

EDUCATION

Computer Science, MSC (3.77)	08/2023 - 06/2025
University of Rhode Island(Rhode Island, USA)	
Bsc. in Computer Engineering (3.52)	08/2017 - 11/2021
University of Ghana(Accra,Ghana)	

SKILLS

BACK END DEVELOPMENT| Python. Flask. c#. PHP. laravel. Abp.io. Asp.net. Sql, EFCore.
FRONT END DEVELOPMENT| Html. Css. Angular. Bootstrap. Material UI. Figma
MACHINE LEARNING| Sklearn,Tensorflow, Keras,LLMs,Langchain.
MOBILE APP DEVELOPMENT| Flutter and Dart
SOFT SKILLS| Team player. Results oriented. Bias for action

EXPERIENCE

UNIVERSITY OF RHODE ISLAND C++,Git and Github, Python, Bash scripting , Machine learning	06/2023 -Present
Research Assistant Kingston, Rhode Island, USA.	
- Developed an AI-powered pedestrian routing app integrating LLMs, Flutter, and OSM to enhance sidewalk accessibility using real-time crowdsourced data. - Designed and implemented dynamic hazard avoidance, user rating validation, and conversational navigation via AI assistant - Implemented seamless email automation using ChatGPT and Zapier, empowering users to manage email tasks with plain text commands. - Automated Trello board and task management using ChatGPT and Zapier to streamline workflow and enhance productivity.	

CONFEEERA Angular, Laravel, Git and Github, Paypal payment integration	07/2023 - present
Web Developer Delaware, USA	
- Integrated PayPal payment API into the CONFEEERA web application, enabling secure transactions and increasing payment processing efficiency by 50%. - Implemented 10+ new features and resolved 10+ bugs in the application, improving functionality and reducing error rates by 30%. Confeera.com <i>is a startup based in Delaware that helps organizations to create websites for scientific conferences in a fast and easy way</i>	

PRICEWATERHOUSECOOPERS Asp.net, Angular, Sql, Git, Abp.io, Machine learning	10/2021 – 08/2023
Associate – Software Engineer Greater Accra, Ghana	
<u>International Financial Reporting Standard (IFRS9)</u> - Collaborated with cross-functional teams to design and implement an automated expected credit and loss system based on IFRS9, achieving a remarkable 70% reduction in calculation time and enabling better decision-making for credit risk management. - Translated complex IFRS9 model components, including Exposure at Default, Probability of Default, and Loss Given Default, from Excel-based formulas into C# code, reducing calculation time by 50% and improving model accuracy and integration efficiency. - Orchestrated user acceptance testing sessions with 10+ stakeholders, gathering feedback that led to 15 key enhancements and increased client satisfaction by 40%. - Led the development and successful integration of a machine learning model into the solution, moving the facility staging accuracy to 95%, that streamlined operations.	

<u>Enterprise Data Governance</u> - Engineered an advanced dashboard that displayed an enterprise’s data quality levels, incorporating metrics like data completeness, validity, and uniqueness, which improved data quality monitoring efficiency by 35% and reduced data-related errors by 25%. - Developed and implemented a SQL script to ensure data completeness, validity, and uniqueness, which enhanced data policy adherence by 40% and improved decision-making processes by providing more reliable data insights. - Optimized application performance by parallelizing the execution of SQL scripts, reducing processing time by 50% and improving overall system efficiency.	
--	--

<u>Mandatory Firm Rotation Tracker</u> - Built a web application that tracked PWC’s clients, eliminating excel-based work and enhancing team productivity by 90% - Architected an automated client rotation system, leveraging hangfire and sql to ensure 100% compliance with Ghana’s audit rotation law	
---	--

Projects altogether generated over 450k dollars in revenue increase and helped my department meets its financial goals and budget

BRANDTRADER Asp.net, Stripe payment	09/2022 – 12/2022
Web developer New Jersey (Remote position)	
- Developed the eCommerce API for Brantrader, collaborating with a team of 4 developers, which streamlined transaction processes and improved system response time by 30% (https://app.brandtrader.com). - Redesigned and optimized trader price matching feature, leading to an impressive 40% boost in trader engagement. - Integrated the Stripe payment and subscription API, enabling seamless payment processing and subscription management, which increased transaction success rates by 45% and enhanced user experience.	

ACHIEVEMENTS/AWARDS

- Best Demo Application, IEEE MDM 2025**

Awarded at the 26th International Conference on Mobile Data Management for a pedestrian navigation system that leverages AI and real-time crowdsourced hazard reporting for adaptive, accessible routing
- Dean Honor List, University of Ghana - 2018,2020
- Best Student, Basic Education Certification Examination - 2012
