EDUCATION

Bachelor of Science - Computer Science, University of Maryland

Expected 2026

Relevant Coursework: Computer Networks and Security, Web Application Development, Java OOP, Advanced Data Structures, Programming Handheld Devices

EXPERIENCE

Software Engineering Intern

May 2025 – August 2025

RJIT Solutions

- Developed a new interactive, client-facing corporate website using HTML, CSS, and JavaScript to showcase company services and support new business acquisition.
- Resolved 20+ layout and scripting bugs on existing web applications, improving functionality and enhancing the user experience.
- Collaborated with the development team to actively maintain, debug, and enhance the codebase within an Agile workflow, using Git for version control, participating in code reviews, and contributing to sprint planning sessions.

Summer ORISE Fellowship

May 2024 – August 2024

Food and Drug Administration

- Automated workflows and processes in SharePoint, reducing manual overhead by implementing efficient custom solutions including the converting of Excel sheets into customized SharePoint lists.
- Designed and implemented a Power BI dashboard to provide department heads with an intuitive view of important data, enabling efficient decision-making and improving data accessibility for six (6) departments.
- Tracked and monitored data accuracy in multiple network databases and compiled and generated reports based on data related to product specific guidance's (PSGs).

IT Service Desk Technician

August 2021 – May 2022

University of Maryland – College Park

- Provided first-line technical support to end-users, troubleshooting hardware, software, and network issues to ensure minimal downtime and optimal productivity.
- Resolved 100+ technical support tickets using ServiceNow, reducing response time by 30%.
- Managed and resolved support tickets using ServiceNow and assisted in system updates, patches, and software installations to maintain system reliability and security.

SKILLS

Languages: Python, HTML/CSS, JavaScript, Java, C, Kotlin

Frameworks/Libraries: SQL Databases, MongoDB, Express, NodeJS, React, REST APIs

Tools: Git, VSCode, Android Studio, Linux, SharePoint, PowerBI

Certifications: AWS Certified Cloud Practitioner, CompTIA Security+

PROJECTS

[Stock Market Simulation Web App](#) | JavaScript, Node.js, Express.js, MongoDB, HTML/CSS, API

- Collaboratively developed a full stack Node.js web application simulating stock trading to learn without risk by integrating Alpha Vantage API to allow real-time trading.
- Used Express and stored the portfolio in MongoDB. Deployed using Render and includes a descriptive read-me file.

[Movie Ratings and Availability Web App](#) | Python, Flask, Render, API

- Built a Flask-based web application that lets users search for a movies IMDB rating and check if the digital HD release is available for streaming/download
 - Using 2 external APIs to populate information and deployed on Render with Gunicorn
-
