

Karthik Babu Vadloori

Java Full Stack Developer

Dallas, TX | karthik.fullstack11@gmail.com | +1 (214) 730-1031 | <http://www.linkedin.com/in/karthikvadloori>

SUMMARY

Java Full Stack Developer with 5+ years of experience delivering scalable, secure, and cloud-native enterprise applications using Spring Boot, React.js, and cloud platforms (AWS, Azure, OpenShift). Skilled in backend development, RESTful API design, test-driven development (TDD), and cloud infrastructure implementation. Proven expertise in microservices architecture, CI/CD pipelines, code reviews, and agile methodologies like Scrum. Adept at solving complex problems using AI-driven features and performance optimization in distributed systems.

PROFESSIONAL EXPERIENCE

Java Full Stack Developer, Kroger	January 2024 - Present Dallas, TX
- Developed Spring Boot microservices and React.js interfaces for Kroger’s digital coupon platform, handling millions of daily transactions. - Implemented test-driven development (TDD) with JUnit and Jest, ensuring robust unit and integration test coverage. - Designed and integrated RESTful APIs for coupon validation and redemption, improving service interoperability. - Conducted peer code reviews to maintain code quality, reduce defects, and mentor junior engineers. - Deployed applications on cloud infrastructure using Pivotal Cloud Foundry and Kubernetes. - Automated CI/CD pipelines with Jenkins and GitLab CI, accelerating release cycles by 60%.	
Java Full Stack Developer, Citibank	July 2019 - July 2022 India
- Designed and maintained Spring Boot microservices for real-time transaction processing and fraud monitoring. - Developed secure, scalable REST APIs with OAuth2 and RBAC, supporting 24/7 transaction handling. - Implemented automated testing and CI/CD deployment using Jenkins, Harness, and SonarQube. - Participated in Agile Scrum teams for sprint planning, daily standups, and retrospective sessions. - Collaborated with data teams to integrate AI-driven fraud detection and classification models. - Migrated legacy systems to distributed cloud infrastructure (AWS and OpenShift), improving availability and scalability.	

TECHNICAL SKILLS

Languages & Scripting: Java, JavaScript, TypeScript, SQL, Python, Go
Frameworks & Libraries: Spring Boot, React.js, Redux, Angular, Node.js, Express
Backend & APIs: Microservices, RESTful APIs, Test-Driven Development (TDD), Code Review
Cloud & Infrastructure: AWS, Azure, OpenShift, Kubernetes, Docker, Terraform, GitLab CI/CD, Jenkins
Databases & Storage: PostgreSQL, MySQL, MongoDB, Redis, Hadoop
DevOps & CI/CD: Jenkins, GitLab, Harness, CodePipeline, SonarQube, Automated Testing, Continuous Integration, Continuous Deployment
Tools & Platforms: JUnit, Jest, Git, GitHub, SQS, Lambda
Methodologies & Practices: Agile, Scrum, Debugging, Problem Solving, Continuous Improvement, Distributed Systems
Soft Skills: Team Collaboration, Decision Making, Analytical Thinking, Communication

EDUCATION

Master of Computer Science University of Texas, Arlington, USA
Bachelor of Technology in Computer Science Engineering Sreenidhi Institute of Science and Technology

PROJECTS

Kroger – Digital Coupons Platform - Built scalable microservices and React.js UI to manage digital coupon distribution and redemption across e-commerce and retail systems. - Enabled real-time offer processing with Kafka and improved system uptime to 99.99% through proactive monitoring and DevOps automation.
Citibank – Online Transaction Monitoring - Developed real-time fraud detection and transaction validation modules using Spring Boot, Kafka, and AWS. - Delivered role-based dashboards for compliance teams and ensured SOC and PCI DSS audit readiness through secure architecture.
