

Sai Kiran Reddy

(267)577-9408 saikiranreddinavar@gmail.com [<https://www.linkedin.com/in/kiranreddy1nnn>]

Career Summary:

- About 5 years of experience as a Java Developer with expertise in designing, developing, and deploying scalable, high-performance web-based applications using Java, J2EE, and Spring frameworks. Proficient in building **RESTful APIs, microservices, and cloud-based solutions**, with a strong focus on secure authentication, authorization, and fault-tolerant systems.
- Developed Microservices using Spring Boot within Pivotal Cloud Foundry, with expertise spanning **Spring REST, IOC, IO, JTA**, and Spring modules such as **Spring MVC, AOP, JDBC, Spring ORM, JMS, Spring Messaging, Spring Batch, Security, Spring Cloud, Spring Eureka, Spring Ribbon, and Spring Netflix Zuul**.
- Applied Core Java concepts including **Collection API, Stream API, parallel streams, exception handling, multithreading, Hash Map, concurrency, JDBC**, modularity, executor service, and fork and join frameworks.
- Implemented various Design Patterns such as Session Facade, Value Object, **DAO, DTO, Command, Singleton, Factory, MVC**
- Developed web applications on MVC-based frameworks like **Spring, Spring IOC, Spring Security, Spring Boot, Spring Microservices, Spring Batch, and Spring MVC**.
- Experienced in using ORM frameworks like **JPA, Hibernate, Spring JDBC, Spring Data JPA, and Spring Data REST**.
- Implemented enhanced application security by incorporating secure authentication mechanisms such as **JWT for RESTful API endpoints** and configured **OAuth2 to secure Microservices** for application-to-application authentication and authorization.
- Experienced with **GraphQL, Docker, Kubernetes, and PostgreSQL**.
- Experience in building servers using AWS, including importing necessary volumes, launching EC2 instances, creating security groups, auto-scaling, load balancers, Route 53, and SNS as per the architecture.
- Proficient in working with real-time streaming pipelines using Kafka and Spark-Streaming.
- Implemented and managed CI/CD pipelines using tools such as **Jenkins** for application deployment.
- Proficient in writing test scripts for automation using JUnit
- Developed interactive and responsive UI components using Angular, HTML, and CSS.
- Implemented reusable Angular services and consumed RESTful APIs to display dynamic data.
- Experienced in J2EE Testing, developing test cases with JUnit and Mockito for unit testing, and logging using Log4j. Experienced in Mock Testing.
- Proficient in writing SQL queries, Procedures, Functions, Triggers, and good knowledge of relational databases like Oracle, MySQL, Microsoft SQL Server, PostgreSQL, and DB2, as well as NoSQL databases like MongoDB and Cassandra.

Skills:

Programming Languages: Java 8, J2EE, Core Java, python, HTML, CSS and react

Frameworks: Spring Boot, Spring MVC, Spring Security, Spring Batch, Spring Cloud, Hibernate, JPA

Cloud Platforms: AWS (EC2, S3, Lambda, Route 53, SNS), Azure, Pivotal Cloud Foundry

DevOps Tools: Docker, Kubernetes, Jenkins,

Databases: PostgreSQL, MongoDB, Oracle, MySQL, Cassandra

Messaging Systems: Apache Kafka, RabbitMQ, Spark-Streaming

Testing Tools: JUnit, Mockito

Other Tools: Jira, Git, Maven, Log4j

Design Patterns: Singleton, Factory, Adapter, MVC, DAO, DTO

Security: OAuth2, JWT, Spring Security

Web Technologies: RESTful APIs, SOAP, GraphQL

Database Tools: SQL, NoSQL, PL/SQL

CI/CD Tools: Jenkins

Containerization & Orchestration: Docker, Kubernetes, Azure AKS, AWS, Ec2, lambda

Version Control: Git

Agile Methodology: Jira, Sprint Management, Scrum

PROFESSIONAL EXPERIENCE:

Client: Meta Picks Llc, TX, US

Java Developer | Jun 2024 – Till Date

Responsibilities:

- Designed and developed RESTful APIs using Spring Boot to enhance backend functionality, ensuring seamless integration with microservices architecture
- Implemented authentication, authorization, and access control using Spring Security, ensuring secure access to APIs

- Utilized Spring Batch for processing large datasets efficiently, improving application performance
- Integrated Apache Kafka for real-time event-driven microservices, enhancing system reliability and scalability
- Deployed and managed containerized applications in **Azure AKS**, ensuring high availability and scalability.
- Collaborated with DevOps teams to implement **CI/CD (Jenkins, Docker, Kubernetes)** pipelines, streamlining deployment processes and reducing release times.
- Developed interactive and responsive UI components using Angular, HTML, and CSS.
- Implemented reusable Angular services and consumed RESTful APIs to display dynamic data.
- Conducted comprehensive unit and integration testing (JUnit, Mockito) to improve code quality and maintainability
- Ensured seamless integration of Java-based applications with databases, APIs, and other systems.
- Troubleshoot and resolve issues in a cloud-based environment, ensuring system reliability and minimizing downtime.
- Collaborated with cross-functional teams in an Agile development environment, enhancing communication and accelerating project delivery.
- Utilized Java Streams, String manipulation, and Collection classes to optimize code efficiency and performance.
- Identified and fixed bottlenecks in cloud infrastructure, optimizing performance and cost-efficiency.
- Utilized **Jira** for **agile project management**, tracking sprint progress, and managing software development lifecycles.
- Developed and managed **SQL databases** using **PostgreSQL**, ensuring data integrity and performance optimization.

Environment:Java 8, Spring Boot, Spring Security, Spring Batch, Apache Kafka, Azure AKS ,Docker, Kubernetes, Jenkins, PostgreSQL, JUnit, Mockito, Jira, Agile Methodology, Azure ,Spring Boot (RESTful APIs), Spring Security (authentication/authorization), Apache Kafka,Azure AKS, Jenkins , Jira,PostgreSQL ,JUnit, Mockito (unit and integration testing),Java Streams, String Manipulation, Collections Framework, Design Patterns

PwC , IND (Full time)

Java Developer | May 2019 – Jan2023

Responsibilities:

- Developed and maintained Java-based enterprise applications using Spring MVC, Hibernate, and RESTful APIs
- Implemented microservices architecture to enhance modularity and scalability of applications
- Integrated Netflix Eureka for service discovery and Hystrix for fault tolerance, improving system resilience
- Optimized SQL and NoSQL (PostgreSQL, MongoDB) database queries, reducing response times by 30%
- Enhanced caching strategy using EHCache and Redis, improving application performance
- Worked with AWS (EC2, S3, Lambda) to deploy and manage cloud-based applications
- **Implemented DevOps practices** by automating Continuous Integration (CI)/Continuous Deployment pipelines, managing cloud infrastructure with Terraform, and orchestrating containerized applications using Docker and Kubernetes for scalable deployments.
- Developed and deployed GraphQL APIs using Apollo Server with Spring Boot for efficient data fetching and reduced over-fetching.
- Designed GraphQL schemas with queries, mutations, and subscriptions for real-time updates in microservices architecture.
- Integrated Apollo GraphQL with Spring Boot to expose high-performance APIs, replacing traditional REST-based services.Ensured seamless integration of Java-based applications with databases, APIs, and other systems.
- Managed **source control** and code collaboration using **Git**, ensuring efficient versioning and team coordination.
- Designed and optimized **NoSQL databases** like **MongoDB** for handling large-scale, unstructured data efficiently.

Environment :Java 8, J2EE, Core Java,Spring Boot, Spring MVC, Spring Security, Spring Batch, Spring Cloud, Hibernate, JPA,AWS (EC2, S3, Lambda, Route 53, SNS), Azure ,Docker, Kubernetes, Jenkins,, Terraform ,PostgreSQL, MongoDB, Oracle, MySQL, Cassandra ,Apache Kafka, RabbitMQ ,JUnit, Mockito ,Design Patterns (Singleton, Factory, MVC), SQL, NoSQL, GraphQL, OAuth2, JWT, GraphQL

EDUCATION DETAILS:

- Master's in Cybersecurity Security from Rowan University, US - May 2024
- Bachelor's in Technology(Computer science) from Vignan institute of technology and science, IND - AUG 2020
