PROFESSIONAL EXPERIENCE

ProSciento

Sep. 2023 – Current

Clinical Trial Associate

San Diego, CA

- Assisting Clinical Project Managers (CPMs) with study start-up activities, including but not limited to study-specific form development, regulatory binder/investigator package set and ship up, communications and correspondence, regulatory document submissions, equipment or supply procurement or shipping.
- Assisting CPMs with internal and external meeting coordination and generates meeting agenda and minutes.
- Managing workflow for confidentiality disclosure agreement (CDA) review, submission, and execution, study form reviews by client, regulatory document receipt/review, and eTMF document upload, maintenance, and review.
- Acting as subject matter expert (SME) for the eTMF system, including serving as a business administrator, master list updates, validation management, and training for other ProSciento colleagues.
- Contributing to the periodic review of the study files for accuracy and completeness.
- Assisting with upkeep of the clinical trial management system (CTMS) site database and sending feasibility questionnaires to new prospective investigators and/or sites that may participate in a specific project, and with export of applicable study data for eTMF set up.
- Assisting CPMs with the selection of investigators, as well as with site issue resolution.
- Working with investigative sites and ad-hoc team members to complete all documentation necessary.
- Determining completeness and readiness to support clinical supplies/investigational product shipment.
- Aiding in laboratory sample reconciliation and sample management as needed.
- Assisting in preparing submissions for independent ethics committees (IECs) or institutional review boards (IRBs) by compiling the package of documents for IEC/IRB and forwarding to either the investigator or IEC/IRB as directed.
- Supporting the CPM with third-party vendor oversight activities.
- Assisting with electronic data capture (EDC) query resolution activities, particularly with sites external to ProSciento.
- Assisting clinical teams in evaluating the investigator's performance at closeout to facilitate future site identification activities.
- Aiding the CPM completion of all required tasks to meet departmental and project goals.

Lexitas Pharma Services

Oct. 2022 – Aug. 2023

Clinical Trial Assistant

Durham, NC

- Overseeing the electronic Trial Master File (eTMF) and ensuring its accurate and up-to-date representation of all essential clinical trial documents.
- Supporting eTMF review process by working closely with study teams.
- Preparing the eTMF for study and site activation.
- Performing QC of both internal and external documents, including essential documents and IRB applications.
- Opening, closing, and tracking eTMF file reviews for the study teams.
- Assisting study teams in tracking of essential study documents and periodic review to assure accuracy and completeness.
- Supporting eTMF closeout activities including reporting, exporting and data archiving.
- Assisting in preparing study-related documentation, such as investigator meeting materials, feasibility questionnaires, and study-specific training materials.
- Maintaining the Clinical Trial Management System (CTMS) to ensure accurate tracking and reporting of study progress and data.

- Updating CTMS with study-related information, including site activation status, monitoring visits, study deliverables, and study milestones.
- Uploading study deliverables and assigning training materials for study team members.
- Providing study teams with eTMF metrics, protocol-specific training reports, and CTMS updates.

LabConnect

Mar. 2022 – Oct. 2022

Senior SampleGISTICS™ Coordinator

Johnson City, TN

- Training and transitioning studies to new members in the department.
- Overseeing the statuses of projects assigned to colleagues.
- Reviewing and committing digital forms and managing sample tracking/forecasting per study contract and OSD specifications.
- Working with the courier to troubleshoot shipping issues.
- Performing form reviews/queries as well as monitoring, editing, and quality controlling forms as necessary.
- Managing site/lab digital pen usage and compliance.
- Escalating digital pen issues to appropriate group.
- Serving as the secondary and/or tertiary project contact with sponsors and contract research organizations to ensure appropriate communication channels are maintained.
- Performing QC of requested protocol-related documents before they are released to client.
- Maintaining internal and client-facing databases.
- Coordinating with sites, labs, and other departments to resolve queries.
- Troubleshooting edit checks, sample discrepancies, and digital pen issues.
- Managing site lists, patient trackers, and other protocol-specific records.
- Adapting to Laboratory Information Management System (LIMS) updates and new procedures.
