

Naeem Khan

Full Stack .NET Developer

✉ naeem.khadev@gmail.com ☎ (516) 212-3693 📍 Seaford NY, USA

PROFILE

Full Stack .NET Engineer with 8 years of experience delivering high-performance web applications and Enterprise solutions. Highly skilled in designing and developing scalable systems using .NET Core, C#, ASP.NET, Angular, JavaScript and SQL Server. Proven track record of building end-to-end solutions, from intuitive front-end interfaces to robust back-end services, with a focus on clean architecture, performance optimization and Azure-based cloud deployment. Experienced in Agile environments, team leadership, and implementing DevOps best practices. Successfully led the full development lifecycle of 10+ projects, consistently delivering high-quality software.

SKILLS

Backend Technologies : C#, .NET 6/7/8/9, ASP .NET Core, MVC, Blazor, Web APIs, Python

Frontend Technologies : Angular (18+), Ember.js, Redux, React 18, TypeScript, JavaScript, HTML/HTML5, CSS/CSS3

Database & Data Management : SQL Server, PostgreSQL, Oracle, MongoDB, Redis, Azure Cosmos DB, NoSQL

Messaging & Event-Driven Systems : Azure Service Bus, Kafka, RabbitMQ

Cloud Platforms & DevOps : Azure (AKS, Functions, DevOps), AWS, GCP, Docker,

Testing & QA Tools : xUnit, NUnit, Selenium, Playwright, Postman, Swagger

Core Competencies : REST / GraphQL APIs, OAuth2, CI/CD Automation, Clean Architecture, HL7, FHIR, EDI X12

Project & Collaboration Tools : Jira, GitHub, Bitbucket, Azure DevOps, Trello, Slack, MS Teams, Zoho

PROFESSIONAL EXPERIENCE

Full Stack .NET Developer

HealthBridge Tech

05/2024
United States

- Led the modernization of enterprise healthcare payer and provider platforms, focusing on security, scalability, and regulatory compliance. Delivered cloud-native .NET solutions that improved system reliability and supported high-volume healthcare transactions.
- Migrated legacy ASP.NET, VB.NET, and .NET Framework applications to .NET 8/9 microservices using ASP.NET Core, Blazor, and Entity Framework Core. Reduced technical debt, improved deployment velocity, and enabled horizontal scalability.
- Designed and implemented secure REST, GraphQL, and gRPC APIs using JWT, OAuth2, and OpenID Connect. Enabled secure interoperability between internal systems and third-party healthcare platforms.
- Built event-driven architectures using Azure Service Bus, Kafka, and RabbitMQ to process HL7, FHIR, and EDI X12 messages. Reduced transaction latency while improving fault tolerance and data reliability.
- Developed responsive provider and member portals using Angular (16+), React 18, TypeScript, HTML5, and CSS3. Improved accessibility and usability across desktop and mobile devices.
- Designed and implemented microservices-based architectures using .NET Core, enabling scalable and maintainable healthcare applications.
- Developed data access layers with Entity Framework Core, optimizing database queries and ensuring high-performance interactions with SQL Server and NoSQL databases.
- Implemented seamless API integrations between frontend and backend systems,

Software Engineer

04/2021 – 05/2024

United States

Optum

- Designed and delivered scalable healthcare SaaS applications using C#, .NET Core (3.1–6.0), MVC, and microservices architecture. Supported clinical, billing, and administrative workflows for multiple healthcare clients.
- Developed RESTful APIs using ASP.NET Core to exchange JSON and XML data across distributed systems. Ensured high availability and consistent data flow between frontend and backend services.
- Optimized databases including SQL Server, PostgreSQL, Oracle, MongoDB, and Redis using indexing and query tuning. Improved application performance and reduced query execution times.
- Implemented bulk data processing and validation pipelines to handle high-volume healthcare data ingestion. Improved processing efficiency and data accuracy.
- Automated CI/CD pipelines using Azure DevOps and Jenkins, leveraging Docker for containerization. Reduced manual deployment effort and increased release reliability.
- Managed and deployed containerized healthcare applications using Kubernetes, ensuring high availability, scalability, and fault tolerance across cloud environments.
- Implemented CI/CD pipelines with Jenkins, automating builds, testing, and deployments to accelerate release cycles and maintain code quality.
- Developed robust data access layers using T-SQL and LINQ, optimizing database queries and stored procedures for high-performance applications.

Associate Software Engineer

01/2018 – 04/2021

United States

MediAxis Solutions

- Developed multi-tier ASP.NET MVC applications using C# and Entity Framework, following clean architecture principles. Delivered maintainable and scalable solutions aligned with business requirements.
- Designed secure business logic layers and optimized SQL Server databases using stored procedures and indexing. Improved application performance and data consistency.
- Built and consumed SOAP and REST web services to integrate enterprise systems and third-party services. Enabled reliable data exchange across platforms.
- Enhanced user interfaces using AngularJS, jQuery, AJAX, HTML5, CSS3, and Bootstrap. Reduced page load times and improved user interaction.
- Supported migration from legacy ASP applications to modern ASP.NET MVC and .NET Core frameworks. Improved long-term maintainability and prepared systems for cloud adoption.
- Monitored application performance and system health using Grafana dashboards, enabling proactive troubleshooting and improved operational efficiency.
- Enhanced UI/UX using SASS/LESS, CSS3, and responsive design techniques to deliver modern, maintainable, and user-friendly interfaces.

EDUCATION

Bachelor of Computer Science

PROJECTS

Well 365

Well 365 is a comprehensive healthcare and wellness platform that enables year-round patient care, wellness management, and personalized health insights through a secure, user-friendly digital experience.

Psychease

Psychease is a mental health and wellness platform that delivers accessible, personalized psychological support through secure, user-friendly digital tools and resources.

Dealty

Rental marketing for landlords & agents. Simplifies listing & syndication to Zillow, Apartments.
