Professional Experience

Technical Business Analyst | Target, Tata Consultancy Services, Chicago IL | July 2022 - February 2024

- Collected and documented business requirements through stakeholder collaboration, reducing project delivery time by 15% cutting analysis-related costs by 10%, reduction in rework by 25% and improved development cycle efficiency.
- Created and documented 90% of project requirements, including user stories, Business Requirement Documents (BRDs), and Functional Requirement Documents (FRDs), ensuring stakeholder signoff before the development phase.
- Leveraged SharePoint for version control and collaboration, reducing documentation inconsistencies by 35% and improving accessibility for 15+ team members.
- Acted as a key bridge between client managers, SMEs, project managers, UX/UI teams, and development leads, leading to a 20% improvement in user experience.
- Created and maintained sprint reports, including Burn Charts, Progress Charts, and Sprint Backlogs, increasing sprint transparency and improving tracking accuracy by 40%.
- Reported and tracked 200+ defects, enhancements, and tasks for User Client Services via Jira, reducing backlog resolution time by 30%.
- Collaborated with 8 developers and data analysts, effectively providing MySQL database support which improved data processing speeds by 20%, ensuring that all SFS data requirements were met on time and with precision.
- Aided in troubleshooting and resolving 50+ MySQL database-related issues, ensuring the smooth operation of SFS and Workday applications, which resulted in a 25% reduction in system downtime and improved operational efficiency.
- Coordinated with the front office and 10+ stakeholders to continuously refine project scope, reducing scope creep by 25% and ensuring alignment with business objectives.
- Served as a liaison between business and technology teams, improving cross-functional communication and accelerating issue resolution by 30%.
- Authored and executed 50+ SQL queries to extract and analyze Ship From Store and Workday data, enhancing data-driven decision-making and reducing reporting time by 40%.
- Engaged with QA analysts in planning, execution, and monitoring of in-house Ship From Store (SFS) software testing activities, achieving a 30% reduction in post-release defects through comprehensive testing strategies.
- Partnered with the automation team to identify 100+ high-impact test cases for automation, reducing manual testing efforts by 35% and accelerating test execution.
- Conducted data validation and quality checks on over 100,000 SFS orders, ensuring accuracy and consistency of online order data in MySQL databases by developing and executing SQL queries, leading to a 15% improvement in order fulfillment accuracy.
- Supported User Acceptance Testing (UAT) by developing 500+ test cases, test scenarios, and test plans, increasing defect detection rates by 35% before deployment.

Lead Software QA Analyst | Frontier Communications, Tata Consultancy Services, Chicago IL | June 2021- July 2022

- Led a team of 8 QA analysts in strategizing, executing, and overseeing software testing activities, improving defect detection rates by 35%.
- Worked closely with automation engineers to define and refine automated regression test suites, improving release cycle efficiency by 30%.
- Designed and executed 150+ manual test cases within AccelQ for Pega System web applications, ensuring compliance with Frontier quality standards and user requirements, which contributed to a 25% reduction in production issues.
- Played a pivotal role in enhancing testing processes by identifying inefficiencies in 250+ test cases, steps, and scenarios through the implementation of test case reviews, leading to a 30% increase in testing optimization and a 20% faster execution rate.
- Analyzed large data sets (over 500,000 records) using SQL within MySQL to identify patterns, anomalies, and inconsistencies in customer data retrieved from Pega, which improved data accuracy by 15% and reduced system errors.
- Conducted functional, regression, integration, and performance testing throughout the software development life cycle,

ensuring the timely release of updates with zero critical issues post-deployment across 4 major software releases which improved software reliability by 35%.

- Identified and documented over 500 software defects using Jira, collaborating with development teams to resolve issues, streamlined the bug resolution process reducing defect backlog by 40%, and achieved a 25% reduction in critical defects for faster, smoother deployments.
- Mentored and coached QA team members, increasing testing efficiency by 25% through training on best practices, testing techniques, and tool utilization.
- Fostered collaboration with cross-functional teams (developers, product managers, business analysts), reducing requirement misunderstandings by 40% and accelerating issue resolution.
- Analyzed test results and delivered weekly reports to stakeholders, leading to a 20% faster turnaround for defect rectifications and software improvements.
- Participated in 20+ requirement analysis and review meetings, providing insights on testability, risk mitigation, and testing strategies, reducing post-deployment issues by 25%.
- Contributed to the development and maintenance of test documentation, including test plans, test cases, and testing status reports, improving testing efficiency by 15%.

Business Analyst | Staples, Chicago IL | June 2016 - June 2021

- Gathered and documented 100+ detailed business requirements across multiple projects, ensuring 95% accuracy in requirement interpretation.
- Analyzed business processes and identified areas for improvement, leading to a 15% increase in operational efficiency and reducing process bottlenecks.
- Collaborated with cross-functional teams (developers, product managers, and stakeholders) to ensure 100% alignment between business needs and technical solutions.
- Created and maintained 50+ project documentation artifacts, including business cases, process maps, and user stories, improving project clarity and execution.
- Facilitated 20+ stakeholder meetings and workshops, enhancing requirement-gathering efficiency and reducing project delays by 25%.
- Identified, documented, and tracked 100+ software defects using Jira, leading to the successful resolution of 95% of critical bugs before deployment.
- Collaborated with development and product teams, providing detailed feedback on issues that improved the resolution time of defects by 25%, ensuring on-time releases.
- Actively participated in daily stand-ups and sprint planning meetings as part of the Agile development process, helping improve team communication and reducing sprint backlog by 10% per iteration.

Business Analyst | Kroger, Chicago IL | March 2014 - April 2016

- Collaborated with senior analysts in gathering and documenting 50+ business requirements, ensuring 100% completeness and alignment with stakeholder expectations.
- Conducted market research and data analysis that supported 5+ strategic initiatives, leading to a 10% improvement in business decision-making accuracy.
- Evaluated process maps and flowcharts, streamlining business processes and improving workflow efficiency by 15%.
- Assisted in the preparation of weekly project reports and executive presentations, increasing stakeholder engagement and project transparency by 30%.
- Aided in the creation and execution of test plans for Mariano's POS Systems, contributing to the successful testing of 3 major POS software updates, which reduced checkout downtime by 15%.
- Executed exploratory testing on 100+ test cases, identifying and reporting unexpected behaviors and bugs, leading to a 20% improvement in system stability and customer satisfaction.
- Documented test results and provided comprehensive reports to senior QA team members, which facilitated a 10% faster resolution of critical issues during key releases.
- Gained hands-on experience with test management tools such as Jira and TestRail, enhancing defect tracking efficiency by 25% and contributing to improved team collaboration.

Skills

- Requirements Gathering • GAP Analysis • SWOT Analysis • Requirements Translation • Regression testing
 - System Testing • Integration testing • Unit testing • Acceptance testing • UI testing • Functional testing • Smoke Testing
 - API testing • Usability testing/UAT • Black Box Testing • Center of Excellence
 - Softwares: Jira, Pega Systems, Microsoft Office Suite, AccelQ, Postman, MySQL, Microsoft SharePoint, TestRail, ServiceNow
 - Traceability Matrix • Languages: Java, SQL • Methodologies: Agile, Scrum, Waterfall • SDLC
 - Testplanning, creation & execution • Defect Management • User Story/Bug management & creation
 - Test Documentation
-

Education

Bachelor of Science | Computer Science | Northeastern Illinois University | GPA: 3.7 | Chicago, Illinois | 2021
Associate of Science | Computer Science | City Colleges of Chicago | GPA: 3.5 | Chicago, Illinois | 2015
