Phone: +15153465815

PROFESSIONAL SUMMARY:

- **Data Engineer** with 5+ years of experience in **data engineering**, **ETL development**, **cloud analytics**, and **business intelligence** across finance, healthcare, and enterprise domains.
- Proficient in **Azure**, **AWS** and **GCP services**, including **Azure Data Factory (ADF)**, **Azure Synapse Analytics**, **Azure SQL**, **AWS Glue**, **AWS Redshift**, **AWS S3**, and **Lambda**, for developing scalable and high-performance data solutions.
- Strong hands-on experience with **Python (Pandas, PySpark, Boto3)**, **SQL**, **T-SQL**, **Hadoop** enabling efficient data transformations, **batch processing**, and **real-time analytics**.
- Experience in **real-time** and **batch data processing**, utilizing Azure Event Hubs, AWS Kinesis, Apache Airflow, and Azure Logic Apps for low-latency data pipelines.
- Designed and optimized **cloud-based data warehouses** in Azure Synapse, AWS Redshift, and Data Lake, improving query performance and scalability.
- Developed and deployed **machine learning models** for predictive analytics, fraud detection, and demand forecasting using Azure Machine Learning (AML), AWS SageMaker, XGBoost, LightGBM, and Scikit-learn.
- Integrates **Databricks** into scalable ETL workflows to drive efficiency and enable real-time insights.
- Implemented **data governance**, **compliance**, and **security best practices** using **Azure Purview**, AWS Lake Formation, IAM, and Role-Based Access Control (RBAC), ensuring GDPR, HIPAA, and SOX compliance.
- Expert in **API integrations** and **data exchange solutions** using **Azure API Management**, **AWS API Gateway**, **REST APIs**, ensuring seamless communication between enterprise systems.
- Automated **CI/CD workflows** for **data solutions** using **Terraform**, **CloudFormation**, **Azure DevOps**, **AWS Code Pipeline**, **GitHub Actions**, and **Jenkins**, improving deployment efficiency and reducing manual interventions.
- Leverages **Databricks** for streamlined Spark-based data processing and collaborative analytics.
- Optimized **cloud cost management** through **Azure Cost Management**, **AWS Cost Explorer**, **reserved instances**, and **auto-scaling policies**, reducing cloud expenditures by **18%**.
- Experience in **A/B testing**, **time-series forecasting**, and **statistical analysis**, improving data-driven decision-making across multiple industries.
- Collaborated with **cross-functional teams**, including **finance**, **marketing**, **DevOps**, and **business intelligence teams**, ensuring alignment of data solutions with business goals.
- Passionate about **leveraging cloud technologies**, **AI-driven analytics**, and automation to enhance data processing efficiency, scalability, and innovation.

TECHNICAL SKILLS:

Cloud & Data Engineering: Azure Services (Azure Data Factory (ADF), Azure Synapse Analytics, Azure SQL, Azure Blob Storage, Azure Functions), Data Warehousing & ETL (Azure Data Lake, Delta Lake, SQL Server, Snowflake, Apache Iceberg, Databricks, Informatica), **AWS Services:** AWS Glue, AWS Redshift, AWS S3, AWS Lambda, AWS RDS, AWS DynamoDB, AWS EventBridge, AWS CloudWatch, GCP ((BigQuery, Cloud Storage, Dataflow)

Programming & Scripting: Languages (Python (Pandas, Polars, NumPy, PySpark, PyTorch), SQL, T-SQL, Shell Scripting), Automation & Infrastructure-as-Code (IaC) (Terraform, Bicep, Azure DevOps, CI/CD Pipelines), AWS Code Pipeline.

Data Analytics & Business Intelligence: Tableau, Looker, Power BI, AWS QuickSight, Azure ML, AWS SageMaker, DAX, MDX, Predictive Modeling (XGBoost, LightGBM, Scikit-learn), Time Series Forecasting (Prophet, ARIMA), A/B Testing

Big Data Processing & Integration: Azure Event Hubs, AWS Kinesis, Kafka, AWS Glue Streaming, Data Governance (Azure Purview, AWS Glue Data Catalog, RBAC, IAM)

Name: Kavya Reddy Maale
Email: kavyareddymaale@gmail.com
Phone: +15153465815

DevOps & API Management: GitHub Actions, Azure DevOps, AWS Code Pipeline, Jenkins, Bitbucket, REST APIs, Azure API Management, AWS API Gateway.
Compliance: HIPAA, GDPR, SOX

PROFESSIONAL EXPERIENCE:

Client: Huntington National Bank
Senior Data Engineer

June 2023 – Present

Responsibilities:

- Developed **custom ETL frameworks in Azure Data Factory and AWS Glue**, improving pipeline efficiency and reducing data processing time by **35%**.
- Implemented **anomaly detection models using Azure Machine Learning (AML), AWS SageMaker, and Power BI**, improving **fraud detection accuracy by 20%**.
- Designed **serverless architecture using Azure Functions and AWS Lambda**, enhancing **real-time data processing capabilities**.
- Developed **high-performance SQL stored procedures in AWS Redshift and Azure SQL**, reducing query execution time by **40%**.
- Leveraged **Google Cloud Platform services** such as **BigQuery and Cloud Storage** to complement our multi-cloud data strategy, enabling seamless cross-cloud analytics and enhanced scalability of our data processing pipelines
- Integrated **AWS Secrets Manager and Azure Key Vault** for **secure credential management**, ensuring **enterprise security compliance**.
- Leveraged **Databricks** to optimize Spark-based data transformations, enhancing pipeline efficiency and enabling real-time analytics.
- Created **Power BI and QuickSight paginated reports** for **executive-level decision-making**, improving **visibility into key financial metrics**.
- Implemented **metadata-driven dynamic pipeline execution** in ADF and AWS Glue, enabling **configurable and reusable workflows**.

Environment: Azure Cloud, AWS Cloud, Azure Data Factory (ADF), AWS Glue, Azure Synapse Analytics, Databricks, AWS Redshift, AWS Lambda, GCP, Azure SQL, Python, PySpark, Power BI, AWS QuickSight, Azure Machine Learning (AML), AWS SageMaker, AWS EventBridge, Azure Event Hubs, Terraform, AWS CloudFormation, GitHub Actions.

Client: Wipro
Senior Data Engineer

August 2020 – December 2022

Responsibilities:

- Migrated **legacy on-prem SQL databases to Azure Synapse and AWS Redshift**, improving **query performance and reducing operational costs by 40%**.
- Developed **data lineage tracking solutions in Azure Purview and AWS Glue Data Catalog**, ensuring **compliance with GDPR and HIPAA regulations**.
- Built **CI/CD pipelines for data deployments using Terraform, AWS CodePipeline, and Azure DevOps**, reducing **deployment failures by 45%**.
- Built **distributed caching layers for frequently accessed datasets using AWS DynamoDB and Azure Cosmos DB**, reducing **Power BI and QuickSight report load times significantly**.
- Designed and implemented **an enterprise-wide data catalog using Azure Data Lake and AWS Lake Formation**, improving **data discoverability**.
- Utilized **Databricks** to develop and deploy scalable ETL pipelines, streamlining data processing and fostering collaborative analytics.
- Developed **event-driven processing using AWS Lambda and Azure Functions**, reducing **manual intervention for data ingestion tasks**.

Phone: +15153465815

Environment: Azure Cloud, AWS Cloud, Azure Data Factory (ADF), AWS Glue, Azure Synapse Analytics, Databricks, GCP, AWS Redshift, AWS S3, AWS Lambda, Azure SQL, Azure Data Lake, AWS DynamoDB, Power BI, AWS QuickSight, Terraform, AWS CloudFormation, Azure DevOps, AWS CodePipeline, AWS Lake Formation, Jenkins, Azure Purview.

Client: Wipro
Data Engineer

July 2019 – August 2020

Responsibilities:

- Designed **ETL workflows** for **structured** and **semi-structured data sources** using **ADF, AWS Glue**, and **Azure SQL**, improving data integration by **30%**.
- Developed **real-time Power BI** and **QuickSight dashboards** with **DAX** scripting, providing actionable insights for business stakeholders.
- Automated **data validation** and **cleansing processes** using **Python** and **AWS Lambda**, enhancing data accuracy and reducing errors by **25%**.
- Integrated **Databricks** for interactive Spark jobs, significantly reducing batch processing times and improving overall data workflow performance.
- Implemented a **monitoring system** using **AWS CloudWatch** and **Azure Monitor** for real-time tracking of ETL pipeline failures, reducing downtime by **40%**.
- Designed **automated data reconciliation workflows** in **ADF, AWS Glue**, and **SQL**, improving financial data accuracy.
- Developed **batch processing jobs** using **PySpark** on **AWS EMR**, enabling faster data transformations for large datasets.
- Explored and deployed **GCP** solutions like **BigQuery** and **Cloud Dataflow** to support agile ETL processes, thereby enabling real-time analytics and improved insights for business intelligence dashboards.

Environment: Azure Cloud, Azure Data Factory (ADF), Azure SQL, Power BI, Python, SQL, T-SQL, Azure Functions, Databricks, GCP

EDUCATION:

Master's in data science - University of West Florida

CERTIFICATIONS:

- [AWS Certified Machine Learning – Specialty](#)
