PROFESSIONAL SUMMARY

Data Analyst with 4 years of experience in data analytics, business intelligence, reporting, dashboard development, data modelling, and data-driven decision-making across Healthcare and Banking domains. Experienced in transforming complex business requirements into scalable analytical solutions using **SQL, Python, Tableau, Power BI, AWS, Excel, ETL**, and data visualization technologies. Proven expertise in data extraction, cleansing, transformation, KPI reporting, predictive analytics, statistical analysis, data warehousing, and business intelligence reporting. Skilled in collaborating with business stakeholders, product teams, and leadership to deliver actionable insights that improve operational efficiency, customer experience, and business performance.

TECHNICAL SKILLS

- **Programming & Query Languages:** SQL, Python, R, Advanced Excel, Shell Scripting
- **Data Analytics & Visualization:** Power BI, Tableau, Microsoft Excel, DAX, Power Query, KPI Reporting, Dashboard Development, Statistical Analysis
- **Databases:** MySQL, PostgreSQL, SQL Server, Oracle, Snowflake
- **Cloud Technologies:** AWS, Amazon S3, AWS Glue, AWS Lambda, Amazon Redshift, EC2
- **ETL & Data Integration:** ETL Development, Data Migration, Data Transformation, Data Validation, Data Cleansing, Data Quality Analysis
- **Data Warehousing:** Star Schema, Snowflake Schema, Fact & Dimension Modeling, Data Mart Development
- **Analytics & Reporting:** Business Intelligence, Data Mining, Predictive Analytics, Trend Analysis, Root Cause Analysis, Ad Hoc Reporting
- **Tools & Platforms:** Git, JIRA, Confluence, Microsoft Office Suite, Agile Scrum

PROFESSIONAL EXPERIENCE

Data Analyst | Perplexity AI, California | October 2024 – Present

Project: Healthcare Analytics and Population Health Intelligence Platform

- Developed enterprise-level healthcare analytics solutions using **SQL, Python, Power BI**, and **AWS** to analyse patient, provider, and operational datasets.
- Designed and maintained interactive **Power BI** dashboards for healthcare executives, enabling real-time visibility into patient outcomes and operational KPIs.
- Built advanced SQL queries and stored procedures to extract and transform healthcare data from multiple sources.
- Performed data profiling, cleansing, and validation activities to improve overall healthcare data quality and reporting accuracy.
- Utilized **Python** libraries including Pandas and NumPy for large-scale data analysis and automation of recurring reporting processes.
- Created predictive models to identify patient risk factors and improve healthcare resource planning.
- Automated ETL workflows using **AWS Glue**, reducing manual data processing efforts significantly.
- Integrated structured and semi-structured healthcare datasets into centralized reporting repositories using **AWS S3** and **Redshift**.

- Conducted root cause analysis on healthcare performance metrics and provided actionable recommendations to business stakeholders.
- Developed KPI scorecards to monitor patient satisfaction, treatment effectiveness, and operational efficiency.
- Collaborated with business analysts, data engineers, and leadership teams to gather reporting requirements and deliver analytical solutions.
- Implemented data governance and validation frameworks to maintain HIPAA-compliant reporting standards.
- Built self-service analytics dashboards enabling business users to perform independent analysis.
- Supported executive decision-making through advanced trend analysis and performance forecasting.
- Participated in Agile ceremonies including sprint planning, backlog refinement, and stakeholder review meetings.

Environment: SQL, Python, Power BI, Tableau, AWS, Amazon S3, AWS Glue, Amazon Redshift, Excel, ETL, Data Warehousing, Agile, JIRA, Git

Data Analyst | (CTS), Hyderabad, India | June 2021 – December 2023

Project: Banking Customer Intelligence and Risk Analytics Platform

- Developed comprehensive banking analytics solutions using **SQL**, **Python**, **Tableau**, and **Power BI** to support strategic business initiatives.
- Created complex SQL queries for customer segmentation, transaction analysis, fraud monitoring, and risk assessment.
- Built interactive **Tableau** dashboards to provide executives with visibility into customer behaviour and portfolio performance.
- Analysed large-scale banking datasets to identify trends, anomalies, and growth opportunities.
- Automated recurring reporting processes using **Python**, reducing report generation time and improving efficiency.
- Developed ETL processes for integrating customer, transaction, and operational data from multiple banking systems.
- Performed data cleansing, standardization, and transformation to ensure data integrity across reporting environments.
- Conducted customer churn analysis and generated actionable insights that improved customer retention strategies.
- Created performance monitoring dashboards tracking revenue, profitability, risk exposure, and operational KPIs.
- Worked closely with business stakeholders to translate requirements into analytical and reporting solutions.
- Assisted in building data warehouse structures including fact and dimension tables for enterprise reporting.
- Utilized statistical analysis techniques to identify patterns in customer behavior and transaction activity.
- Supported risk management teams through analytical reporting and predictive risk assessments.
- Participated in UAT testing and validation of reporting solutions before production deployment.
- Maintained documentation for business requirements, data mappings, ETL processes, and reporting standards.

Environment: SQL, Python, Tableau, Power BI, AWS, Excel, ETL, Data Warehousing, Oracle, SQL Server, JIRA, Agile Scrum, Git

EDUCATION

Master of Science | University of Central Oklahoma | 2024 – 2025

Bachelor of Technology | Gudlavalleru Engineering College | 2018 – 2022

CERTIFICATIONS

- AWS Certified Cloud Practitioner (or Pursuing)
- Microsoft Power BI Data Analyst Associate (PL-300) (or Pursuing)
- Tableau Desktop Specialist
- Google Data Analytics Professional Certificate
- SQL for Data Analytics Certification
