DATA ANALYTICS AND VISUALIZATION PROJECTS

Car Sales & Profit Dashboard

Excel, IBM Cognos

- Created Excel-based reports visualizing KPIs such as total profit and quantity sold, then developed interactive dashboards using IBM Cognos Analytics.
- Incorporated key metrics including average quantity sold, customer sentiment, and recall data; exported dashboards for stakeholder review.
- Applied best practices in dashboard design and data storytelling; peer-reviewed submissions using a structured rubric to evaluate clarity and insight quality.

Fleet Inventory Data Cleaning Project

Excel

- Cleaned and prepared a raw CSV file containing vehicle fleet inventory data using Microsoft Excel for accurate analysis and reporting.
- Performed data cleaning tasks including removing duplicates and blanks, correcting spelling errors, eliminating whitespace, and formatting columns for clarity.
- Streamlined the dataset by removing irrelevant fields and standardizing structure to ensure consistency across records.

Stock Performance & Revenue Dashboard

Python, Plotly

- Extracted and cleaned stock price and revenue data for Tesla, GameStop, Amazon, and AMD using yfinance API and web scraping tools in Python.
- Built interactive dashboards in Plotly to visualize trends between stock performance and quarterly revenue, enabling data-driven investment insights.
- Strengthened proficiency in data extraction, API usage, web scraping, and visual storytelling with real-world financial data.
