

Lakshmi Jampala

Dallas, TX, USA • +1 6592688990 • lakshmijampala25@gmail.com • [linkedin.com/in/lakshmijampala/](https://www.linkedin.com/in/lakshmijampala/)

Software Developer

Skilled **Java Full Stack Developer with 5+ years of experience** in designing and developing scalable web applications. Proficient in building microservices architectures using Spring Boot, with a deep understanding of the SDLC, Agile methodologies, and CI/CD pipelines. Expertise in RESTful API development, frontend technologies and cloud services. Passionate about writing clean, maintainable code, optimizing performance. Strong problem-solving skills and a collaborative approach to delivering high-quality, production-ready software solutions.

SKILLS

Languages: Java, JavaScript, TypeScript, SQL, HTML, CSS, Python, XML, JSON, C++

Frontend Technologies: React, Angular, JSP, jQuery, Bootstrap, AJAX, Node JS

Backend Technologies: Core Java, Java Spring Boot, Spring MVC, J2EE, Hibernate, JPA, RESTful APIs, SOAP Web Services, Kafka, Apache Camel, Microservices, OOPs, JDBC, Batch Processing

Cloud: AWS(EC2, S3, Cognito, IAM, CloudWatch, Lambda), GCP, Azure, Jenkins, CI/CD Pipelines, Docker, Kubernetes

Database Environments: MySQL, PostgreSQL, Oracle, SQL Server, Elasticsearch, Redis, LDAP

Testing & Security: JUnit, Mockito SonarQube, Log4j, Postman, Insomnia, OAuth, JWT, MFA, RBAC

Tools & Version Control: GitHub, Bitbucket, SourceTree, Jira, Eclipse, IntelliJ, Splunk, IBM WebSphere, Tomcat

Development & Methodologies: Machine Learning, Statistics, Waterfall, API Integration, Agile/Scrum Methodology

WORK EXPERIENCE

Mosaic Insurance • Java Full Stack Developer

Remote, USA • 09/2023 – 05/2025

- Designing and developing reusable custom services for web applications using Java Spring Boot for the backend and React JS for the front end, ensuring a seamless integration of both technologies.
- Created new RESTful API endpoints using java Spring Boot for functionalities like creating, saving, and editing policy details by analyzing risks and generating quotes for various financial institutions.
- Developed a policy submission platform used by brokers, reducing processing time by 30%, enabling underwriters to submit policies with various parameters and attributes, thereby improving data accuracy and speed in the underwriting process.
- Used React JS for building dynamic and responsive user interfaces, ensuring the front end is tightly integrated with backend services through RESTful APIs.
- Working on React's Context API for managing global state across the application, ensuring seamless data flow and consistent user experiences across multiple components.
- Designing and developing reusable UI components in React JS, following a component-based architecture for modular development, enabling scalability and easier maintenance.
- Implementing frontend routing with React Router for a smooth, single-page application experience, ensuring efficient navigation between different views and functionalities.
- Deployed microservices on AWS EC2 instances, utilizing cloud architecture for scalability, high availability, and fault tolerance in production environments.
- Used Kafka consumer applications to process messages smoothly on a Kafka cluster setup, ensuring reliable message delivery and data streaming between services.
- Implemented proper logging for the backend using Log4J and monitored logs using AWS CloudWatch to identify and resolve production issues.
- Managed and configured application-level configurations and changes using Eclipse IDE, GitLab, and SourceTree for efficient version control and collaboration.
- Ensured continuous code delivery by collaborating with DevOps engineers and integrating development code with Jenkins for automated builds and deployments.

Infosys – Blue Shield of California • Senior Systems Engineer

Hyderabad, TS, India • 07/2021 - 08/2023

- Actively contributed to the design and development of reusable custom services for web applications by directly interacting with clients to discuss business requirements to work on the development of the projects.
- Followed Agile/Scrum methodology with 2-week sprints, participating in daily stand-ups, sprint planning, backlog discussions, and status meetings by utilizing Jira dashboards for project tracking and task management.

- Successfully worked on the client requirements for the v5 to v10 migrations, developing functional modules and services such as Claims services, Member Maintenance services, and Provider Authentication Services.
- Developed and maintained RESTful web services using Spring Boot and Spring MVC architectures, ensuring efficient API communication and seamless data exchange between microservices.
- Developed dynamic and responsive frontend components using AngularJS, HTML5, CSS3, and JavaScript, ensuring seamless integration with backend services and enhancing user experience.
- Worked on batch services such as Provider Account Management Batch and Provider Claims Batch to deal with LDAP Directory related functionalities.
- Integrated Elasticsearch filters into RESTful services to enhance search functionality and optimize claims data querying, optimized SQL queries for improved database performance, ensuring faster data retrieval and processing by 40% using Spring Hibernate.
- Implemented data binding and directives in AngularJS to create reusable components for scalable applications.
- Utilized AngularJS Services and Controllers for managing business logic, data models, and API integration for optimal application performance.
- Enhanced client-side routing and view management using AngularJS Router for a smooth, single-page application experience.
- Used Splunk logs to troubleshoot production issues, ensuring smooth application functionality.
- Deployed and managed services on Liberty WebSphere, ensuring high availability, security, and scalability for enterprise applications, checked code quality using SonarQube to maintain high development standards.
- Followed a structured CI/CD workflow for continuous integration and deployment using Jenkins.

LotVue • Software Developer

Hyderabad, TS, India • 01/2020 - 06/2021

- Migrated the web application from Native Spring MVC to Spring Boot for improved scalability, simplified configuration, and better performance.
- Designed and developed reusable custom services using Java Spring, Spring Boot, JSP, HTML, CSS, JavaScript, and MySQL for dynamic, responsive, and user-friendly web applications.
- Created dynamic web pages and implemented corresponding RESTful endpoints for importing and creating client data, ensuring seamless integration with backend services and MySQL database.
- Implemented a smooth Cognito sign-in and sign-up experience with forced password change, two-factor authentication (MFA), and integration with the authenticator app for enhanced security.
- Worked on modules like Work Orders, Invoices, and Access Management, ensuring they met business requirements and optimized application functionality.
- Integrated third-party APIs such as payment gateways and location services to extend application functionality and improve user experience, while using AJAX and JavaScript for seamless client-side interactions.
- Used AWS services such as CloudWatch for log monitoring, Cognito for authentication, IAM for role-based access control, MFA for enhanced security, EC2 for hosting, and S3 for object storage.
- Integrated Redis caching to improve performance, reduce database load for frequently accessed data, and optimize response times by caching frequently queried data.
- Used Azure DevOps for task management, repositories, user stories, and pull requests, ensuring efficient collaboration and streamlined development workflows.
- Followed Agile methodology with 2-week sprints, participated in stand-up meetings, sprint planning, and backlog discussions, and used Jira for project tracking, ensuring timely delivery of features and bug fixes.

EDUCATION

Master Of Science in Computer Science

Birmingham, AL, USA • 2023 - 2025

University Of Alabama at Birmingham

Bachelor Of Technology in Computer Science and Engineering

Hyderabad, TS, India • 07/2016 - 09/2020

Gokaraju Rangaraju Institute of Engineering and Technology - Jawaharlal Nehru Technological University • GPA: 4.0

CERTIFICATION

Database programming with SQL and Database Design – Oracle Academy

01/2018 - 03/2018

Data Science Intern – Xenon stack

07/2018 - 09/2018

Proficiency on DATA SCIENCE – DigitalNest

01/2021 - 08/2021
