

Jose Bonilla

255 New Star Drive, Salt Lake City UT | 248-759-3845 | jbon44@outlook.com | Web Portfolio: <https://jbon-44.github.io>

Objective

- I am seeking to contribute my analytical and technical skills to design and develop reliable and efficient software solutions within a challenging software engineering environment.

Education

UNIVERSITY OF UTAH

Master of Software Development, December 2025

MADONNA UNIVERSITY

BS in Mathematics, May 2019

Technical Skills

TECHNICAL SKILLS

- **Languages:** C++, Java, JavaScript, Python, SQL, PHP
- **Frontend:** HTML5, CSS, React, Redux
- **Backend:** Slim (PHP framework), Node.js, REST API
- **Databases:** MySQL, PostgreSQL
- **DevOps tools:** Git, Github
- **Cloud Platforms:** Microsoft Azure

OTHER TOOLS

- Microsoft Excel, Word, PowerPoint

ADDITIONAL SKILLS

- Strong analytical and problem-solving abilities
- Attention to detail and effective communication

Relevant Experience

SOFTWARE ENGINEER INTERN → QA LEAD

TREEVAH | JULY 2025 – DEC 2025

- Built reusable UI components using **React + Redux**, including toast notifications for file and folder actions like create, copy, cut, paste, delete, and rename. Improved interface consistency and accessibility across the app.
- Implemented dynamic breadcrumb navigation using **React + Redux** to enable smooth deep-folder navigation and automatic column scrolling. Enhanced overall user experience and navigation reliability.
- Refactored JavaScript and CSS files for better organization, readability, and maintainability.
- Fixed major bugs involving time zone mismatches, sorting inconsistencies, and subfolder panel behavior, improving system stability and performance.

- Promoted to QA Lead; responsible for creating and assigned GitHub issues, reviewing pull requests, and coordinated QA end to end testing.
- Created new UI, and database using PostgreSQL hosted by azure for our new beta file life cycle release.
- Configured Azure environments and GitHub Actions CI/CD pipelines (PostgreSQL, Blob Storage, Key Vault, App Service/Static Web Apps) so feature branches deployed to the correct slots and could be tested in production-like conditions.

OPERATIONS ANALYST

ETRADE BY MORGAN STANLEY | MARCH 2021 – AUGUST 2024

- Conduct thorough reviews of documentation and financial records.
- Process multiple financial transactions accurately, efficiently, and in a timely manner.
- Troubleshoot and resolve internal and external operational issues.
- Collaborate with team members to identify and resolve any client escalations.

Additional Experience

DIECUTTER OPERATOR/MANUFACTURING FABRICATOR

DIAMOND CUTTING | JUNE 2020 – MARCH 2021

- Operated die-cutting machinery and conducted quality inspections on manufactured products.

SOME PROJECTS

- *Pong Game (C++) SFML Graphics*
 - Developed a version of the classic Pong game using C++ as a final project for my intro to software development course.
 - Designed and implemented key game mechanics including ball movement, paddle control, collision detection, and score tracking.
 - Applied object-oriented programming principles to create a modular and maintainable codebase
- *Web Chat server (Java, javascript)/Threaded Version*
 - Built a simple HTTP server using Java web socket programming.
 - Implemented HTTPRequest and HTTPResponse classes to parse requests, serve static files with proper headers, and handle 404 errors.
 - Used effective exception handling and modular, object-oriented design.
- *Web Chat (JavaScript) and React*
 - Designed and implemented a responsive chat interface using HTML, CSS, and JavaScript.
 - Integrated WebSocket protocol to enable real-time message exchange between clients and server.
 - Implemented client-side form validation, room joining functionality, and localStorage to persist user data between pages.
