SUMMARY

Jamel Jolivet is a data-driven professional with a strong foundation in analytics, visual storytelling, and insight generation. With a background in education and a passion for transforming raw data into clear, actionable visuals, I leverage critical thinking and problem-solving skills to support smarter decision-making. My expertise lies in building dashboards, charts, and reports that simplify complexity and drive organizational clarity. I'm continuously learning and applying new tools like Excel, SQL, Tableau, and Power BI to make data more accessible, engaging, and impactful.

TECHNICAL AND ANALYTICAL SKILLS

- Compliance Management • Analytical Thinking • Communication Skills • Project Management • Continuous Learning • Problem-Solving • Risk Assessment • Security Consultation • Policy Development • Attention to Detail
