WORK EXPERIENCE

NN Inc., Kentwood, MI / Remote

Applications Developer, September 2021 - present

- Designed and deployed 10+ enterprise-grade Oracle APEX applications used by 3,500+ daily users across multiple departments.
- Architected and maintained robust Oracle database schemas; performed DBA tasks including tuning and security audits.
- Resolved 300+ development-related helpdesk tickets, encompassing new features, bug fixes, and urgent data corrections.
- Engineered multi-language support, enhancing accessibility for international users.
- Developed 30+ automation tools and scripts using PL/SQL, Python, and PowerShell, significantly reducing manual workload.
- Integrated advanced JavaScript components into APEX to support enhanced UI/UX functionality.
- Led the migration of four legacy servers to Oracle Cloud Infrastructure, improving scalability and reducing operational costs.
- Actively participated in Agile ceremonies—sprint planning, daily stand-ups, retrospectives—ensuring timely and quality deliverables.

Fiat Chrysler Automobiles FCA, Detroit, MI

People Development Specialist Intern, March 2019 – August 2019

- Built 9 interactive training modules, adopted by 200+ employees and resulting in 550+ logged training hours in 3 months.
- Supported rollout of a new LMS, troubleshooting user issues and providing technical support to ensure platform adoption.
- Streamlined onboarding training processes, reducing annual costs by over \$140,000.
- Collaborated cross-functionally to deliver custom-tailored interactive training experiences.
- Facilitated weeklong training workshops for new hires and contract employees.
- Administered weeklong training workshops to new hires and temporary employees.
