

Jayanth Damera

Data Scientist

Frisco, TX | 518-898-1018 | jayanth.d@mymailwork.com | [LinkedIn](#)

SUMMARY

- Data Scientist with 4+ years of comprehensive experience in Data Extraction, Data Modeling, Data Wrangling, Statistical Modeling, Data Mining, Machine Learning, and Data Visualization.
- Proficient in SDLC, Agile, and Waterfall methodologies, ensuring efficient project execution and delivery in diverse environments.
- Expertise in Statistical Modeling and Machine Learning techniques, including Linear Regression, Logistic Regression, Decision Trees, Random Forest, SVM, K-Nearest Neighbors, Bayesian Methods, XGBoost, NLP, and Neural Networks for Forecasting and Predictive Analytics.
- Skilled in popular data science packages such as NumPy, Pandas, and SciPy, enabling efficient data manipulation, analysis, and visualization.
- Experienced in using Tableau, Power BI, and MS Excel to create insightful and compelling visualizations that effectively communicate findings.
- Strong experience with AWS cloud services, including EC2, S3, and EMR, for provisioning virtual clusters and managing large-scale data processing.
- Proficient in importing and exporting data using relational databases like Oracle, MySQL, SQL Server, and NoSQL databases like MongoDB.
- Proven track record in data cleaning, exploratory data analysis (EDA), and predictive analytics, delivering actionable insights that drive business outcomes.

SKILLS

Language: Python, R, SQL, SAS

IDEs: Visual Studio Code, PyCharm, Jupiter Notebook

Statistical Methods: Hypothetical Testing, ANOVA, Time Series

Machine Learning: Regression analysis, Bayesian Method, Decision Tree, Random Forests, Support Vector Machine, Neural Network, Sentiment Analysis, K-Means Clustering, KNN, Classification, SVM, Naive Bayes, Natural Language Processing (NLP), LLM, CNN, XGBoost

Packages: NumPy, Pandas, Matplotlib, SciPy, ggplot2, Scikit-Learn, PyTorch, TensorFlow, Keras, Spark

Visualization Tools: Tableau, Power BI, Microsoft Excel

Cloud Technologies: AWS, GCP, Azure

Database: MySQL, SQL Server, Oracle, MongoDB

Methodologies: SDLC, Agile, Waterfall

Software/Other Skills: Jira, Data Cleaning, Data Wrangling, Critical Thinking, Communication Skills, Presentation Skills, Problem-solving, Decision-Making, EDA, Databricks, Data Visualization, Predictive Analytics, Pattern Recognition, JMP, Data Integrity, Quantitative Data, Data Science, Statistics, Statistical Analysis, Data Analytics, Data Modeling, Big Query, Snowflake

Operating System: Windows, Linux

WORK EXPERIENCE

Global Payments, USA | Data Scientist

Jul 2023 - Current

- Applied advanced analytics techniques to analyze large datasets, resulting in a 20% improvement in predictive model accuracy.
- Conducted hypothesis testing and time series analysis on sales data, improving forecasting accuracy by 30%.
- Led the development of a machine learning model using XGBoost Regressor to accurately forecast healthcare expenses, optimizing profitability for the insurance firm.
- Generated comprehensive capacity planning reports using Python libraries (NumPy, Pandas, Matplotlib, SciPy, Scikit-learn, Seaborn, TensorFlow, ggplot2), to visualize data and support strategic decision-making.
- Designed and published visually rich and intuitively interactive Tableau workbooks and dashboards for executive decision-making.
- Designed and implemented recommender systems that utilized collaborative filtering techniques to recommend courses for different customers and deployed them to the AWS EMR cluster.
- Collaborated with database administrators to optimize MySQL database performance, tuning query execution plans.
- Implemented supervised and unsupervised learning algorithms, including LLM (Latent Dirichlet Allocation), to uncover patterns in large datasets.
- Employed Python, R, and SQL to develop sophisticated statistical algorithms, including linear and logistic regression, random forests, decision trees, and support vector machines, to assess welfare dependency risks.

iView Labs Pvt. Ltd., India | Data Scientist

Jan 2019 - Dec 2021

- Led the development of comprehensive campaign waterfall reports, enabling data-driven decision-making and optimization of marketing strategies.
- Developed and deployed predictive models specializing in natural language processing and other key domains, enhancing decision-making capabilities.
- Built and optimized data models using Python, including Logistic Regression, KNN, Random Forests, and improving predictive accuracy.
- Communicated data-driven insights to executive teams, leading to a 20% increase in data-informed decision-making and strategic planning.
- Utilized Python's data science packages, such as Pandas, NumPy, Matplotlib, Seaborn, SciPy, Scikit-learn, and NLTK, to enhance data analysis and visualization capabilities.
- Applied critical thinking and problem-solving to tackle complex business challenges, delivering innovative data science solutions that addressed key issues.
- Utilized natural language processing (NLP) techniques to Optimize Customer Satisfaction.
- Integrated Power BI with Microsoft Excel and other data sources to create reports that update automatically with new data.
- Deployed and managed cloud-based infrastructure on Amazon Web Services (AWS), including EC2 instances, S3 buckets, RDS databases, and Lambda functions, ensuring high availability and scalability of applications.
- Created and optimized SQL Server stored procedures and complex views using joins, significantly improving data retrieval efficiency.

EDUCATION

Master's in Computer Science | State University of New York at Albany, Albany, NY

Bachelor's in Information Technology | Maturi Venkata Subba Rao Engineering College, India

CERTIFICATION

Microsoft Certified Azure Data Engineer Associate Certification.

Microsoft Certified: Azure Data Scientist Associate.
