experienced in data management, analysis, and visualization, ensuring data integrity and delivering actionable insights through collaboration, attention to detail, and clear communication.

EDUCATION

University of Texas at Arlington, Master of Science in Information Systems

Aug 2023 - May 2025

Coursework: *Python Programming, Data Warehousing and BI,
Data Mining, Cloud Computing*

WORK EXPERIENCE

Data Analyst- Wipro Limited, Mumbai, India

May 2022 – July 2023

- Developed and maintained interactive **Power BI dashboards** visualizing audit and risk management data, improving management's ability to identify control issues.
- Optimized **SQL** queries to extract and clean financial and operational data from multiple sources (**ERP**, **CRM**, and internal **audit** systems).
- Developed and managed scalable **data pipelines** on **Databricks**, integrating diverse data sources into a centralized **Data Lake** for advanced analytics.
- Leveraged **Generative AI** tools to automate data summarization and insight generation, reducing manual analysis time by **40%** and improving the clarity of **business intelligence** reports.
- Assisted in conducting **data extraction** and **transformation** for client audit engagements using **SQL** and **Excel**-based models.
- Automated recurring **Excel** reporting tasks using **VBA macros**, reducing manual effort by **30%** and improving data accuracy through scripted validations and error-handling.
- Collaborated with **cross-functional** teams to identify **data quality** issues and propose corrective measures.
- Contributed to **automation** scripts that reduced manual report preparation time by **20%**.
- Developed and optimized **DAX** measures and calculated columns in **Power BI** to enhance data modeling, improve reporting accuracy, and enable interactive business insights.
- Designed and developed interactive **Tableau** dashboards to visualize key business metrics, enabling data-driven decision-making and improving reporting efficiency across teams.
- Automated data workflows and built scalable **ETL pipelines** to streamline data integration, ensuring **high data quality**, accuracy, and integrity across multiple battery system datasets.
- Supported metric and **KPI** development for modular battery systems, tracking charge/discharge performance, system uptime, and manufacturing yield to **optimize efficiency** and reliability.

PROJECTS

- **AI LLM Data Structures and Contextualization Platform (Python, SQL, Streamlit, Tableau)**
Developed an **AI-powered** intelligence platform using fine-tuned **LLMs (Gemma)** with retrieval-augmented generation (**RAG**) for contextual document querying and automated insights.
Engineered scalable **backend pipelines** in **Python** integrating **APIs**, **SQL** databases, and **ETL workflows** to manage data retrieval, processing, and performance optimization.
Deployed an interactive **Streamlit** interface for real-time **Q&A** and built **Tableau** dashboards to monitor usage metrics, response accuracy, and system **KPIs**.
- **Predictive Analytics for Business Insights (Python, Tableau)**
Designed and implemented a **predictive model** using **Python** to forecast customer churn based on transactional data.
Used **Tableau dashboards** to visualize patterns in customer behavior and business **KPIs**.
Present results to an academic panel highlighting the business implications of **data-driven decision-making**.

TECHNICAL SKILLS

- **Programming:** Python (Pandas, NumPy, Matplotlib), R, DAX, Bash/Shell scripting
- **Databases:** SQL, MS SQL, MySQL, SQL Server, MS Azure Data Studio, Tabular, Talend
- **Data Analysis & Visualization:** Power BI, Tableau, Excel (Advanced), MS 365
- **Data Management:** Data cleaning, Data transformation, ETL Processes, Data Integration, Data Warehousing, Data Modeling, Data Validation, Data Management, Data Handling, A/B testing
- **Cloud Platforms:** AWS (S3, Glue, Lambda), Azure (Databricks, Data Lake), Snowflake
- **Tools & Technologies:** Alteryx, SAS, Git, VBA, Jupyter Notebook, Power Query, SharePoint, PowerApps

CERTIFICATES

- **Google Data Analytics Professional Certificate**
- **AWS Cloud Foundation**

Mar 2025

May 2024
