SUMMARY

I am a Computer Science graduate currently expanding my skills through Information and Communication Technology coursework to expand expertise in workstation setup, diagnostics, and network troubleshooting. I bring a unique blend of software engineering and IT systems background.

EDUCATION

California State University, East Bay – Hayward, CA
Bachelor of Science in Computer Science, May 2023

Diablo Valley College – Pleasant Hill, CA
Associate in Science in Computer Science, May 2021

TECHNICAL SKILLS

Programming: C++, Lua, Java, Python, C, SQL, JavaScript, HTML/CSS
Developer Tools: Git/GitHub, Visual Studio, Eclipse, Xcode, CLion
Core Competencies: Object-Oriented Programming, Debugging, Game Scripting
Libraries/Frameworks: Microsoft Foundational Classes (MFC), Swing (Java)

EXPERIENCE

Freelance AI Trainer

Scale AI / Outlier.ai – Remote | Jun 2024 – Present

- Evaluated AI-generated code outputs for correctness and logic.
- Provided structured technical feedback, strengthening debugging and analysis skills.
- Applied programming knowledge (Python, APIs) to evaluate software behaviors.

Informatics Intern

Genentech – Remote | May 2022 – Aug 2022

- Developed C++ tools to parse and convert bioinformatics data formats (XML/CSV to FASTQ).
- Used Linux, SSH, and Docker to replicate production environments.
- Created technical documentation to support knowledge transfer.

PROJECTS

Open-Source Contributor & Maintainer

No-Code Architects Toolkit | GitHub | May 2025 – Present

- Maintained a Python/Flask API replacing paid cloud services.
- Contributed to Docker-based deployments on Google Cloud and DigitalOcean.
- Collaborated to scalable open-source solutions supporting enterprise users.

Software Engineering Project Team Lead

CSU East Bay – Hayward, CA | Jan 2022 – May 2022

- Led a team in building a Java-based real-time chat system.
- Designed and implemented client-side features and shared libraries.
- Applied networking concepts (sockets, TCP/IP) and real-time communication handling.
- Managed GitHub repository, version control, and code reviews.

Minesweeper Game (C++ | Object-Oriented Programming Final Project)

Diablo Valley College – Pleasant Hill, CA | Fall 2020

- Designed, implemented a fully functional Minesweeper game using C++ and Microsoft Foundation Classes (MFC).
- Applied object-oriented design principles to structure gameplay logic, UI interactions, and state management.
- Exercised creativity and problem-solving by independently defining requirements and implementing all features.

CERTIFICATIONS (IN PROGRESS)

- CompTIA A+ and Cisco Certified Network Associate (CCNA)
