WORK EXPERIENCE

Fiber Designer II Contractor, Comcast (Remote)

June 2023-Present

- Responsible for creating and maintaining the integrity, and continuity of HFC designs, and construction OSP/ISP documentation at the post cut phase (As-Built).
- Performed design QA to validate data accuracy, improve design efficiency, and ensure construction-package compliance. This required reviewing HFC designs, splice and pre-term documentation, and all other necessary construction deliverables.
- Frequently updated and managed system maps, keys, and design files for the benefit of various departments. This includes the development of training materials and examples aimed at enhancing operational processes.
- Regularly enforced, reviewed, and updated billing information at construction, and post design phase (As-Built).
- Lead weekly business partner meetings to review and discuss workflow process, SLAs, and customer performance.

Fiber Design Specialist, Cyient (Remote)

June 2022-June 2023

- Ensured quality control of construction prints, and design through deployment of existing knowledge of splicing techniques and cable documentation.
- Allocated tasks to the offshore team as well as to onshore team members based in Canada and India, aiming to enhance teamwork, optimize workload distribution, and reduce expenses.
- Acquired knowledge of aerial, and underground processes through collaboration with AT&T, LTS, Rogers, and PomeGran.
- Utilized multiple data analysis applications to design fiber to the home (FTTH) and fiber to the business.
- Responsible for the precise creation and evaluation of the bill of materials to guarantee financial accuracy.

OSP Engineer, MCG Utilities, Inc. (West Chester, PA)

October 2021-June 2022

- Developed aerial and underground fiber route maps/designs to verify that all existing underground and serial facilities are correctly located per customer records, city records, and field conditions.
- Utilized the QA/QC process to ensure quality of OSP Engineering design packages.
- Acquired extensive knowledge of standards and specifications of utility Right-Of-Way owners.
- Developed user knowledge of GIS, Right-of Ways, Catapult Pro programs, and telecom infrastructures (fiber).

MILITARY SERVICE

August 2020-February 2021

Army National Guard Infantryman (Fort Benning, GA)

CERTIFICATIONS

Construction Management LinkedIn Learning

December 2024

- *Courses:* Project Management, Construction Management: Concrete Construction, Introduction to Lean Construction, Managing Risk, Planning and Scheduling, Project Delivery Methods, Technology on the Jobsite.

Fundamentals of Network Communication Coursera: University of Colorado System

December 2024

Wireless Communication for Everybody Coursera: Yonsei University

August 2024

Certificate From The Police Academy (ACT 120): Delaware County Community College

December 2019

SKILLS AND AWARDS

Awards: Most Valuable Performer-Bronze (February 2024), Certificate of Recognition for Scalable Support in Beltway Region (January 2024), MeBeyondWork Blogathon (March 2023).

Skills: Spatial Net, AutoCAD, Iris, Geographical Information Systems (GIS), ArcGIS, Qgis, IKE, P2/Salesforce, Adobe Acrobat.
