

KAVYASRI ELMATI

Data Analyst | Data Engineer

Email: kavyasri.elmati@gmail.com LinkedIn: linkedin.com/in/kavyasri Mobile: +1 3096125167 Place: United States

SUMMARY

Data Engineer / Data Analyst with 2.5+ years of experience designing, building, and maintaining ETL pipelines; performing data cleaning, transformation, and validation; and supporting analytics teams with analysis-ready datasets. Strong experience with SQL, Python, Snowflake, AWS, and Apache Airflow. Experienced in healthcare and operational data analysis, data quality assurance, dashboard development, and reporting to support decision-making and quality improvement initiatives. Detail-oriented with strong documentation and data governance practices.

TECHNICAL SKILLS

- **Programming & OOP:** Python, C, C++, C#, JavaScript, Embedded C
 - **Databases & Querying:** SQL, MySQL, PostgreSQL, SQL Server, Snowflake
 - **ETL & Workflow Tools:** Apache Airflow, PySpark, Python-based ETL
 - **Cloud Platforms:** AWS S3, Snowflake
 - **Data Visualization:** Power BI, Tableau
 - **Version Control & Methodologies:** Git, GitHub, Agile
 - **Healthcare & Governance (Foundational):** Healthcare data analysis, healthcare terminology exposure, clinical and operational metrics, data validation, HIPAA-aware data handling, data governance principles.
-

PROFESSIONAL EXPERIENCE

Zetta Prime

Jr Data Engineering Intern

Feb 2024 – Jul 2025

Project Name: End-to-End ETL Pipeline Development and KPI Dashboard Automation

Technologies: Python, Pandas, MySQL, SQL, Power BI, Apache Airflow

- Designed and supported end-to-end ETL pipelines using Python, SQL, Pandas, and Apache Airflow.
- Translated operational and quality-focused reporting requirements into SQL queries and Power BI dashboards.
- Implemented standardized data validation, reconciliation, and quality checks to ensure accuracy and consistency.
- Automated recurring workflows and pipeline monitoring, improving data delivery efficiency by 30%.
- Developed Power BI dashboards to support KPI reporting and decision-making.
- Supported recurring reporting cycles and ad hoc data requests.
- Created and maintained technical documentation for ETL workflows, schemas, and transformations.
- Maintained production reporting pipelines following data governance and secure data handling practices.

Neven IT Services

Data Analyst

Jan 2021– Jan 2022

Project Name: Cloud Data Warehouse Migration

Technologies: Snowflake, SQL, Power BI, Apache Airflow, AWS S3

- Supported cloud data warehouse migration by loading and transforming data into Snowflake from AWS S3.
 - Wrote and optimized SQL queries for reporting and downstream analytics.
 - Performed data quality audits including consistency checks, duplicate detection, and error resolution.
 - Automated daily ETL workflows using Python and Apache Airflow, reducing manual processing time by 40%.
 - Collaborated with cross-functional teams to troubleshoot pipeline failures and maintain accurate documentation.
 - Supported production reporting environments to ensure reliable data availability.
-

PERSONAL PROJECTS

Sales Forecasting with Time Series Analysis

Jan 2023 – May 2023

- Built scalable ETL and forecasting pipelines using PySpark and Python.
- Applied ARIMA and Prophet models to improve forecast accuracy by 35%.
- Developed Power BI dashboards to visualize trends and support inventory planning.
- Documented workflows and containerized pipelines using Docker..

Capstone Project – Magnolia’s Ice Cream

Aug 2022- Nov 2022

- Designed dimensional data models (fact and dimension tables) to support scalable reporting.
- Implemented data validation and quality checks to ensure metric accuracy.
- Developed Power BI dashboards for revenue, product performance, and seasonal trends.
- Performed trend analysis and basic forecasting for operational planning.
- Documented ETL workflows, schemas, and transformations for maintainability and future scalability.

Hospital Resource & ICU Bed Analysis During COVID-19

Jul 2020 – Oct 2020

- Analyzed healthcare datasets including patient admissions, ICU utilization, and hospital capacity metrics.
 - Performed data validation and cleaning to ensure analysis-ready datasets.
 - Built dashboards for trend visualization and capacity planning to support quality-related decision-making.
 - Documented data definitions, mappings, and analytics processes
-

EDUCATION

Master of Science in Information Technology and Computer Science
[Atlantis University, Miami, Florida, USA](#)

Aug 2022 – Aug 2024

Bachelor of Science in Computer Science and Electronics
[St. Ann's Degree College for Women, Hyderabad, India](#)

Aug 2019 – May 2022
