

***Seasoned professional with robust experience in delivering complex infrastructure, compliance, and system implementation projects and programs across public and energy sectors.***

Proven track record in managing capital and deferred maintenance initiatives up to \$19M, with deep expertise in NERC/FERC regulatory compliance, Critical Infrastructure Protection (CIP), and enterprise-wide process improvement. Expert in end-to-end project delivery—scoping, planning, budgeting, execution, stakeholder engagement, and reporting. Experienced in delivering projects using JOC, design-build, and low-bid contracting methods. Recognized for leading cross-functional teams through high-stakes audits (8 successful regulatory audits), system rollouts (C-NRG/SigmaFlow, SAP/Greenlight), and compliance documentation efforts (over 120+ data requests coordinated). Strong analytical and organizational capabilities in business systems implementation, SharePoint governance, and compliance metrics tracking. Adept at translating technical and business requirements into actionable strategies, training programs, and standardized procedures to reduce risk and enhance audit readiness. Awarded for leadership in safety and enterprise documentation, with demonstrated success in driving cost-saving initiatives, such as \$300K cybersecurity training overhaul, and transforming fragmented documentation systems into streamlined, compliant ecosystems.

## Areas of Expertise

- Enterprise System Implementation
- Business Process Improvement & Standardization
- Stakeholder Communication & Engagement
- Cross-Functional Team Leadership
- Project Controls, Reporting & Financial Oversight
- Project, Program, & Portfolio Management
- Contract & Vendor Management
- Documentation, Systems, & Data Management
- Budgeting & Resources Optimization
- Risk Analysis & Mitigation
- Regulatory Compliance & Audit Management
- Team Leadership & Management

## Key Project Contributions

- ✓ Oversaw end-to-end implementation of C-NRG (SigmaFlow) compliance platform—from BRD requirements and documents scoping and stakeholder alignment to data migration, validation, and successful enterprise-wide deployment by expediting compliance workflows and enhancing audit readiness.
- ✓ Spearheaded cross-functional initiatives to design and implement enterprise-wide compliance procedures by aligning multi-departmental operations with regulatory standards at NRG Energy and SCE.
- ✓ Engineered robust monitoring tools to track regulatory metrics, such as training, background checks, and terminations, and directed project build-out of automated compliance platforms to improve accountability and transparency.
- ✓ Pioneered enterprise migration from Lotus Notes to Microsoft Office 365 and SharePoint by streamlining over 20K documents by developing metadata standards, employing retention policies, and standardizing library architecture.
- ✓ Championed definition of business requirements and steered deployment strategy for Enterprise Compliance Management System (SAP/Greenlight) by overseeing resource allocation using skill matrixes, budgeting, and execution across teams.
- ✓ Delivered zero-findings audit by unifying fragmented processes across business units, resulting in earning regulator praise for strong continuity and marked improvement from prior assessments.
- ✓ Devised and executed a strategic audit response plan for major 2015 regulatory review and coordinated rapid turnaround for over 120 time-sensitive data requests—often within 2–3 hours—by conducting QA reviews and facilitating evidence development training for stakeholders under tight audit timelines.

## Professional Experience

**Project Manager, County of Los Angeles, Alhambra, CA**

**2019 – Present**

Administer progress payments based on validated completion milestones for accurate disbursements and financial transparency. Collaborate daily with architects, engineers, and environmental consultants to coordinate design development and field execution. Draft Board letters to secure project funding and approval for proposed delivery method for alignment and clear communication with cross-departmental stakeholders. Deliver both short-term and multi-year infrastructure projects for scope, schedule, and budget adherence while aligning with County goals. Present monthly status reports and executive budget briefings to enable informed decision-making at senior leadership level. Elevate fiscal accountability by performing budget tracking, forecasting, and cost control throughout project lifecycle. Direct multiple construction delivery methods, including Job Order Contracting (JOC), design-build, and low-bid contracting.

- Managed a diverse portfolio of 13 capital improvement projects across Los Angeles County—including Health Services and deferred maintenance initiatives—with budgets ranging from \$100K to \$19M by delivering infrastructure enhancements to improve facility performance, ascertain regulatory compliance, and fuel long-term asset value.
- Provided project coordination and oversight across diverse portfolio of 6 Health Services initiatives and 7 deferred maintenance projects to foster planning, execution, and stakeholder engagement to maintain momentum and meet compliance milestones.
- Prepared formal Board letters to support project funding and delivery method approvals; collaborated with senior leadership and legal counsel to ensure timely inclusion on County of Los Angeles Supervisors' agenda for executive presentation.
- Liaised closely with legal counsel and senior leadership to review and finalize submissions, thus facilitating executive approval and timely authorization of critical initiatives.
- Oversaw contract management, supervised plan reviews, and secured all required permits for compliance with municipal regulations and project readiness.

#### **Critical Infrastructure Protection Business Analyst & Project Manager, NRG Energy - Houston, TX**

2016 — 2019

Executed detailed compliance reporting on training, background checks, terminations, and internal transfers to boost transparency, aid informed leadership decisions, and demonstrate strong documentation and stakeholder communication skills. Planned and arranged training programs and enterprise training records, including writing curricula and instructional materials, for consistent regulatory understanding, accelerated audit preparedness, and complete documentation for external and internal review.

- Guided cross-functional teams in development and implementation of standardized, enterprise-wide policies, procedures, and compliance frameworks to amplify operational consistency, guarantee alignment with evolving NERC and FERC regulatory standards, and standardize evidence for audit readiness including the implementation of document and record controls.
- Cooperated with subject matter experts to analyze root causes, identify process gaps, and apply corrective action plans, thus decreasing compliance risk and propelling long-term project outcomes.
- Incorporated ongoing regulatory updates into operational workflows and documentation systems to obtain continuous compliance and minimize audit-related findings. Designed, implemented and trained staff on document and record controls.

#### **Senior Project & Program Analyst, Southern California Edison, Rosemead, CA**

2009 — 2016

Collaborated with subject matter experts to diagnose compliance issues, determine systemic gaps, and formulate effective mitigation strategies while strengthening risk management. Presented reports on NERC/FERC regulatory requirements and compliance metrics, including training completions, background verifications, terminations, and employee transfers for data-driven decision-making.

- Steered cross-functional initiatives to craft and employ enterprise-wide procedures and compliance frameworks, thus enhancing consistency and audit preparedness across business units. Led document creation and management, cradle to grave initiatives.
- Led regulatory audit efforts by coordinating comprehensive data responses for eight NERC and FERC audits to ensure full compliance and zero findings.

## Additional Experience

**Sr. Office Admin**, Los Angeles Unified School District, Los Angeles, CA | **Project Engineer**, Kaiser Permanente, Multiple California Facilities

## Education & Certifications

**Bachelor of Science in Business Management**, University of Phoenix, San Diego

**Project Management Certificate**, University of California, Irvine | **Lean Six Sigma Certification**, University of California, Irvine

## Awards & Recognition

**Letter of Commendation, Southern California Edison** – Recognized for contributions to Enterprise Document Library

**Excellence Award for Leadership in Safety** – Honored for outstanding commitment to workplace safety initiatives

**Jack Horton Humanitarian Award** – Awarded for exemplary community service and leadership

## Technical Proficiencies

**Project & Office Tools:** Microsoft Project, Word, Excel, PowerPoint | **Collaboration & Document Management:** SharePoint, Dropbox, O365, Google Workspace | **Database & Administrative Tools:** Database Administration, ServiceNow, EPIC LA Permit Management | **Additional Tools:** Experience with various proprietary enterprise applications | QuickBooks desktop and on line, Success Factors | Visio SigmaFlow and ECMS (similar to DFM and DIMS).
