SUMMARY

Data Scientist with around 4 years of experience delivering intelligent analytics, machine learning, and cloud driven data solutions across healthcare and enterprise environments. Background includes architecting generative AI frameworks, scalable MLOps infrastructures, predictive modeling systems, and advanced NLP applications utilizing Python, TensorFlow, PyTorch, LangChain, Spark, and Kubernetes. Recognized for translating complex datasets into measurable operational improvements, revenue optimization opportunities, and strategic business insights through statistical analysis, automation, and modern AI technologies.

SKILLS

Programming & Scripting Languages: Python (Pandas, NumPy, Scikit learn, TensorFlow, PyTorch), R, SQL, Bash, Java, JavaScript, React, TypeScript, Kotlin, Rust, MATLAB, PHP, Go (Golang), Scala

AI/ML Skills: Supervised & Unsupervised Learning, NLP, LLM Fine tuning, Time Series, Reinforcement Learning, Clustering, Ensemble Methods (XGBoost, Random Forest), Model Explainability (SHAP, LIME)

Generative & Agentic AI: GPT, BERT, LLaMA, GANs, LangChain, RAG Pipelines, Intelligent Agent Design, Gen AI, Open AI

Statistics & Experimentation: Hypothesis Testing, A/B Testing, Regression, Bayesian Inference, Causal Impact, Statistical Significance, Time Series Analysis, Descriptive Statistics, Probability & Distributions, Survival Analysis

Data Engineering: ETL, Feature Engineering, Airflow, Spark, REST APIs, Databricks

Visualization & BI: Tableau, Power BI, Plotly, Dash, Seaborn, Matplotlib, Excel

Cloud & MLOps: AWS (S3, EC2, SageMaker, Lambda), Azure ML, GCP (BigQuery, Vertex AI), Docker, Kubernetes, MLflow, CI/CD, FastAPI, Streamlit, Flask, Model versioning and registry management, Data pipeline automation and scheduling

Databases: MySQL, SQL Server, MongoDB, Oracle, Snowflake, BigQuery

Methodologies: Agile/Scrum, CRISP DM, Cross Functional Collaboration, Mentoring, Code Review

EXPERIENCE

Intuit, USA | Data Scientist

Feb 2025 - Present

- Built Easy Query, an NLP-to-SQL platform using OpenAI's LLM API and LangChain, enabling non-technical users to query enterprise databases in plain English and reducing manual analyst support by 40%.
- Integrated LangChain chains (Prompt Template, SQL Database Chain) with schema-aware retrieval, improving SQL generation accuracy by 20% and lowering invalid query rates.
- Fine-tuned transformer models in PyTorch with embeddings and prompt optimization, aligning natural language inputs with database schema metadata for higher precision.
- Developed and containerized model-serving microservices with Docker, and deployed them on AWS EKS (Kubernetes), enabling autoscaling, monitoring, and CI/CD-driven rollouts that shortened release cycles by 30%.
- Administered scalable MLOps infrastructures through Kubernetes and MLflow, accelerating deployment timelines 42%.
- Optimized cloud native AI workflows through Databricks, preventing discrepancies exceeding \$780K during reporting.

Borland Software, India | Data Engineer

Aug 2021 - Jul 2023

- Architected enterprise AI data infrastructures supporting large language model training across analytical environments.
- Instituted scalable feature engineering methodologies leveraging Python and SQL for predictive modeling improvements.
- Revitalized cloud-based warehouse architectures through Snowflake, reducing retrieval durations during compliance reviews.
- Streamlined Spark powered ETL orchestration pipelines, decreasing processing latency 41% across multinational operations.
- Configured RESTful integrations supporting intelligent analytics automation across cross functional reporting environments.
- Supervised AWS migration initiatives utilizing Docker and Kubernetes, preventing disruptions exceeding \$560K annually.
- Devised real time streaming frameworks supporting AI driven anomaly detection throughout enterprise transaction systems.
- Governed automated data validation processes using Airflow, minimizing reconciliation inconsistencies 29% throughout reporting.
- Accelerated CI/CD engineering workflows through Git automation, increasing technical productivity metrics 22%.

Citius Tech, India | Data Analyst

Jan 2021 - Jul 2021

- Produced AI assisted Power BI dashboards, strengthening executive visibility regarding patient utilization behavior.
- Synthesized SQL derived analytical insights supporting healthcare leadership decisions during enterprise modernization initiatives.
- Generated automated reporting frameworks through Excel and Power Query, streamlining month end reconciliation procedures.
- Interpreted healthcare trends utilizing R programming, identifying administrative optimization opportunities across operations.
- Examined patient engagement behaviors through clustering algorithms, improving retention effectiveness 21% across networks.
- Analyzed healthcare datasets utilizing Tableau and Python, uncovering recovery opportunities exceeding \$310K annually.
- Consolidated fragmented operational datasets through SQL transformations, strengthening governance and reporting consistency.
- Evaluated predictive statistical trends through regression methodologies, reducing forecasting deviations 17% across operations.
- Facilitated Agile driven analytics initiatives, accelerating deliverable completion timelines 32% throughout healthcare departments.

EDUCATION

Master of Science in Computer Science | Arizona State University, AZ, USA

Bachelor of Electrical & Electronics Engineering | Birla Institute of Technology and Science Pilani, Hyderabad, India
