SUMMARY

Data Engineer with hands-on experience in designing and optimizing ETL pipelines, improving data processing efficiency, and enhancing data quality. Proficient in Python, SQL, and R, with expertise in cloud platforms like AWS and Google Cloud Platform (GCP Certified Data Engineer). Skilled in database management across MySQL, PostgreSQL, MongoDB, and big data tools including Spark SQL, PySpark, and Hadoop. Proven success in streamlining data workflows, reducing processing times, and building interactive dashboards with Tableau for real-time insights. Adept at implementing data validation techniques to improve accuracy and scalability of datasets.

EDUCATION

Northeastern University, Boston, MA

Master of Science in Data Science

Sep 2021 - May 2023

CGPA: 3.62

TECHNICAL SKILLS

Programming Languages	Python, SQL, R
Databases	MySQL, PostgreSQL, Oracle, Spark SQL, MongoDB, Big Query, AWS RDS
Cloud	AWS, Google Cloud Platform (GCP Certified Data Engineer), Snowflake, DOMO(Certified Specialist)
Machine Learning	Predictive Analytics, Classification Analysis, NLP, Data cleaning and validation, Evaluation Metrics
Software/Frameworks	Tableau, Power BI, PySpark, Hadoop, Airflow, Git, Kafka, Hive, Athena, Glue, Data Proc, Data Flow, Cloud Functions, Pubsub, Looker, Data Studio, Vertex AI, Big Query, Pinecone, Langchain, Langsmith

WORK EXPERIENCE

Backend Developer | LangChain, Llamaindex, Python, RestFul API, OpenAI, Google Gemini, Pinecone
4Sight AI

Aug 2023 – Present
Remote, USA

- Optimized API requests with caching and asynchronous processing, reducing execution time by **15%** & redundant requests by **40%**
- Built **RESTful APIs** to integrate LLMs (GPT, Claude) into enterprise applications, enhancing data flow and response accuracy
- Managed MongoDB instances, improving retrieval speed by **30%** through indexing and performance optimization
- Designed and maintained **ETL** pipelines with schema validation for seamless data processing and reducing processing time by **25%**

Data Engineer | Python, SQL, GCP (Big Query, Cloud Functions, GKE, DataFlow), Tableau, Domo
Randstad Sourceright

May 2022 – Dec 2022
Atlanta, GA

- Revamped and optimized an existing **ETL** pipeline in Python, improving data ingestion and preprocessing time by over **20%**
- Optimized data retrieval and **integrated API-based services** into **GCP**, enhancing real-time analytics and knowledge discovery
- Collaborated with business analysts to develop interactive Tableau dashboards, showcasing key performance indicators (KPIs).

Data Analyst | AWS Kinesis, AWS Glue, Python (Pandas, NumPy), SQL, Tableau, Jupyter Notebook, Excel
Northeastern University

Sep 2021 – Apr 2022
Boston, MA

- Processed and analyzed streaming data of **90K** records/day using **AWS Kinesis, Glue** for real-time dashboards, uncovering trends.
- Improved data quality by **15%** through effective cleaning techniques and validation processes ensuring accuracy and reliability.
- Created visualizations using **Python** and **Tableau** to present insights, supporting data-driven decision-making among stakeholders

Data Analyst | Google Analytics, SQL, AWS (Redshift, S3, RDS, Lambda, Step Functions), Tableau
Coral Reefs

May 2020 – Jul 2021
Hyderabad, India

- Implemented **Google Analytics** tags across websites to track user behavior, improving conversion tracking and marketing strategies
- Collected, transformed, and validated **100K+ Rows** with **SQL** from distributors, loading it into **Amazon Redshift** from **S3 & AWS RDS** using **lambda functions & step functions** based on **cloud watch** and **event bridge**
- Built **Tableau** dashboards on **RedShift** to track marketing KPIs like **CVR, CTR, CPC, CPA** etc improving efficiency by **25%**

ACADEMIC PROJECTS

Gym Attendance Data Processing Analytics | Python, MySQL, Tableau, AWS(Lambda, RDS, Cloud Watch)
2023

Jun 2023 — Sep

- Streamlined gym operations by developing a cron-triggered **Python AWS Lambda function** for automated data extraction and processing, integrated with **AWS RDS** for efficient data storage and analysis to support capacity planning and improve overall efficiency.

Fraud Detection System with Snowflake Marketplace Integration | Python, Snowflake

Apr 2022 — Sep 2022

- Improved fraud detection capabilities through **Snowpark API** for Python-Snowflake integration and IP Geolocation in **Snowflake**, resulting in significant gains in data processing efficiency and strengthened privacy compliance
