

MALLESWARI MADDINENI

+1 (623) 226-8284 malleswarimaddineni77@gmail.com

Professional Summary

- Results-oriented **Sr. Data Analyst** with 4+ years of experience delivering data-driven insights, predictive models, and BI solutions across banking, retail, and healthcare domains.
- Proficient in data analysis, cleaning, transformation, and statistical modeling with proven success in credit risk scoring, fraud detection, regulatory compliance, demand forecasting, and claims analytics.
- Expertise in **SQL (T-SQL, PL/SQL)**, **Python (Pandas, NumPy, scikit-learn, statsmodels)**, R, Power BI, Tableau, and cloud data warehouses (Snowflake, AWS Redshift).
- Experienced in developing ETL pipelines, KPI dashboards, forecasting models, and collaborating in Agile/Scrum environments with cross-functional teams.

Technical Skills

Programming:	Python (Pandas, NumPy, scikit-learn, statsmodels), R, SQL (T-SQL, PL/SQL), Excel (Pivot Tables, Power Query)
Visualization & BI:	Power BI, Tableau, Google Data Studio, KPI Reporting, Dashboarding
Databases & ETL:	Snowflake, AWS Redshift, Oracle, SQL Server, SSIS, Informatica, Data Warehousing
Cloud Platforms:	AWS (S3, EC2, Lambda), Azure (Data Factory, Synapse), GCP (BigQuery), Databricks
Analytics & Statistics:	EDA, Predictive Analytics, Time Series Forecasting, A/B Testing, Regression, Clustering, Classification
Collaboration:	Agile/Scrum, Git, JIRA, Confluence, Stakeholder Management, Cross-Functional Communication

Professional Experience

American Express

Mar 2024 – Present

Sr. Data Analyst

New York, NY

- Developed credit risk scoring models in Python for measuring default probability and streamlining credit approvals.
- Created KPI dashboards in Power BI/Tableau for fraud detection, delinquency, and portfolio risk metrics.
- Streamlined regulatory compliance reporting (SOX, Basel III, CCAR, Dodd-Frank) using SQL and ETL pipelines.
- Executed stress testing and scenario analysis for credit portfolios to assess liquidity risk and capital adequacy.
- Collaborated with AML/KYC teams to deploy analytics frameworks for suspicious transaction detection.
- Leveraged Snowflake and AWS Redshift for near real-time analytics and reporting.
- Forecasted liquidity needs using time-series modeling in R/Python to improve treasury and capital allocation.
- Designed benchmarking reports to track profitability and return on investment across products.

Target

Sept 2023 – Feb 2024

Sr. Data Analyst

Minneapolis, MN

- Cleaned, transformed, and mined retail datasets (POS, loyalty, ERP) with SQL and Python for analysis.
- Performed EDA, statistical analysis, and predictive analytics to analyze customer behavior and sales trends.
- Built dashboards in Power BI/Tableau for KPIs like sales uplift, inventory turnover, and revenue vs. forecast.
- Developed forecasting models to optimize supply chain and inventory planning, lowering stockouts by 15%.
- Created automated SQL pipelines and stored procedures to streamline reporting.
- Supported A/B testing and campaign performance analysis using Python (statsmodels, Seaborn, Matplotlib).

Tata Consultancy Services (TCS)

Apr 2021 – Jul 2023

Data Analyst

Hyderabad, India

- Performed EDA and predictive analytics to detect fraud patterns and improve claims forecasting accuracy.
- Built dashboards in Power BI for claims denial rate, payment trends, and turnaround time.
- Optimized SQL queries, joins, and ETL automation, increasing reporting accuracy by 20%.
- Collaborated with actuarial and finance teams to implement predictive models for credit risk.
- Automated compliance reports (SOX, IFRS, GAAP) with SQL and Power BI, ensuring audit readiness.
- Developed statistical models in Python/R for delinquency and portfolio credit risk forecasting.
- Delivered self-service BI dashboards for compliance and finance teams.

Education

Indiana Wesleyan University <i>M.S. in Data Analytics</i>	2023 – 2025 <i>Indiana, USA</i>
Vignan’s Nirula Institute of Technology and Science for Women <i>B.Tech in Electronics and Communication Engineering</i>	2018 – 2022 <i>Guntur, India</i>
