

Mahaveer Somasundaram

Toledo, Ohio — Open to Relocation

somumaha7@gmail.com — (419) 283-6111

Business Analyst — Data Analyst — Business Intelligence

PROFESSIONAL PROFILE

Data-driven Business Analyst with 3+ years of experience in business analysis, KPI reporting, and workflow optimization. MBA in Information Systems with strong expertise in requirements gathering, stakeholder communication, and translating business needs into technical solutions. Proficient in SQL, Power BI, Python, Excel, and AI-assisted analytics for predictive insights, anomaly detection, automation, and decision support. Adept at improving data accuracy, optimizing reporting processes, and delivering measurable operational impact.

CORE COMPETENCIES

Business Analysis: Requirements Gathering, Process Mapping (As-Is/To-Be), KPI Development, Gap Analysis, Root Cause Analysis, Workflow Optimization, Reporting Framework Design, Change Management Support

Data and BI Tools: SQL (Joins, Aggregations), Power BI (DAX, Data Modeling), Advanced Excel (Power Query, Pivot Tables), Python (Pandas, EDA), Tableau, KNIME

Systems and Collaboration: SharePoint, Microsoft Teams, ERP Concepts, Documentation & Compliance, Cross-Functional Communication

PROFESSIONAL EXPERIENCE

AllianceOne Inc.

Toledo, Ohio

Operations Agent – Business Systems & Reporting Support

Aug 2024 – Present

- Conduct requirements gathering sessions with operations teams to define reporting expectations and workflow improvements.
- Perform business process analysis to identify inefficiencies, automation opportunities, and data quality gaps.
- Develop Excel-based structured reports and KPI dashboards to support operational monitoring and performance tracking.
- Utilize AI-assisted tools to summarize trends, detect anomalies, and accelerate reporting workflows.
- Maintain system documentation and ensure compliance using SharePoint.
- Collaborate cross-functionally to resolve system-level issues and support change management initiatives.
- Improved reporting efficiency by reducing manual data validation errors through structured data checks.

Mophra

Tamil Nadu, India

Data Analyst – Business Insights & Digital Analytics

may 2023 – june2024

- Partnered with marketing and product stakeholders to gather business requirements and define measurable KPIs.
- Analyzed 12,000+ website session records to uncover behavioral trends and conversion bottlenecks.
- Conducted exploratory data analysis (EDA) and funnel analysis, contributing to a 10% increase in engagement rate.
- Built automated KPI dashboards in Power BI and Excel for campaign performance tracking.
- Queried structured datasets using SQL to generate actionable business insights.
- Automated weekly reporting workflows using Power Query, reducing manual effort by approximately 30%.
- Implemented structured validation rules to ensure reporting integrity and data accuracy.

SELECTED PROJECTS

Customer Payment Preference Prediction – Predictive Analytics

Python, KNIME, SQL, Excel, Power BI

- Designed and implemented predictive models (Logistic Regression, Decision Tree, KNN).
- Achieved 83.5% model accuracy using KNN for customer segmentation.
- Applied AI-based evaluation techniques for model comparison and optimization.
- Developed Power BI dashboards to visualize predictive insights and customer clusters.

Website Traffic & Conversion Analysis

SQL, Google Analytics 4, Excel, Power BI

- Performed EDA on multi-channel traffic data to identify engagement patterns.
- Recommended optimization strategies resulting in a 15% increase in session duration.
- Built executive dashboards to support marketing strategy and KPI monitoring.

EDUCATION

Master of Business Administration (Information Systems)

The University of Toledo, Ohio

Aug 2024 – May 2025

Relevant Coursework: Business Intelligence, Data Mining, Database Management Systems, Enterprise Systems, Strategic Management, Business Analytics

Bachelor of Engineering (Electrical & Electronics Engineering)

Coimbatore Institute of Technology, India

July 2019 – april 2023

CERTIFICATIONS

Google Analytics 4 (GA4) Fundamentals
Microsoft Power BI for Data Analysis
SQL for Data Analytics

TECHNICAL SKILLS

Programming: SQL, Python
Business Intelligence: Power BI, Tableau, KNIME
Analytics Tools: Advanced Excel, Google Analytics 4
Concepts: ETL, Data Cleaning, Data Validation, KPI Tracking, Predictive Analytics, ERP Concepts

AI & ADVANCED ANALYTICS SKILLS

AI-Assisted Analytics: Data summarization, anomaly detection, KPI narrative generation, trend identification

Predictive Modeling: Logistic Regression, Decision Tree, KNN interpretation, model evaluation metrics

Automation: AI-driven reporting automation, workflow streamlining, prompt engineering for analytics

Text & Behavioral Analysis: NLP-based sentiment analysis, behavioral pattern recognition

Decision Support: AI-enhanced insight generation for stakeholder reporting and business recommendations

ADDITIONAL INFORMATION

Open to relocation — Strong analytical and communication skills — Experience working with cross-functional and multicultural teams
