

Moksh Vaghasia

Dallas, TX | +1 (214) 836-1679 | mavaghasia@gmail.com | [LinkedIn](#) | [GitHub](#)

SUMMARY

Detail-oriented Software Developer with strong problem-solving and analytical skills. Proven ability to enhance performance and efficiency through agile methodologies and cross-functional collaboration. Experienced with Java, TypeScript, and web development using the PERN stack. Passionate about delivering robust, highly available services with a customer-centric mindset.

EDUCATION

University of Texas at Dallas - Dallas, Texas

August'2023 – May'2025

Master of Science, Computer Science

GPA: 3.727/ 4.00

Pandit Deendayal Energy University - Gandhinagar, India

August'2019 – May'2023

Bachelor of Engineering, Computer Engineering

GPA: 9.47/10.0

PROFESSIONAL EXPERIENCE

Software Developer Intern | Tuzzin Infotech

Ahmedabad, India | August'2022 – July'2023

- Onboarded partner banks into the loan origination platform, driving a 40% increase in lending volume across tenants.
- Spearheaded the development of a React and Typescript customer-facing dashboard, enhancing user engagement by 18%.
- Streamlined the KYC module by integrating Sandbox APIs, cutting verification latency by 70% and enabling 45% faster onboarding.
- Built REST APIs in Node.js and Express, with PostgreSQL, for application status tracking, improving API performance by 35%.
- Engineered a Kafka pipeline in collaboration with data engineering to feed real-time API data, reducing issue triage time by 80%.
- Resolved 40 tasks following Agile methodologies, enhancing collaboration and time management in a fast-paced environment.
- Demonstrated expertise in Docker with Jenkins to establish a robust CI/CD with Octopus Deploy, accelerating release by 30%.

Machine Learning Intern | eInfochips

Ahmedabad, India | May'2022 – July'2022

- Trained an LSTM autoencoder on a multivariate IoT sensor to detect early failures, reducing unplanned downtime by 86%.
- Leveraged Optuna for hyperparameter optimization, reducing manual tuning time by 50% and reconstruction error by 12%.
- Simulated Sensor stream with Kafka and executed real-time inference, eliminating manual checks and enabling proactive alerts.

Frontend Developer Intern | Vision Infotech

Surat, India | May'2021 – July'2021

- Developed user-friendly interfaces using React for the educational service client, improving customer satisfaction score by 28%.
- Conducted user research and designed dashboards in Figma with clear workflows, increasing dashboard adoption by 20%.
- Implemented automated unit tests using Jest, increasing code coverage by 60% and reducing bugs through rigorous testing.

PROJECTS

EasyAI

- Built EasyAI, a full-stack SaaS with writing and image tools, and a collaborative prompt-visible gallery for reproducible learning.
- Integrated Google Gemini for writing and Clipdrop for image generation and editing to power in-app tools.
- Enabled secure growth using Clerk authentication and subscription, with plan-based access, usage limit, and protected routes.
- Developed RESTful APIs using Node.js and Express, deployed backend on Vercel, with Neon serverless database and Cloudinary.
- Designed and launched the website using React.js, Tailwind CSS for a better customer experience with a user-friendly Interface.

Semantic Search Engine using Sentence-transformer

- Built a search engine with over 200k crawled webpages and Sentence transformer (all-MiniLM-L6-V2) for contextual accuracy.
- Led the clustering module in a team of 5, improving search relevance and dropping query latency to an average of 200ms.
- Designed a multiprocessing data pipeline in Python to clean and lemmatize HTML content from MongoDB, for high-quality input.
- Integrated Rest APIs, Flask to support dynamic front-end toggling between K-means and single linkage clustering strategies.

SKILLS

Languages: Java, Python, TypeScript, SQL, C, Scala, HTML/CSS

Tools & Technology: React, Jest, Jira, Git, Vercel, Jenkins, Docker, Postman, Kafka, AWS (EC2, S3, Amplify), PyTorch, Pandas, Linux

Database: MongoDB, PostgreSQL, MySQL, Neon

Frameworks: Node.js, Express.js, Flask, Bootstrap, Tailwind CSS, Spark

Coursework: Artificial Intelligence, Machine Learning, Computer Vision, Data Structures & Algorithms, Network Security, Big Data
