Professional Summary

Detail-oriented and technically skilled IT professional with hands-on experience in technical support, endpoint troubleshooting, and networking. Strong ability to resolve hardware, software, and networking issues while delivering excellent customer service. Proficient in device provisioning, Windows and Linux systems, Active Directory, and A/V support. Seeking to leverage technical expertise and problem-solving skills as an IT Helpdesk Technician.

Experience

Technical Support Agent | TOTO, Ontario, CA July 2023 – Present

- Provide tier 1 & 2 support via phone, email, chat, and in-person for hardware, software, and network issues.
- Troubleshoot and resolve Windows OS, endpoint, and application problems in line with service level expectations.
- Assist with hardware setup, installation, and configuration, including desktops, laptops, and networked printers.
- Collaborate with engineering and product teams to address escalated or complex technical cases.
- Support end-user training, system usage guidance, and A/V setups for smooth operations.
- Maintain accurate documentation of technical issues and solutions to improve support efficiency.

Education

University of Colorado, Boulder — Cybersecurity Certificate Developed practical skills in Microsoft Security, Computer Networking, Cloud Security, Linux Security, and Network Security. Real-world training on troubleshooting, securing systems, and network configuration.

Projects

- Designed and implemented an IP addressing scheme with VLANs, trunking, and OSPF routing.
- Configured inter-VLAN routing, switch port security, and ACLs to protect network devices.
- Secured remote access and established extended ACL rules for network safety.
