

EXPERIENCE SUMMARY

Creative and detail-oriented Mid-Level Software Engineer with a strong background in object-oriented programming (Java, C#, C++) and full software development lifecycle practices. Experienced in developing new features, fixing bugs, and enhancing existing applications in Agile environments with daily standups, sprint planning, and collaborative team workflows. Proven ability to deliver solutions that meet strict customer requirements in government and security-cleared environments. Adept at data-driven design, integrating components into functional systems, and applying modern software design patterns. Skilled in collaborative tools and version control systems to ensure smooth integration and delivery.

COMPETENCIES

- ❖ Object-Oriented Programming (Java, C#, C++)
- ❖ Agile Software Development (Scrum, Sprint Planning, Reviews)
- ❖ Data-Driven Design & Integration
- ❖ Full Stack Software Development
- ❖ Bug Fixing & Feature Implementation Based on Requirements
- ❖ Government & Security-Cleared Environments

SUMMARY OF SKILLS, TOOLS AND TECHNOLOGIES

Programming Languages:

Java (3 yr), C# (3 yr), JavaScript (3 yr), SQL (2 yr), Python (7 yr), C++ (2 yr), HTML (5 yr), CSS (5 yr), Kotlin (3 yr), Swift (3 yr), MATLAB (7 yr)

Frameworks:

Spring (2 yr), .NET (2 yr), Angular (2 yr), React (2 yr), Apache NiFi (1 yr), AWS SQS (1 yr), AWS S3 (1 yr)

Software:

Git/Github (3 yr), AWS (1 yr), Docker (1 yr), Postman (1 yr), Databricks (1 yr)

Operating Systems:

Linux (2 yr), Windows (10+ yr), Android (5 yr), IOS (3 yr)

PROFESSIONAL EXPERIENCE DETAILS

PVM Inc., Intermediate Software Engineer

03/2024 - 06/2025

Huntsville, AL

Contracts Supported:

Internal Projects - 02/2025 - 06/2025

- ❖ Contributed to the development of an in-house Palantir Foundry application for lead generation
- ❖ Provided surge support for two different additional contracts as needed

Federal Bureau of Investigation (FBI) - Intermediate Engineer 03/2024 - 02/2025

- ❖ Supported multiple large, actively used Palantir tools and environments
- ❖ Contributed to the development and updating of multiple in house tools in the Palantir ecosystem
- ❖ Regularly supported large scale live patching to a Palantir ecosystem
- ❖ Began data driven development of new tools for end users

Booz Allen Hamilton Inc., Senior Consultant

10/2022 - 03/2024

Huntsville, AL (Hybrid)

Contracts Supported:

Federal Bureau of Investigation (FBI) - ETL Engineer 03/2023 - Present

- ❖ Use Apache NiFi to maintain and develop ETL pipelines
- ❖ Successfully integrated Apache NiFi into an existing Databricks production environment
- ❖ Modify Java Jolt libraries to modify existing JSON transforms
- ❖ Collaborate with various FBI units to understand requirements, develop, and maintain data pipelines to ensure the quality of data processing provided
- ❖ Use and monitor AWS SQS and S3 services to prevent data processing interruptions
- ❖ Assist with the migration of several internal initiatives to more modern standards

Solution Studio Foundry - Full Stack Software Engineering, 10/2022 - 03/2023

- ❖ Designed and implemented 2 user facing and data parsing Angular components
- ❖ Verified and consolidated RESTful API connections for multiple Angular components

Major Accomplishments:

During my time in the BAH Software Residency, I contributed to several angular components that were modified for later use in the final product. I was also able to assist with multiple connection issues between the front and back end development teams.

Bernhard, Software Engineer

07/2022 - 10/2022

- ❖ Assisted in sunsetting a proprietary EAS (Energy as a Service) software and its user interface
- ❖ Contributed to the development of a more modern framework for proprietary EAS software

nLogic LLC, Software Engineer

03/2022 - 07/2022

- ❖ Collected, categorized, and analyzed large volumes of data related to GMD (Ground-Based Midcourse Defense)
- ❖ Contributed to modernizing legacy data processing software to satisfy evolving standards
- ❖ Ensured quality of collected data before and after processing

PERSONAL EXPERIENCE DETAILS

- ❖ Assisted in developing an IOS app for a newly created Telehealth product (2021)
 - Primarily developed in Swift, Android cross development via Kotlin
- ❖ Developed several ad-hoc programs in both Python and MATLAB related to pursuing an engineering degree (2017-2021)
- ❖ Developed several ad-hoc programs in both Java and C# related to pursuing a computer science degree (2022)
- ❖ Currently developing a small game in Godot with a small team, using the GDScript language (based on C++)
- ❖ Developed multiple personal website projects using HTML, CSS, React, and Angular (2019-Current)
