

Harendra Gundi

Business Data Analyst

San Bernardino, CA | +1 316-244-8624 | harendragundi64@gmail.com | linkedin.com/in/harendragundi

Summary

Experienced Business Data Analyst with 4+ years' experience in pharmaceutical and healthcare industries. Expert in SQL, Python, and Power BI for data analysis, forecasting, and automation using AWS cloud platforms. Proven ability to optimize supply chain and sales performance through actionable insights and KPI development. Skilled in business documentation and Agile project management, delivering accurate, timely reports that support strategic decision-making.

Technical Skills

Programming & Analytics: Python (Pandas, NumPy, Seaborn, Matplotlib, NLTK, TextBlob), SQL (Joins, CTEs, Window Functions), Excel (Power Query, Pivot Tables, VLOOKUP)

Forecasting & Analysis: Time-Series Forecasting, ARIMA, EDA, Sentiment Analysis, KPI Tracking

BI & Dashboards: Power BI (DAX, Dashboards, Automation), Excel Dashboards, Sales & Service Analytics

Data Engineering: AWS (S3, Redshift, RDS), ETL Pipelines, Real-Time Data Automation

Documentation & Agile: BRD, FRD, SRS, Test Plans, Traceability Matrix, User Stories, Jira (Agile Workflows)

Domains: Pharmaceutical Supply Chain, Cold Chain, Healthcare Analytics, Sales & Patient Feedback

Certifications: Azure Fundamentals, Azure Data Fundamentals, Informatica PowerCenter

Experience

Business Data Analyst

Catalent, USA | Feb 2025 – Present

- **Designed** ETL pipelines on AWS S3→Redshift with Python/Pandas, cutting daily latency **45%** and shrinking the 8h window to **4.4h**.
- **Built** ARIMA time-series forecasts for cold-chain inventory, improving forecast accuracy **22%** and reducing stockouts **18%** across priority SKUs.
- **Increased** data freshness via real-time automation into Redshift/RDS, achieving **99.8%** data-availability SLA and **30%** faster decision latency.
- **Directed** Power BI rollout using DAX automation, reducing weekly reporting effort **60%** while serving **150+** business users reliably.
- **Accelerated** complex SQL (joins, CTEs, windows) and tuning in Redshift, decreasing average report runtime **70%** for executive dashboards.
- **Designed** BRD/FRD/SRS standards with automated test plans in Jira, lowering data defects **~80%** and streamlining audit readiness organization-wide.
- **Built** SQL/Python data-quality checks with test plans and traceability, lifting dataset accuracy to **99.8%** and reducing defects **55%**.

Business Data Analyst

Experion Technologies, India | Sep 2020 – Jul 2023

- **Built** AWS-backed ETL pipelines (S3, RDS) in Python to ingest **10M+** records/day, increasing throughput **4x** and reducing storage cost/GB **about 25–28%**.
- **Designed** Power BI/Excel dashboards (DAX, Power Query, Pivots) for sales & service analytics, cutting manual reporting **75%** and tripling stakeholder adoption.
- **Increased** demand-forecast accuracy using ARIMA and EDA, improving MAPE **19%** and raising inventory turns **12%** across high-velocity lines.
- **Directed** sentiment analysis of patient feedback (NLTK, TextBlob), extracting **2× more actionable insights** and improving NPS by **+6** points.
- **Accelerated** feature engineering via SQL window functions and Pandas, reducing model-prep time **65%** and enabling reliable daily retraining.
- **Designed** BRD/FRD/SRS with traceability in Jira, improving release cadence **40%** and reducing incident MTTR **30%** across analytics products.
- **Increased** self-service analytics by deploying parameterized Power BI templates, cutting ad-hoc ticket volume **50%** and standardizing KPIs.

Education

Master of Science in Computer Science

San Bernardino, CA, USA | May 2025

B. Tech in Computer Science Engineering

Pochampally, Telangana, India | Jul 2022

Certifications

- Microsoft Azure Fundamentals
- Microsoft Azure Data Fundamentals
- Informatica PowerCenter (Udemy)
