Experience:

Data Analyst II, Spectrum Reach, New York, New York – 9/2023 - 4/2024

- Utilized Snowflake Database and SQL to transform, explore, and analyze billions of rows of data.
- Executed Python machine learning capabilities using Snowflake connector for VS and Jupyter notebook.
- Created insightful dashboards, visuals, and reports in Tableau, Power BI, and Excel.
- Provided key statistical insights for ad campaign effectiveness such as ROIs and ad impressions/reach.
- Collaborated on reporting and deliverables for cross-functional teams, ensuring accurate and timely departmental reporting.
- Optimized SQL scripts for team members, enhancing product research and development initiatives.
- Created ERDs in DBeaver to visualize table object relationships.

Tech Stack: Python, SQL, Snowflake Database, DBeaver, Tableau, PowerBI, Microsoft Office, Visual Studio, Github

Data Engineer, IConnections, New York, New York – 2/2023 - 8/2023

- Designed and deployed ELT pipelines unifying data for analysis and reporting on Retool dashboard.
- Leveraged Dell Boomi for ingestion workflow orchestration.
- Loaded data into Azure SQL Database and managed in Microsoft SQL Server.
- Sources from HubSpot CRM APIs, Pendo User Tracker APIs, and Python Custom APIs.
- Visualized and Reported on Retool dynamic dashboard coded with JavaScript.
- Enhanced db security, memory optimization, and availability for cost-effective, high-availability solution.
- Fostered cross-team collaboration to optimize data processes for end user efficiency.

Tech Stack: Dell Boomi, Azure SQL Database, Microsoft SQL Server Management System, Python, SQL, JavaScript, Retool, Microsoft Office, Visual Studio, Github

Data Engineer, Fraunce's Tavern, New York, New York – 8/2018 - 10/2022

- Leveraged IBM Cloud Services to design and develop ELT pipeline.
- Used IBM Watson for analysis and machine learning.
- Centralized data stored in IBM DB2.
- Developed dynamic dashboards using IBM Cognos.
- Extracted data from on-premise servers, 3rd party APIs, and custom Python API.
- IBM Console for monitoring and data managements services.
- Implemented database optimization, security, and performance measures for low cost and high availability.

Tech Stack: IBM Cloud Services, IBM Watson, IBM DB2, IBM Cognos, Salesforce API, Python, SQL, Microsoft Office, Visual Studio, Github

Education:

University of Arizona, Tucson, Arizona – B.A. Philosophy

University of Arizona, Tucson, Arizona - B.S. Computer Science

Certifications:

Microsoft Azure Data Engineering Associate (DP-203) Certification - 2024

Microsoft Azure Data Fundamentals (DP-900) Certification - 2024

IBM Data Engineering Fundamentals Professional Certification - 2023
