EDUCATION

The University of Texas at Dallas

December 2024

Bachelor of Science, Information Technology Systems

Concentration: Business Intelligence and Analytics

SKILLS

Certifications: IBM Data Analytics, AWS Cloud Practitioner

Tools: Power BI, Tableau, AWS, MS Excel, MS Word, MS PowerPoint

Languages: Python, Java, SQL

PROFESSIONAL EXPERIENCE

Noorishment, Plano, TX

August 2024 – December 2024

IT Data Intern

- Managed and maintained donor and volunteer data exclusively in Excel, designing structured tracking sheets and pivot tables that improved reporting speed by 25% and supported \$50K+ in grant applications for community initiatives.
- Tracked and analyzed 15+ program metrics using Excel formulas and charts, then collaborated with program managers to prepare executive summary reports that influenced 3 key operational decisions.
- Streamlined cloud file storage by implementing a standardized folder and naming convention system, which was adopted by 3 departments and reduced file retrieval time by 40%, enabling smoother cross-team collaboration.

Makka Auto Sales, Dallas, TX

May 2022 – August 2023

Data Analyst Intern

- Performed in-depth sales forecasting and inventory analysis using Excel and Power BI, creating visual dashboards that reduced overstock by 15% and boosted overall sales by 10%.
- Built and implemented financial models in SAP and Oracle to identify \$25K+ in revenue leakages and pinpoint operational inefficiencies, which improved gross margin by 12%.
- Automated weekly data cleaning and aggregation workflows with Python, leveraging pandas for ETL tasks that improved data accuracy by 20% and saved 5+ hours weekly for the finance team.
- Collaborated with sales and finance teams to design and deploy Power BI dashboards, transforming 100+ rows of raw data into interactive visual reports that reduced reporting time by 30% and accelerated decision-making.

PROJECT EXPERIENCE

NBA SQL Project

June 2025 – July 2025

- Conducted an independent analysis of 10+ NBA seasons of player and team performance data using MySQL, writing advanced queries with JOINS, CTEs, and aggregations to identify trends that improved team efficiency insights by 15%.
- Developed Power BI dashboards visualizing 50K+ records of game stats and performance metrics, enabling interactive exploration of player rotations, performance trends, and team strategy insights.
- Cleaned and structured raw datasets to ensure data integrity and analytical accuracy, applying real-world database management and data visualization practices.

Centralized Database Platform, Senior Capstone Project

August 2024 – December 2024

- Designed and deployed a centralized database for the Food Trucks Association of Canada, consolidating 3.86M records from 150+ cities and ensuring high data integrity and scalability.
- Leveraged AWS RDS and EC2 to host and optimize a SQL database that reduced query times by 40%, improving access for multiple stakeholders.
- Developed interactive dashboards and visualization tools to help regulatory partners quickly analyze city-specific data, increasing the efficiency of decision-making for 10+ partner organizations.
