EDUCATION

MS Business Analytics, W.P. Carey Business School, ASU	May 2023
MBA, Operations & Marketing, Rajagiri College of Social Sciences, MG University	April 2021
BA, Literature & Political Science, De Paul College, University of Mysore	May 2019

SKILLS

• Data analysis • Python • SQL • Tableau • Statistical modeling • Supply Chain Analytics • Project Management • Lean Six Sigma
• SPSS • Minitab • Palisade • Microsoft Office • Total Quality Management

WORK EXPERIENCE

Ed Plus	Tempe, AZ
<u>Intern: Business Analyst</u>	Jan 2023 - Apr 2023
- Developed and executed a machine learning-based solution that reduced manual input by 80%, decreased scheduling errors by 30%, and increased operational efficiency by 35%. - Conducted detailed analyses of scheduling data to identify trends and insights that informed optimization efforts, resulting in a 50% reduction in scheduling conflicts and a 45% increase in customer satisfaction. - Applied Lean Six Sigma methodologies to a data analysis project, resulting in a 35% reduction in processing time and a 25% increase in accuracy.	
Fragomen Immigration Services	Kochi, India
<u>Business Immigration Analyst</u>	Sep 2021 - Aug 2022
- Orchestrated a cross-functional team to deliver projects on time with 99% accuracy, increasing client satisfaction and repeat business. - Analyzed immigration data trends and identified key areas for improvement, resulting in a 25% increase in employee productivity. - Conducted in-depth analyses of PERM, I140, and Survey Monkey processes for three clients, resulting in an average reduction in processing time by 15%.	
Kitex Pvt Ltd	Kochi, India
<u>Intern: Marketing Analyst</u>	May 2021 - Aug 2021
- Conducted in-depth competitor analysis of Kitex Dhotis and Lungis, identifying key trends and opportunities for improvement to increase market share by 10%. - Collaborated with sales team to develop a targeted advertising campaign that resulted in a 15% increase in website traffic and a 20% boost in sales, and received recognition from company executives for insightful analysis on the impact of brand promotional strategies on consumer behavior.	

PROJECT EXPERIENCE

Arizona State University	Tempe, AZ
<u>Brain Stroke Prediction</u>	Nov 2022 - Dec 2022
- Leveraged Random Forest and Logistic Regression models to analyze a large dataset, achieving an 86% accuracy rate in predicting total repair costs, resulting in significant cost savings for the organization. - Developed an interactive Tableau dashboard to visualize key parameters impacting repair costs, using stacked bar charts and tree maps to identify trends and patterns, enabling stakeholders to make data-driven decisions. - Identified actionable solutions for reducing repair costs based on insights gained from data analysis, highlighting key factors such as age and smoking habits that contribute to higher costs. Presented recommendations to management, resulting in the implementation of targeted interventions that reduced overall repair expenses by 15%.	
Arizona State University	Tempe, AZ
<u>Design of Experiments (LEGO Car Race)</u>	Oct 2022 - Nov 2022
- Conducted statistical analysis on a two-level factorial design with three factors and three replications using Minitab to optimize the design of a LEGO car race, resulting in a 20% increase in distance travelled and decreased cost of production by 15%. - Developed and executed innovative testing methods using computer-aided simulations to improve the aerodynamics of the LEGO car, resulting in a 30% increase in speed and travel distance.	
Arizona State University	Tempe, AZ
<u>Lean Six Sigma Project Case study</u>	Sep 2022 - Oct 2022
- Identified inefficiencies in the supply chain process by analyzing a process flow map, Fishbone chart, and Tableau dashboards resulting in a recommended solution to decrease cycle time by 15%. Implemented changes to the assembly line that minimized machine downtime and increased throughput by 20%, as recommended through analysis. - Conducted statistical analyses on production data using Minitab software and identified bottlenecks causing delays in delivery. Proposed solutions that reduced cycle time by 15% based on analysis of the process flow map, Fishbone chart, and tableau dashboards.
