Summary

Versatile 4+ Years software developer, Angular and ASP.NET core, Web APIs, .Net Full Stack Developer, experienced in both front-end and back-end development, particularly within .NET frameworks. Adept in crafting interactive web applications utilizing technologies such as HTML, CSS, and JavaScript along with advanced .NET practices, including RESTful APIs and Agile methodologies. Committed to delivering high-quality, scalable solutions while collaborating effectively in cross-functional teams. Aims to leverage extensive software lifecycle management and development expertise to contribute to crafting impactful solutions in target projects.

Technical Skills

- **Microsoft Technologies:** .NET Framework 4.6/4.7, ASP.NET, ADO.NET, ASP, ADO, WCF, LINQ
- **Programming Languages:** C, C++, C#, Java, Knowledge in Python, Razor
- **Web Scripting Languages:** JavaScript, JSON, jQuery, CSS, HTML, DHTML
- **Web Technologies:** ASP.NET, HTML5, CSS3, Java Script, JQUERY, Angular13, Angular11, Angular8, XML, JSON, XAML, XSL, XSLT, Kendo UI, Angular JS, Ajax, Web Services, Boot Strap
- **Database Technologies:** SQL Server (Stored Procedure, Triggers, User Defined Functions, Views), T- SQL, PL/SQL, ODBC, MySQL, SQL Server client management studio, Oracle
- **XML Technologies:** XML, XHTML, DHTML, SOAP, WSDL, Web Services
- **Software/Tools:** Jenkins, Postman, Jira
- **Code Quality, Futures & Collaboration :** SonarQube, Pair Programming, Mentoring, Code Reviews
- **Testing Tools:** MS-Test, NUnit, Mocking, J unit, Jasmine
- **Version Control Tools:** GIT

Professional Experience

State of New Mexico

Sep 2025 - Present

Software Developer

Santa Fe, NM

- Enhanced user engagement and reduced development time by developing enterprise web applications using Angular 17 and TypeScript, with innovations such as reusable components, reactive forms, and dynamic interfaces with Kendo UI.
- Created and consumed RESTful APIs using ASP.NET Core Web API to handle business logic and data operations, enhancing system integration and data processing efficiency
- Implemented Entity Framework Core (Code First) for database modeling and performed CRUD operations using LINQ queries on SQL Server 2019, which streamlined database management and improved data retrieval speed
- Designed responsive front-end layouts using Bootstrap 5, HTML5, and CSS3 for cross-browser compatibility and mobile optimization, resulting in a 20% increase in mobile user satisfaction
- Secured APIs with JWT-based authentication and role-based authorization, ensuring application-level access control, which enhanced security and compliance with industry standards
- Used Swagger/OpenAPI to document RESTful APIs for seamless integration with frontend and QA teams.
- Participated in full Agile/Scrum lifecycle including sprint planning, daily stand-ups, reviews, and retrospectives using JIRA.
- Used Git for version control, managing feature branches, pull requests, and maintaining code integrity across environments.
- Conducted code reviews and performed unit testing to maintain code quality, performance, and scalability.
- Implemented global SCSS styles and shared layout components, significantly reducing development effort and ensuring consistency across all screens.
- Worked closely with cross-functional teams to translate business requirements into technical specifications and functional UI flows.

Epam

Feb 2021 - Jan 2023

.Net Full Stack Developer

Hyderabad, India

- Designed and developed complex features using .Net and Oracle, from requirement gathering to production, ensuring seamless integration across the SDLC
- Migration of complex legacy applications from .Net Desktop app to .Net core
- Development and maintenance of multiple interrelated projects, written in different technologies (.Net, .Net core, Java, Node.js, Angular)
- Deliver within timelines without compromising code quality.
- Migrated Legacy application which was on HTML, CSS to Angular13.
- Collaborated with cross-functional teams to ensure projects aligned with business requirements and met deadlines, improving project delivery efficiency
- Maintained legacy applications built on HTML, CSS, Vanilla JavaScript, JQuery, AJAX, and ASP.NET, enhancing system stability and performance
- Demonstrated technical leadership by mentoring junior developers and conducting code reviews, which improved team coding

standards and efficiency

- Created a team and managed the project from scratch using Agile methodologies, resulting in successful project delivery on time and within budget
- Participated in scrum ceremonies and regularly connected with business stakeholders to understand objectives, ensuring alignment and clarity in project goals
- Contribute to architectural decisions, optimize code for performance, and troubleshoot complex technical issues/ Client issues.
- Documented features and root cause analyses, and maintained CI/CD pipelines in Jenkins, enhancing deployment reliability
- Maintained the code quality metrics using Sonar Qube, and Improved code quality by fixing bugs suggested by sonar.
- Increased Unit test coverage of the existing application from 53% to 78%.
- Debugged critical performance issues, resulting in faster application response times

Tata Consultancy Services

Apr 2019 - Jan 2021

Software Engineer

Bangalore, India

- Participated in all phases of the software development life cycle (SDLC), including designing, coding, testing, and implementing the application using Scrum (Agile) methodology.
- Generated more accurate project estimates using historical data and project management tools, ensuring the project stayed on schedule and met deadlines
- Worked on designing the architecture of APIs and built a RESTful Web API service with ASP.NET Web API to generate data which was then ingested by Angular 10 on the front end.
- Created N-tier web applications in a .NET environment using C#, ASP.NET CORE Web API, Console Applications, Web forms, and Win Forms with Visual Studio and SQL server.
- Designed and developed RESTful APIs using ASP.NET Web API to enable seamless communication between client applications and server systems.
- Used MVC Framework for developing the application as it will distribute the development in Model, Views, and Controllers and it supports stateless development.
- Constructed the front end with Bootstrap, HTML5, CSS, AJAX, JavaScript, and Angular (Typescript).
- Constructed an application using Web API, Entity Framework, and SQL Server as the backend.
- Designed and built the Data access layer by integrating Entity Framework.
- Implemented JWT Token based authentication to secure the .NET Core Web API and provide authorization to different users.
- Designed and developed multiple C#.NET Classes to implement business logic and event handling, enhancing application performance and reliability
- Created Stored Procedures, Functions, Triggers, and Views using SQL, improving data processing efficiency and system performance
- Developed Single Page Applications (SPAs) using Vue.js and .NET, providing users with seamless and responsive web applications.
- Utilized testing tools like Postman, SOAP UI, and Swagger UI for effective API testing, documentation, and validation, ensuring high-quality and reliable software delivery
- Monies, contributing to sprint planning, backlog grooming, and retrospectives, which improved project management efficiency

Education

University of North Texas, Denton, Texas

May 2025

Master's, computer science

Achievements & Awards

- Recognized for exceptional contributions across various projects, receiving awards such as the Pat on the Back, Debutant Award, Quarterly Hero Award, and Customer Award.
- Achieved 1st place in the EngX Hackathon hosted by EPAM Systems, demonstrating strong problem-solving and full stack development skills.
- Secured 1st prize in a Hackathon conducted by Naresh Technologies, showcasing innovative thinking and technical excellence under time constraints.
- Ranked 1st in the CODE RACE coding competition, showcasing advanced algorithmic proficiency and rapid problem-solving abilities.
