

MUSHAF YOUNUS

LEAD SOFTWARE ENGINEER

+92 336 3309781 | mushafyounus.work@gmail.com | [LinkedIn](#) | [Portfolio](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Lead Software Engineer with 5+ years of experience building scalable backend and full-stack systems. Expert in Java Spring Boot microservices, GraphQL, Node/NestJS, Angular/React, and AWS serverless (Lambda, Amplify). Strong background in API security (OAuth2, JWT, ADFS), caching (Redis), relational databases (MySQL, JPA), and CI/CD. Proven leader delivering performance improvements and mentoring engineering teams in Agile environments.

PROFESSIONAL EXPERIENCE

Lead Software Engineer, Codesy Consulting.

Nov 2024 – Present

- Developed modular microservices using Java, Spring Boot, and Lombok, boosting scalability, maintainability, and deployment efficiency.
- Built GraphQL APIs with JPA and integrated with Angular frontend to optimize data fetching and enhance client performance.
- Implemented secure authentication with OAuth2, JWT, and ADFS, ensuring consistent access control across backend and frontend.
- Enhanced system performance using Redis caching, streamlined MySQL queries, and improved API response times.
- Led code reviews, mentored 5+ developers, and enforced best practices, increasing team velocity and code quality.
- Upgraded responsive Angular modules with reusable components, reactive forms, and lazy loading, resulting in a better UX and faster load times.

Full-Stack Developer, Codesy Consulting.

Aug 2023 – Oct 2024

- Integrated DocuSign API to automate contract workflows, reducing document processing time by 30%.
- Migrated Angular applications from v14 to v15, enhancing maintainability and leveraging framework improvements.
- Implemented serverless backend functions (AWS Lambda, TypeScript) to offload scheduled and event-driven tasks.
- Designed and deployed AWS Lambda functions in TypeScript to automate workflows and integrate external services like MailerLite, leading to optimized application performance and reduced manual processes.
- Developed and upgraded backend APIs using Java Spring Boot for a microservice-based internal management system, enhancing functionality and efficiency.
- Mentored junior engineers on code quality, version control, and release processes.

Software Engineer, Cyber Solutions Technology.

Sep 2021 – July 2023

- Introduced a GraphQL exception handler, developing comprehensive documentation for team reference and future scalability.
- Transitioned REST APIs to GraphQL, raising data query performance by approximately 25%.
- Expanded reusable Angular components to standardize UI and accelerate feature delivery.
- Enforced Redis caching strategies to reduce backend response times and lower database load.
- Managed discussions with stakeholders, clarified application flow, and scoped new functionalities.
- Designed ERDs and maintained feature documentation in Confluence, enabling clearer stakeholder communication and process improvements.
- Refactored a monolithic Spring Boot backend into modular microservices, improving scalability, maintainability, and deployment flexibility.
- Wrote thorough JUnit tests to ensure functionality, reliability, and maintainable code.

Junior Software Engineer, Strap.AI.

Oct 2020 – Aug 2021

- Enhanced CV templates with CSS, making them more user-friendly, leading to a 25% increase in template usage.
- Spearheaded the development of a comprehensive construction-industry platform.
- Refined the admin panel, allowing clients to manage website content, images, and hiring alerts, resulting in streamlined processes.
- Optimized the website for performance, leading to a 20% decrease in page load times and improved user satisfaction.
- Collaborated closely with clients to understand project requirements, ensuring the delivery of tailored solutions that exceed expectations.
- Applied robust security measures across websites, protecting user data and ensuring a secure online environment.
- Utilized agile methodologies to manage project timelines and deliverables, resulting in timely and successful projects.

Software Engineering Intern, Hashtag Digital.

June 2020 – Sep 2020

- Completed assigned training courses within deadlines, demonstrating discipline and quick learning.
- Provided regular progress updates to supervisors to ensure transparency and effective communication.
- Engaged in practical exercises and hands-on practice to reinforce learning and apply new skills.

EDUCATION

Bachelor of Science (BS) in Computer Science

IQRA University

2021

CERTIFICATION AND TRAININGS

- Java Unit Testing with JUnit & Mockito
- MySQL
- Microservices with Spring Boot and Spring Cloud
- Java Functional Programming with Lambdas & Streams
- Git & GitHub Desktop (GUI)
- Angular Components, Data Binding & Routing
- Advanced CSS and Sass
- Team Workflows in Jira

TECHNICAL SKILLS

- **Languages & Runtimes:** Java, TypeScript, Node.js
- **Backend & Frameworks:** Spring Boot, Spring Data JPA, NestJS, Express, GraphQL, REST
- **Frontend:** Angular, React, TypeScript, HTML, CSS, Sass
- **Cloud & DevOps:** AWS Lambda, AWS Amplify, Docker, GitHub Actions, CI/CD
- **Databases & Caching:** MySQL, Redis, ERD modeling
- **Security & Integration:** OAuth2, JWT, Microsoft ADFS, DocuSign APIs, SSO
- **Testing & Tools:** JUnit, Mockito, Postman, Swagger, Git, Bitbucket
- **Project Tools:** Jira, Confluence, Agile/Scrum
