WORK HISTORY

24G - Troy, MI | *June 2025 - Present*

Software Developer

- Led end-to-end development of a multi-device AI + AR web application under tight deadlines for live events.
- Integrated local AI models, Open API, and Whisper AI voice services with backend controllers/services to deliver real-time experiences.
- Redesigned API flow to enable parallel prompt execution, cutting average response times by 83%, resulting in a better user experience.
- Architected and optimized backend controllers, in TypeScript + Node.js, handling several socket events, API calls, and state management.
- Delivered scalable frontend flows with onboarding screens, live camera previews and voice enablement, and synchronized routes across phone, touchscreens, and large TV screens.

NDS TRUCKING - DEARBORN, MI | *August 2024 – June 2025*

Administrator / IT

- Optimized administrative processes by implementing simple tools or software solutions for managing documentation and records.
- Provided IT support, including troubleshooting hardware, software, and network issues, ensuring system efficiency.
- Introduce AI tools and services to speed up and automate workflows within email systems.

JABROS CARPET ONE - SOUTHGATE, MI | *January 2019 - July 2024*

Technician

- Applied problem-solving skills to overcome installation challenges, ensuring customer satisfaction.
- Managed end-to-end project workflows, which required technical precision and collaborative coordination.
- Ensure great communication between installers, managers, and customers to complete projects requirements.

EDUCATION

COMPUTER SCIENCE - WAYNE STATE UNIVERSITY

Bachelor of Science

Graduated: December 2024

GPA: 3.90

PROJECTS

STOCK MARKET PORTFOLIO APP - React | Python | Keras | Firebase | Tailwind CSS | Chart.js - Capstone Group Project

August 2024 – Present | <https://github.com/kevin7391s/ProfitPulse>

- Developed a dynamic web application providing users with real-time stock data and AI-based predictions powered by a Keras LSTM and Transformer model.
- Implemented an interactive dashboard for users to manage their stock portfolios, track share values, and receive buy/sell recommendations based on predictive analytics.
- Integrated APIs like Yahoo Finance to fetch market data, ensuring accurate and up-to-date information for decision-making.

FITNESS TRACKING APP - Next.js | Tailwind CSS | Firebase - Personal Project

May 2023 – September 2024 | https://github.com/kevin7391s/shock_fitness

- Designed and built a fitness and workout tracking platform using Next.js, React, Tailwind CSS, and Firebase.
- Developed key features like user authentication, workout creation, progress tracking, and social interaction between users.
- Enhanced UX/UI for seamless interaction and incorporated responsive design principles for mobile-friendly usage.

SKILLS

- **Programming Languages:** JavaScript / TypeScript, Python, C++, Java
- **Frameworks / Tools:** Vue, React, React-Native, Next.js, Firebase, NodeJS, MySQL, Amazon S3, MongoDB
- **Other Skills:** WordPress, UI/UX Design, Version Control, Testing / QA, Adobe Creative Cloud, Microsoft Suite
