EXPERIENCE

Software Development Engineer 2

Expedia

Nov 2024 - Present

Springfield, Missouri, USA

- Developing distributed APIs to enable travel businesses to utilize Expedia's car rental business service enabling their customers to shop and book car rentals by advancing the capabilities of Expedia's B2B ecosystem.

Software Engineer

Natwest Group

Sep 2021 - August 2024

Delhi NCR, India

- **Enhanced Fraud Detection:** Designed microservices for profiling customer transactions (monetary and non-monetary data), enabling real-time fraud detection through **Kafka** integration and secure **MongoDB** data storage. Resulted in improved accuracy of fraud detection models.
- **Improved Currency Conversion Efficiency:** Delivered a batch forex rates processing microservice, optimizing currency conversion processes for payments. Secure OAuth API integration reduced latency and ensured compliance with security standards.
- **Future-Proofed Applications:** Migrated critical Spring Boot microservices from JDK 8 to JDK 17, unlocking performance improvements and long-term compatibility, reducing maintenance overhead.
- **Strengthened Fraud Prevention Infrastructure:** Built and deployed scalable Java applications on Cloud Foundry, ensuring 99.9% availability and resilience of fraud detection integrations.
- **Accelerated Client Transactions:** Improved transaction response times by 100% by optimizing Kafka consumers and producers using batch processing, enhancing client experience and operational throughput.
- **Guaranteed Application Quality:** Maintained and optimized microservices, resolving critical bugs swiftly with rigorous unit and integration testing, ensuring reliability and reducing downtime.

Trainee Software Engineer

HSBC

Sep-2020 - Sep 2021

Pune, Maharashtra, India

- Developed scripts for automated IAM feed data collection from externally hosted APIs to internal systems for regulatory audits using **python and shell scripting**

SKILLS

- **Languages:** Java, Python, Kotlin
- **Frameworks:** Spring (MVC, Boot, Data, Core), J2EE, , JDBC, JMS, Log4J , Django, Reactive Programming
- **Web Services:** REST, Spring Framework
- **Databases:** MySQL , MongoDB
- **Tools & Platforms:** Maven, Git, IntelliJ, Jira , Apigee , Grafana , Splunk , DXAPM , Hashicorp Consul, Docker , Kubernetes, DataDog
- **Agile Tools:** JIRA, Confluence
- **Other Skills:** AWS, OAuth, Kafka, Pivotal Cloud Foundry,
- **Testing:** Unit Testing (Mockito, Junit), Karate
- **Version Control:** Git, GitLab

EDUCATION

B.Tech (Computer Science and Engineering),
Guru Gobind Singh Indraprastha University
Maharaja Agrasen Institute of Technology, Delhi, India
Grade: **8.99/10.0**

2020

LEADERSHIP AND CERTIFICATIONS

UDACITY · AWS Cloud DevOps Engineer Nanodegree

[Credentials](#)

Part of Natwest Group Technology Academy Expert panel, conducted various KT sessions. Got Promoted to grade B7
