

MEGHA SADASHIV

sr. Quality Assurance Analyst

COMPUTER ENGINEER GRADUATE SEEKING AN OPPORTUNITY TO BEST LEVERAGE EXPERIENCES

Chicago, IL • 708-581-6397 • sadashivmegha7@gmail.com

CAREER PROFILE

- Willing to work as a key player in a challenging & creative environment that would promise professional growth and self-development. Proficient at grasping new concepts quickly and productively utilizing them.
- Experience in working with Software Development life cycle (SDLC) and Software Testing Life Cycle (STLC) models - Waterfall, Agile/Scrum.
- Expertise in developing the Automation framework using both C# and JavaScript programming using OOPS concepts, Selenium, JUnit/TestNG, Eclipse, and Maven.
- Expertise in Building automation Scripts by using Selenium, MS Visual Studio, MS Test, Spec flow, Coded UI, Azure, and good expertise in using Annotations.
- Experienced in formulating Test Plans, Test cases, Test Scenarios, Test Approaches, and set up testing environments.
- Expertise in different types of testing like Automation testing, Manual testing, Integration testing, System testing, Smoke testing, Regression testing, Performance testing, Functional testing, Database testing, GUI testing, Web / UI, and User Acceptance Testing.
- Experience in working with open-source tools such as Selenium IDE, Selenium RC, Selenium Web Driver, Selenium Grid, Cucumber, JUnit, JIRA, and Eclipse.
- Good experience in Web Services testing both SOAP and REST services using SOAP UI, ReadyAPI and validated both XML and JSON formats using Contains, Not Contains, XPath Match, Compliance, SLA, and Security Assertions
- Expertise in developing test scripts using Selenium WebDriver executed automated test scripts & analyzed the results.
- Created Automated Test Scripts to test the functionality of the application using QTP.
- Excellent experience with source version control tools such as Subversion (SVN), GIT and Stash and build management tools like MAVEN.
- Extensively used XPATH, Regular expression and classes to perform UI actions. Exported output/reports for all automated testing results.
- Experienced in performing Database testing using SQL, JDBC, stored procedures, and triggers.
- Scheduling Test executions using CICD tools like Jenkins(Devops).
- Involved in Front End UI testing, Back End testing, BDD written SQL queries to retrieve, UAT and validate the data.
- Identified defects by finding the root cause and submitted defects in defect tracking tool using Team Foundation Server.
- Attended review meetings with Business Analysts, Developers and end users to understand the requirements.

EDUCATION

December 2023	Illinois Institute of Technology, Master of Science Information Technology and Management, Specialization: Software Development, GPA 4/4	Chicago, IL
May 2016	University of Pune, Bachelor of Science Computer Engineering, GPA 3.5/4	Pune, India

CORE COMPETENCE

Testing Tools	POSTMAN, Selenium IDE/RC/Web Driver/Grid Frameworks-Hybrid, Data-Driven, HP ALM, JIRA, Agile Dashboard, Cypress, Jenkins, TestNG, Junit, TestRail, Cucumber, SoapUI, Appium, RESTful API , BDD, Test Complete, Playwright.
Functional Testing	Automation and Manual testing, System Testing, Smoke Testing, Web testing, UAT Testing, Web Service Testing, Browser Testing, Integration Testing, Regression Testing, Database Testing, Smoke Testing, Exploratory Testing, Acceptance Testing, Accessibility Testing, Usability Testing, Black Box Testing, White-box Testing, Accessibility Testing
Programming Languages	HTML, CSS, XML, XPath, CSS Selector, Bootstrap, C#, .NET, JavaScript, Python, Java, React, Angular
Database	MySQL, PLSQL, SQL Server
Methodologies & MS Technology	Agile (Scrum), SDLC, STLC, Waterfall, ASP.NET, MVC, Web Services, Entity Framework, CI/CD tool i.e.Git Version Source Control, MS Azure, Outlook, Word, Excel, PowerPoint, MS Access, Visio, Azur DevOPs
Other Skills	Visual Studio Code, Maven, Eclipse, Apache Tomcat
Languages	English, Hindi, Marathi.

RESEARCH AND WORK EXPERIENCE

Sr. Software QA Manager **CVS Health, Rhode Island**

Jan 2022 – Aug 2024

- Implemented QA strategy and planning, effort estimation, and risk mitigation, preparing the test suite for QA execution.
- Provided expertise in test planning, debugging, test scope construction based on technical requirements, and risk management in production environments.
- Developed and executed test plans covering manual, automated, functional, system, regression, mobile, application, performance, usability, system integration, and data migration testing.
- Collaborated with business stakeholders to define UAT criteria and scenarios, ensuring the final product met user expectations and business requirements.
- Collected and analyzed feedback from UAT sessions, with Azure DevOps to document and prioritize user-reported issues for resolution.
- Managed test cases, test scripts, and execution schedules in Azure DevOps, providing clear visibility and traceability throughout the testing lifecycle.
- Implemented automated testing scripts within Azure DevOps, integrating them into the CI/CD pipeline for streamlined deployment and testing processes.
- Conducted performance testing to identify bottlenecks, recommending improvements to optimize application performance.
- Planned and executed performance and stress tests to evaluate system stability and scalability, providing insights for system enhancements.
- Analyzed system requirement specifications and developed high-level scenarios and detailed test cases using TestRail.
- Developed test cases based on user stories and functional requirement specifications using TestRail.
- Participated in software design reviews, providing input on functional requirements to improve overall product quality.
- Collaborated with business analysts, developers, and end-users to gather and understand requirements.
- Designed and developed comprehensive software tests to identify software problems and root causes, ensuring the highest quality standards.
- Actively participated in test case development and execution, leveraging knowledge of complex software architecture and design documents.
- Utilized QA automation tools such as Selenium, Cucumber, and JMeter with hands-on coding in Java and JavaScript.
- Automated front-end UI testing using TestNG and the Page Object Model.
- Created feature files and wrote scenarios using Cucumber for behavior-driven development.
- Created and maintained automation frameworks and scripts, developing proof of concepts on advanced technologies and tools.
- Experienced in SQL query creation, ranging from simple to complex, for SQL testing and coding purposes.
- Conducted backend testing using SQL queries to validate data integrity across databases like Oracle, Teradata, and DB2.
- Documented application defect triage and reported defects using bug-tracking systems like HP QC ALM, Rally, and SBM Team Track.
- Participated in iteration planning meetings, finalizing user stories and task estimations for two-week sprints.
- Attended daily stand-up and end-of-iteration meetings, adhering to Agile methodology.
- Demonstrated ability to multitask and support multiple projects, testing efforts, and releases simultaneously.
- Created CI/CD jobs for executing test scripts using Jenkins (DevOps).
- Conducted regression and smoke test suites on new application versions, analyzing automation results using the Robot Framework.
- Mentored junior team members, sharing expertise and promoting best practices in software QA and testing.

Software Test Engineer, WelSpot

Nov 2020 - Dec 2021

- Conducted comprehensive testing of a medical assistant chatbot application, ensuring accurate and real-time responses through rigorous functionality and data integrity checks.
- Extensive experience in using and troubleshooting various computer software and operating systems, including Windows and Ubuntu.
- Worked closely with stakeholders and Cat customers to grasp project requirements and user needs.
- Skilled in utilizing the Command Line and Terminal for system configuration, automation, and issue resolution.
- Applied technical knowledge in electrical systems and CAN protocols for diagnosing and resolving issues in heavy equipment. Utilized advanced troubleshooting techniques to ensure optimal equipment performance.
- Proficient in creating high-quality UX design solutions through wireframes, visual designs, flow diagrams, storyboards, site maps, and prototypes.
- Skilled in designing UI elements and tools such as navigation menus, search boxes, tabs, and widgets for digital assets.
- Experienced in testing UI elements like CTAs, banners, page layouts, page designs, page flows, and target links for landing pages to ensure optimal user experience.
- Adept at developing comprehensive UI/UX design strategies that align with brand objectives and enhance user interaction.
- Proficient in using design tools like Sketch, InVision, Visio, Adobe Creative Suite, as well as front-end technologies such as HTML, CSS (SCSS), and JavaScript (React).

- Demonstrated ability to create flow charts, low-fidelity wireframes, and high-fidelity design compositions to visualize design concepts and user flows.
- Leveraged experience with FIX protocol and understanding of algorithmic trading engines to conduct thorough testing of financial markets applications, ensuring accuracy and reliability in derivatives trading.
- Strong understanding of user experience principles and workflows, ensuring designs meet user needs and enhance usability.
- Effective collaborator with visual designers, content strategists, product managers, and development teams to translate requirements into visually appealing and functional designs.
- Proven track record of analyzing project requirements to identify user roles and specific use cases, translating them into interactive solutions.
- Ensured web applications met industry standards for accuracy and compliance, enhancing user experience for trading activities. This included incorporating real-time data analytics and integrating with trading platforms to provide seamless and reliable functionality.
- Strong communication skills, capable of interacting effectively with teammates, project stakeholders, and senior management to align design goals with project objectives.
- Familiar with creating and maintaining design systems to ensure consistency and scalability in design projects.
- Experienced in working closely with development teams to ensure seamless integration of design components and adherence to design standards.
- Developed & executed automated test scripts using Selenium WebDriver and Appium, increasing testing efficiency and coverage for mobile and web applications.
- Performed cross-browser testing on multiple platforms (IE, Chrome, Firefox) to ensure consistent user experience and compatibility, utilizing PHP, TestNG, and Jenkins.
- Validated chatbot integration with advanced web scraping tools to dynamically retrieve and present up-to-date medical information.
- Implemented and tested filtering systems within the chatbot to optimize information relevance and enhance user engagement.
- Conducted usability and performance testing for website features, including appointment scheduling (Amelia plugin) and gamified user interactions (Gamipress plugin).
- Ensured robust functionality of community and social features by testing the integration of the Buddy Boss platform.
- Collaborated with development teams to identify, document, and resolve defects, contributing to the continuous improvement of the application quality and user experience.
- Involved in peer reviews to ensure the correctness and completeness of test cases.
- Actively participated in Agile methodology, attending daily stand-up meetings and end-of-iteration reviews.
- Identified and documented defects by performing root cause analysis, utilizing Team Foundation Server for defect tracking.
- Adept in Microsoft Office Suite, including Outlook, and Teams, to support IT and A/V troubleshooting, enhancing operational efficiency and communication within the team.
- Provided technical support for IT and A/V systems, resolving issues promptly and maintaining high levels of service for end-user.
- Collaborated with Business Analysts, Developers, and end-users in review meetings to understand and validate requirements.
- Wrote and debugged SQL, SOL, and SAS queries for data verification and validation. Performed comprehensive front-end UI testing and back-end testing, including Behavior Driven Development (BDD) and writing SQL queries to retrieve and validate data.
- Scheduled and executed tests using Continuous Integration/Continuous Deployment (CI/CD) tools like Jenkins (DevOps).
- Run regression, UAT and smoke test suites on a new version of the application.
- Involved in setting up Automation framework using Selenium WebDriver.
- Used Selenium WebDriver with Page Object framework for Automation regression suite.
- Import web service operations using WSDL URL and validate in SOAP UI.
- Prepared Traceability Matrix in order to check all the requirements are covered
- Performed data integrity testing by executing questions and manually verifying the responses.

Quality Assurance Analyst, Syntech Solution

Jun 2016 – Oct 2020

(Functional end-to-end Testing, E-School Mobile & Restaurant Web App)

- Collaborated with the development team to develop test strategies, plans & cases, ensuring alignment with product requirements.
- Worked closely with stakeholders and Cat customers to grasp project requirements and user needs.
- Developed & executed test plans, assessing functionality, reliability, and quality against QA standards.
- Followed test scripts, performed various tests, and utilized automated testing tools to efficiently create, modify, and execute functional and regression test cases, identifying issues and defects encountered during testing.
- Contributed valuable insights during design and development phases, emphasizing high-quality standards for web & mobile applications, utilizing programming languages such as HTML, CSS, Bootstrap JavaScript, C#, Python, Java, React, Angular, etc.
- Performed functional, regression, and performance testing, contributing to process enhancement and optimizing CI/CD pipelines using Jenkins.
- Participated in code review meetings, supported training, & employed Git version control for seamless collaboration, and effective communication.
- Implemented daily project report preparation, client communications, performance metrics directly to stakeholders/manager of project and provided sign-off to the UAT as a lead achieving professional development, process improvement & project management skills up to 65%.

Mobile App Testing

- Utilized Appium to develop and execute automated test scripts, ensuring robust functionality, performance, and usability across multiple platforms.
- Supported Flutter mobile app development, ensuring consistent performance and appearance across multiple platforms.
- Used Bash scripting extensively for automating repetitive tasks, such as setting up test environments and performing data transformations.
- Performed functional, regression, and performance testing, enhancing overall test efficiency and effectiveness.
- Validated application functionality across different devices and operating systems to streamline the testing process, improve test accuracy, and facilitate early bug detection.
- Enhanced process improvement and project management efficiency by 60% through effective coordination, detailed planning, and continuous collaboration with cross-functional teams
- Experience in mentoring peers, providing support, and offering constructive feedback to enhance team performance and professional development

Web App Testing

- Collaborated with the development team to develop test strategies, plans, and cases, ensuring alignment with product requirements.
- Utilized Selenium WebDriver and Cypress for automated testing of web applications, optimizing test coverage and efficiency.
- Employed Cucumber to create BDD scenarios for automated tests, improving test coverage and early issue detection.
- Ensured cross-browser compatibility and enhanced user experience through collaboration with development teams.
- Performed manual testing with POSTMAN for RESTful APIs, validating HTTP requests such as POST, PUT, DELETE, and GET.
- Developed and maintained test tools and automation frameworks for internal developer tools, enhancing overall test efficiency.
- Participated in Agile methodologies such as STLC/SDLC and utilized JIRA for issue tracking.
- Contributed to ASP.NET Framework to test backend operations, server-side functionality, and business logic.
- Leveraged ETL tools to design performance metrics dashboards, tracking testing patterns to optimize product verification and release processes.
- Utilized playwright to design and implement test cases for various scenarios including cross-browser and cross-device compatibility, ensuring robust application performance and user experience.
- Applied Playwright's advanced features, including headless mode, network interception, and browser context management, to develop and optimize efficient, reliable test suites, enhancing test coverage and reducing execution time.
- Utilized statistical methods and data analytics to test trading GUIs, enhancing functionality and performance, and providing actionable insights to improve overall system efficiency.
- Reported analysis with 70% accuracy, performed transaction record checking of banking payments, collaborated skills, and analyzed risk assessment of simulators like MasterCard, Visa, FINSIM, Versa Test, and Online Payment methods.

ACADEMIC PROJECTS/PRESENTATIONS

Open-Source Programming Using Python:

- Proficient in Python, including control flow concepts, functions, and nested functions.
- Developed troubleshooting chart for diesel engines using Python.
- Skilled in working with lists, tuples, and dictionaries, implementing sorting functions.
- Conducted statistical analysis and created various graphs using Matplotlib.
- Implemented sorting and searching algorithms (Bubble sort, Shell sort, Quicksort).
- Proficient in regular expressions for web forms. Experienced in data analysis with Pandas, NumPy, and data visualization. Utilized Pandas, Seaborn, and Matplotlib for data analysis and visualization.
- Used Python pickle module for data storage and CRUD (Create, Read, Update, Delete) operations.
- Proficient in IDEs: Jupiter, Shell, Visual Studio Code.

○ ACADEMICS SKILLS/ CERTIFICATION

- **Diploma in Java Technology: Certification by Profound Educate Pvt. Ltd., Pune.**
 - Proficient in Java programming with hands-on experience in core Java, OOPs concepts, and Java libraries.
 - Learned data structure and algorithms, design patterns, & software development methodologies.
 - Experienced with databases & SQL queries using JDBC.
- **Certification by HRD: 30th January 2024 Lean Six Sigma and RPA Dynamics.**
 - Learned to improve employee and company performance by eliminating the waste of resources and process/product defects.
 - Acquired expertise in process optimization through Lean Six Sigma methodologies and gained proficiency in Robotic Process Automation (RPA) dynamics, enhancing efficiency and effectiveness in business operations.
- **Certification ISTQB: 10th January 2024 ISTQB Agile Tester**
 - ISTQB Agile Tester certification enhanced my understanding of Agile principles, methodologies, and practices. Gained proficiency in applying Agile testing techniques, such as iterative testing, continuous feedback, and collaborative teamwork, to ensure the delivery of high-quality software products.
