PROFESSIONAL SUMMARY

Senior engineer (AI/Full-Stack) with 15+ years of experience building scalable applications, LLM systems, AI agents, and enterprise platforms. Founder of two technology companies delivering AI, ERP, and cloud solutions for clients across education, Finance, e-commerce, and government. Strong background in system architecture, automation, and high-traffic applications.

TECHNICAL SKILLS

AI / Machine Learning: AI Agent, LLM, RAG, LangChain, Vector Databases.

Frontend: React, Angular, TypeScript, JavaScript, HTML5, Responsive Design.

Backend & Languages: Node.js, Python, PHP, Java, ASP.NET, C#, SQL, PostgreSQL, MySQL, GraphQL.

Cloud & DevOps: AWS, Google Cloud, Docker, System Architecture, n8n, HubSpot, Jira.

PROFESSIONAL EXPERIENCE

Senior Software Engineer / Founder | LinhTruong.com

2018 – Present

- Engineered multi-agent AI systems for automated research and business intelligence.
- Developed a USDA-funded **computer vision system** using high-resolution microscope to determine sperm quality for Bull Breeding Soundness Evaluation (BBSE) (Grant #1033951).

Senior Software Engineer / Co-Founder | TheInnovationTech.com

2015 – Present

- Lead technical strategy for a full-service IT consultancy specializing in Cloud computing, AI, and Machine Learning.
- Develop mobile apps, websites, and AI solutions for diverse clients across multiple industries.

Senior Software Engineer | [HoverState](http://HoverState.com) (Acquired by SoftServe)

2022 – 2022

- Architected the 'Keys To Success' (KTSutah.org) platform for the Utah Education System.
- Enabled 160,000+ users to access critical scholarships, internships, and career resources.

Senior Software Engineer | [Jolt](http://Jolt.com) (Acquired by Digi International for \$145.5 Million)

2021 – 2022

- Optimized a business management system supporting 300,000+ users, achieving a 30% increase in operational efficiency.
- Developed AI-enhanced dashboards using React and Angular to enhance data visualization and control.

Founding Engineer / Co-Founder | QuickOnlineGame.com (Acquired by private investor).

2008-2015

- Developed and maintained web-based gaming applications, focusing on high-traffic performance and user engagement.
- Sold to private investor and move to Boston for graduate school.

- Led development of a proprietary WYSIWYG web design system and e-commerce solutions.
- Setup and managed in-house web and database servers.

- Built a stock investment system for Wasatch Global Investors (\$29 Billion AUM).
- Designed a data warehouse to manage and analyze historical data for 10,000+ daily stocks.
- Developed Machine Learning models for stock forecasting.

EDUCATION & CERTIFICATIONS

- Master of Information Technology | Harvard University
- MBA & BS in Information Technology | Western Governors University
- Certifications: Security+, Network+, Project+, A+, MCTS, MCP, CIW Pro.

KEY AI PROJECTS

1) AI Agent: <http://AIAgent.LinhTruong.com/>

A full-suite, multi-agent AI platform: designed for automated Sales SDR, marketing outreach, and back-office operations, accessible via both text and voice interfaces.

Enterprise-grade Architecture: featuring advanced load balancing, RAG evaluation, vector database integration, comprehensive audit logging, rate limiting, guardrails. Orchestrated using LangChain, MCP, PostgreSQL, and BullMQ.

Developed for AIMnow.AI.

Guide and Technical Architect: <https://aiagent.linhtruong.com/help>

2) AI-Native ERP(Enterprise Resource Planning): <http://erp.linhtruong.com/>

Developed for Naologic.

A full ERP suite CRM, Finance, HR, BI...). The system analyzes operational data and provides executives with strategic recommendations and automated action plans.

3) AGENTIC AI - AI BrainStorm Tool: <https://Brainstorm.linhtruong.com/>

A collaborative multi-agent system that synthesizes ideas, performs structured reasoning, fact-checks, and produces brainstorming and comprehensive research papers.

4) Computer Vision: <https://vision.linhtruong.com/>

Detect humans and objects on camera using MobileNet and CNNs(convolutional neural networks)

5) AI Investment Advisor: <https://InvestmentAdvisor.LinhTruong.com/>

Built for 8Figures.

An autonomous AI advisor that performs daily portfolio analysis, identifies risk exposure, and generates actionable recommendations to optimize ROI and strengthen long-term investment performance.

6) Air Quality Forecast using AI/ML: <https://traceaq.linhtruong.com/>

Project for TraceAQ.com, Real-time data from NASA.

7) Dashboard for React: <http://React.LinhTruong.com/>

ERP AI Agent dashboard using React, project for Jolt
