

Jyothirmai Marada | Data Analyst

Dallas, TX | +1 (940) 977 5537 | mjyothirmai73@gmail.com | [LinkedIn](#)

➤ SUMMARY

Data Analyst with 6+ years of experience in managing large datasets to enhance business reporting, automation, and forecasting. Expertise in SQL, Python, Power BI, and Tableau to streamline reporting, improve data quality, and provide insights. Specialized in ETL processes, data validation, predictive analytics, and A/B testing. Partnered with cross-functional teams to define KPIs, cleanse data, and generate actionable insights to drive sales, marketing, and operational performance. Transformed complex datasets into actionable reports, optimizing decision-making and business strategies.

➤ TECHNICAL SKILL

Programming & Data Analysis: Python (Pandas, NumPy, Matplotlib, Seaborn), SQL (PostgreSQL, SQL Server, MySQL), R (basic), VBA
Business Intelligence & Visualization: Power BI (DAX, Row-Level Security), Tableau, Excel (PivotTables, Power Query, Solver), Google Data Studio
Data Modeling & Forecasting: Time Series Forecasting, Regression Analysis, Inventory Optimization, Demand Planning Models, ABC Analysis
ETL & Data Engineering: Python-based ETL Scripts, Data Cleaning, Schema Mapping, Batch Scheduling, Data Validation, Data Profiling
Databases & Query Optimization: PostgreSQL, SQL Server, MySQL, Stored Procedures, Indexing, Query Tuning, Joins, Transactions
Marketing & Supply Chain Analytics: Funnel Analysis, Churn Prediction, Procurement Metrics, Supplier Analysis, Lead Conversion KPIs, Freight/Inventory Dashboards
Cloud & Automation Tools: AWS (S3, Lambda, Glue), Google Cloud (BigQuery, Cloud Functions), Apache Airflow, dbt (basic), Alteryx
Project & Collaboration Tools: Agile Scrum, JIRA, Confluence, Git, Version Control, Cross-Functional Team Coordination
Other Tools & Platforms: Power BI, Tableau, Jenkins (CI/CD basics), GitHub, SSMS, DBeaver, VS Code, Excel Solver, Google Sheets
Additional Skills: Java (Spring Boot, JDBC – for integration use cases), REST API Integration, Basic Docker Knowledge

➤ EXPERIENCE

Data Analyst | UnitedHealth Group | Texas Jul 2024 – Present

- Designed 8+ Power BI dashboards and 5 Python-based reports, reducing weekly manual effort by 30% and enabling 24x7 availability of performance metrics for 4 teams.
- Created 12 SQL workflows to merge multi-source datasets, cutting report generation time by 25% and enhancing consistency across over 20 recurring reporting processes.
- Cleansed and standardized 1M+ rows of data, improving report accuracy by 45% and supporting financial forecasting and resource planning for 3 business units.
- Collaborated with 5 departments to finalize 18 KPIs, increasing metric adoption by 35% and ensuring consistency across analytics tools used by over 100 stakeholders.
- Built forecasting models covering 4 quarters, increasing planning accuracy by 20% and helping senior leaders make more data-backed inventory and budget decisions.
- Delivered 30+ ad hoc reports identifying trends in operations and customer behavior, revealing 10% growth potential and driving a 15% gain in internal workflow efficiency.

Data Analyst | R-Financial | HYD, India Aug 2019– Dec2022

- Developed 10 Tableau dashboards tracking 25+ KPIs, reducing manual tracking time by 40% and helping 4 departments gain instant access to live reporting data.
- Automated 18 recurring reports using Python and VBA, cutting report delivery cycles by 25% and eliminating over 10 manual input errors per month.
- Restructured 3 years of legacy marketing and sales data, improving strategic reporting accuracy by 25% and driving better leadership decisions in quarterly reviews.
- Worked with 6 cross-functional teams to define 20+ success metrics, improving dashboard consistency by 30% and reducing misinterpretation during stakeholder meetings.
- Led A/B testing across 3 new features, improving customer retention by 15% and informing rollout plans for the next product release cycle.
- Implemented validation checks across 50+ data fields during audits, maintaining 100% compliance with internal data standards and improving audit pass rate by 20%.

Junior Data Analyst | Genius SoftTech | HYD, India May 2016 – Jul 2019

- Translated 50+ stakeholder inputs into technical documentation, reducing requirement misalignment by 20% and cutting project rework hours across 6 delivery cycles.
- Improved QA feedback loops across 3 teams, lowering post-release defect rate by 18% and reducing average resolution time by 2 business days.
- Analyzed user behavior data from over 10K sessions, uncovering trends that contributed to a 10% improvement in user engagement within the web application.
- Generated 100+ reports using SQL and Excel, delivering critical operational performance insights for quarterly reviews held with 10 senior executives.
- Supported CRM rollout by validating 500+ lead records, increasing lead accuracy by 22% and improving conversion tracking across the sales pipeline.
- Maintained 20+ pages of SOP documentation, reducing new analyst onboarding time by 20% and improving training consistency across 2 intake cycles annually.

➤ EDUCATION

Masters of Science in Business Analytics Dec 2024
University of North Texas, USA
