

Jeremy Simhon

201-647-1985 | jeremy.simhon@gmail.com | 619 Wyndham Rd Teaneck, NJ

EDUCATION | Rutgers University | The Honors College of Rutgers Cumulative GPA: 3.6 / 4.0 **New Brunswick, NJ**

Bachelor of Science in Business Analytics Information Technology (BAIT)

Sep 2021 – May 2025

- **Honors:** Dean's List (Spring 2022, Fall 2022, Fall 2023, Spring 2024, Fall 2024)
- **Relevant Coursework:** Business Programming, Statistical Methods for Business, Operations Management, Business Decision Analytics under Uncertainty, Management Information Systems, Time-Series Modeling, Relational Database & Web Applications, Business Data Management, Data Mining, A.I in Marketing, Computer Applications for Business

PROFESSIONAL EXPERIENCE

Rutgers | School of Graduate Studies | Extern | MBS Externship Exchange Program

May 2024 – August 2024

- Expanded expertise in data science and analytics, applying statistical methods, machine learning techniques, clustering, dimensionality reduction, and regression models to analyze retail purchasing behavior and optimize sales strategies.
- Strengthened leadership/collaboration skills, working with cross-functional teams to aid data-driven decision-making
- Refined communication and presentation abilities, translating complex analytics into compelling visual narratives
- Conducted in-depth exploratory data analysis utilizing Python (Pandas, NumPy) and visualization tools to uncover trends

Upright Education | Student Data Analyst | June 2024 Cohort

June 2024 – October 2024

- Performed data cleaning, preparation, and analysis using Python, SQL, Excel, and Tableau, transforming raw data into insights to identify trends, forecast outcomes, and drive data-driven recommendations to optimize business strategies.
- Deploying predictive models and visualizations, leveraging statistical methods, clustering, and time-series forecasting
- Designed interactive dashboards, transforming complex data into clear, actionable insights for various stakeholders.
- Enhanced problem-solving, statistical modeling, and communication skills, applying predictive analytics, machine learning, and data-driven frameworks to translate complex findings into actionable recommendations.

QuickChek | Cashier

June 2022 – October 2024

- Assisted customers with purchases, processed payments, and ensured compliance with company policies.
- Managed store operations/staff, overseeing inventory, refunds, lottery, tobacco sales, deliveries, and training new hires.

SPECIAL PROJECTS

Retail Analytics and Consumer Behavior Insights for Phillies Ballpark | MBS Externship

May 2024 – August 2024

- Conducted in-depth analysis of purchasing patterns across eight retail locations in the Phillies ballpark, identifying trends in buyer behavior between game days and non-game days as well as comparing between different days of the week.
- Examined metrics such as buyer-to-attendance ratios and City Connect merchandise performance utilizing Python to analyze ticket sales & City Connect transaction ids, producing actionable insights that enhanced sales strategies.
- Earned the Best Lightning Talk Presentation award for the best overall project handoff for stellar data analysis/insights

Customer Segmentation Analysis | Student Data Analyst, June 2024 Cohort

June 2024 – October 2024

- Utilized k-means clustering and validating through silhouette scores, I identified distinct customer groups based on behavioral and demographic data such as age, gender, income, marital status, location, family size and spending score
- Created detailed customer profiles and visualizations in Tableau, validating the model with silhouette scores and recommending targeted marketing strategies to optimize customer engagement and conversions.
- Performed data cleaning, aggregation, and exploratory analysis, uncovering key trends in certain variables to enhance segmentation accuracy and support decision-making, optimize marketing, and enhance business performance.

Projects for: Relational Database & Web Applications | Rutgers Business School

September 2024 – December 2024

- Built a responsive personal website using HTML, CSS, and JavaScript, optimizing user experience with structured navigation while leading database architecture with Node.js, MySQL, and JWT authentication for security & scalability.
- Designed and developed a secure financial tracking platform with a dynamic dashboard to visualize income, expenses, and total balance, implementing CRUD functionality, JWT authentication for security, and a responsive UI to enhance user experience, streamline financial management, and ensure data accuracy and integrity across multiple devices.

Graduate Study (Information Technology) | Rutgers Honors College Capstone Project

September 2024 – May 2025

- Implemented reinforcement learning models, such as Multi-Armed Bandits, Markov Decision Processes (MDPs), and Temporal Difference Learning, to develop data-driven strategies for sequential decision-making under uncertainty.
- Applied advanced data mining techniques, including clustering, classification, anomaly detection, and association rule mining, to uncover patterns, optimize decision-making, and generate actionable insights for business applications.

CAMPUS INVOLVEMENT & SKILLS/INTERESTS

Clubs: Astronomical Society, Programming Association, RAMS, Data Science Club, Actuarial Club, BITS

Tech: Excel, Tableau/ Power BI, Python, SQL, R, HTML, CSS, JavaScript, Power BI, Data Warehousing & ETL, A.I

Soft: adaptability, collaboration, innovation, enthusiasm, critical thinking, decisiveness, detail-oriented, thorough, passionate

Analytical Skills: predictive analytics/modeling/forecasting, exploratory data analysis, data storytelling/decision-making

Certifications & Training: Data Analytics Certificate | Rutgers University Camden

Interests: swimming, weightlifting, basketball, volleyball, cars, philosophy, astronomy, Nintendo, chess, fashion, surfing
