

KAJAL CHURI

kajalkiranchuri@gmail.com | Westminster, CA | 562-846-2586 | www.linkedin.com/in/kajalchuri0107

SKILLS

Software: Python, R, SQL, MATLAB, SAS, SAS Enterprise Miner, MS Excel, Power BI, QuickBooks

Expertise: Econometrics, Data Mining, Time Series Analysis, GARCH Modeling, Statistical Modeling, Machine Learning, Deep Learning, NLP

Languages: English (fluent), Spanish (basic), Japanese (elementary)

EDUCATION

Master of Science in Computational and Applied Mathematics | California State University, Long Beach, CA, USA **May 2025**

Bachelor of Science in Mathematics, Minor in Physics | Mumbai University, Mumbai, India **June 2021**

Certifications | AWS Cloud Practitioner (Coursera), Data Science with Python, Statistics for Data Science, **Mar 2023 - Jun 2025**
Advanced Python, MySQL with Workbench (Gamaka AI Solutions)

WORK EXPERIENCE

Research Assistant – Data Mining

Sept 2025 - Present

California State University, Long Beach

- Collaborate with faculty to develop **reproducible code, teaching modules, and analytical workflows** for graduate-level Data Mining coursework, ensuring clarity and usability for student learning
- Designed **hands-on examples and visualizations** for advanced machine learning topics, including contour-based word clouds, DistilBERT NLP pipelines, Bayesian neural networks, image localization, ensemble models, reinforcement learning, and deep learning applications
- Build and document **Python and R workflows** that support classroom delivery, emphasizing reproducibility, transparency, and alignment with modern data science best practices
- Translate complex machine learning concepts into **accessible instructional materials**, bridging research and teaching through real-world applied projects
- Maintained organized datasets, version-controlled codebases, and structured documentation to ensure **data quality, continuity, and long-term reusability** across the curriculum

Finance Intern (Remote)

May 2024 - May 2025

Big Picture International, Tokyo, Japan

- Analyzed **financial and operational KPIs** using regression, variance analysis, and trend modeling to support forecasting and scenario simulations
- Conducted **data reconciliation, validation checks, and audit trails** across multi-source datasets to ensure integrity for analytical modeling
- Built **automated Excel-based reporting workflows** to standardize metrics, reduce manual effort, and improve analytical transparency
- Translated quantitative findings into clear, decision-ready insights for global stakeholders across finance and operations

Finance Analyst

Jun 2021 - Jun 2023

Suchmi Organics, Mumbai, India

- Built **ETL-style pipelines (Python + SQL)** to unify ERP, operational, and financial data, enabling accurate downstream modeling, KPI development, and standardized reporting
- Developed **forecasting, scenario modeling, and risk-analysis frameworks**, applying econometric and statistical techniques central to strategic planning and continuous improvement
- Created **Power BI dashboards and automated reporting tools** used by leadership to monitor trends, discrepancies, and performance indicators
- Conducted **variance analysis, quality checks, and internal audit support**, ensuring accuracy and compliance in organizational reporting systems

TECHNICAL PROJECTS

Automated Scoring System for Math Day at the Beach Tournament using Python

Oct 2025

- Designed an end-to-end analytics pipeline using Python to process, validate, and rank results for 200+ participants; engineered logic for fairness, error detection, and reproducibility
- Automated complex ETL workflows and multi-sheet integrations, reducing manual processing time by 90%

Forecasting the USD/INR Exchange Rate using LSTM & GRU

May 2025

- Built GRU and LSTM models in Python and R to forecast USD/INR using 10 years of historical data; GRU achieved 97%+ accuracy
- Modeled volatility using GARCH(1,1) to quantify uncertainty and tail-risk exposure
- Applied anomaly and change-point detection to identify structural shifts in FX dynamics; benchmarked INR against major currencies
